Building Automation since 1921

KNX house & building automation Smart Home LUXORliving

From presence simulation to central OFF in the smart home - with LUXORliving you can implement a future-proof and intuitive smart home system. KNX components from Theben leave nothing to be desired in a KNX-based building. And DALI-2 components can be integrated just as you wish: As detectors, as sensors or as a manufacturer-independent system in the DALI-2 Room Solution:

LUXORliving smart home system 10
KNX house & building automation 38
DALI-2 detectors / sensors
DALI-2 Room Solution 134

Presence & motion detectors

Indoor or outdoor? Wall or ceiling mounting? With its own light source or only as a detector? With Theben you will always find the right lighting solution. Available in a wide range of designs and colours.

Indoor detectors and sensors 152
Outdoor detectors 230
LED spotlights / LED spotlights with motion detectors 242

Time & Lighting control

Whether time or brightness-dependent, whether socket or control cabinet, whether analogue or digital, whether stair-case or living room, whether for display window lighting or the church steeple, Theben offers a suitable solution for every application.

Digital time switches 258
Analogue time switches, time relays & hour counters 280
Staircase time switches & latching relays 306
Dimmers 316
Twilight switches 322

Michael Matthesius
Chief Technology Officer

Paul Sebastian Schwenk
Chairman of the Board of Management

Dear customers and partners,

With the Corona pandemic and the complex economic environment, 2021 was a challenging, but – thanks to our 100th anniversary – also an emotional and moving year. Along with the anniversary activities, 2021 also laid the foundation for many exciting product innovations.

Thomas Sell
Chief Sales Officer

For example, we developed the DALI-2 Room Solution as a complete single-room solution with HCL functionality. It allows DALI-2 lighting systems to be implemented as easily as broadcast. The optical presence detector thePixa detects the number of people in a room and where they are. This opens up completely new areas of application and brings impressive added value for architects, building operators and users. The versatile LUXA 103 presence detector family for indoor and outdoor use completely redefines the standard presence detector segment. And thanks to KNX Secure, all KNX components from Theben are optimally protected against data theft and tampering.

In this catalogue, you will find these as well as other new and numerous proven premium products. Do you have any questions regarding installation and usage? Our Youtube channel provides you with helpful tutorials and installation videos including valuable tips and tricks.

We look forward to continuing our collaboration and wish you a successful 2022.

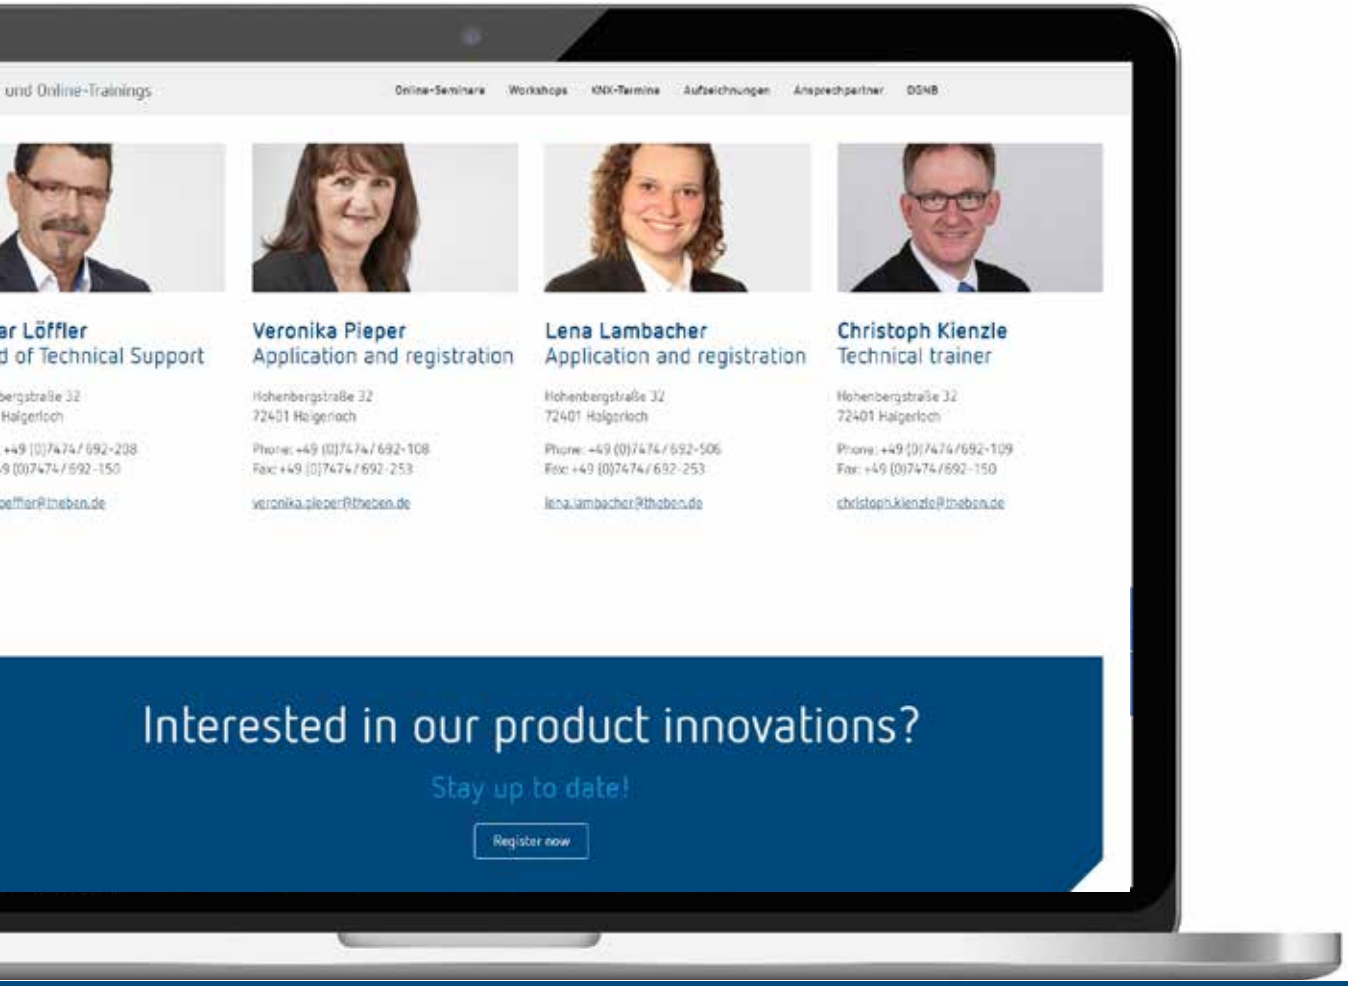
Equipping you for day-to-day tasks
Online and
Offline trainings

Our practical training sessions familiarise you with the latest developments, trends, standards and regulations to help you strengthen your competitive position. Basic theory is important – but our seminars focus primarily on putting knowledge into practice to equip you for your day-to-day tasks.

For details of all online and offline training events, visit
www.theben.de/training-courses



We're always there for you: 24 hours a day, 7 days a week!

www.theben.de/
training-courses

Can't make that date/time? You've missed the training?
No problem! You can access our training sessions and seminars at any time by visiting our website at

Amazingly convenient Commissioning and Operation via App

Theben apps stand out from the crowd thanks to their security, convenience and incredibly easy operation.
The best news of all is that they can be downloaded free of charge from the app stores.
For all the info on our apps, visit **www.theben.de/app-en**

Our apps are ready for you to download from the usual stores:

→ Anroid: Google Play Store
→ iOS: Apple Store

→ iONplay

Program and control the iON 108 KNX Bluetooth room controller.

→ LUXORplay

Control and operate the LUXORliving smart home system with complete ease.

→ DALI-2 RS Plug

DALI-2 components simple commissioning.

→ thePixa Plug

Easily program and control the thePixa optical presence detector.

→ theSenda Plug

Easily program LED spotlights and presence and motion detectors.

→ OBELISK top3

Easily program digital time switches.

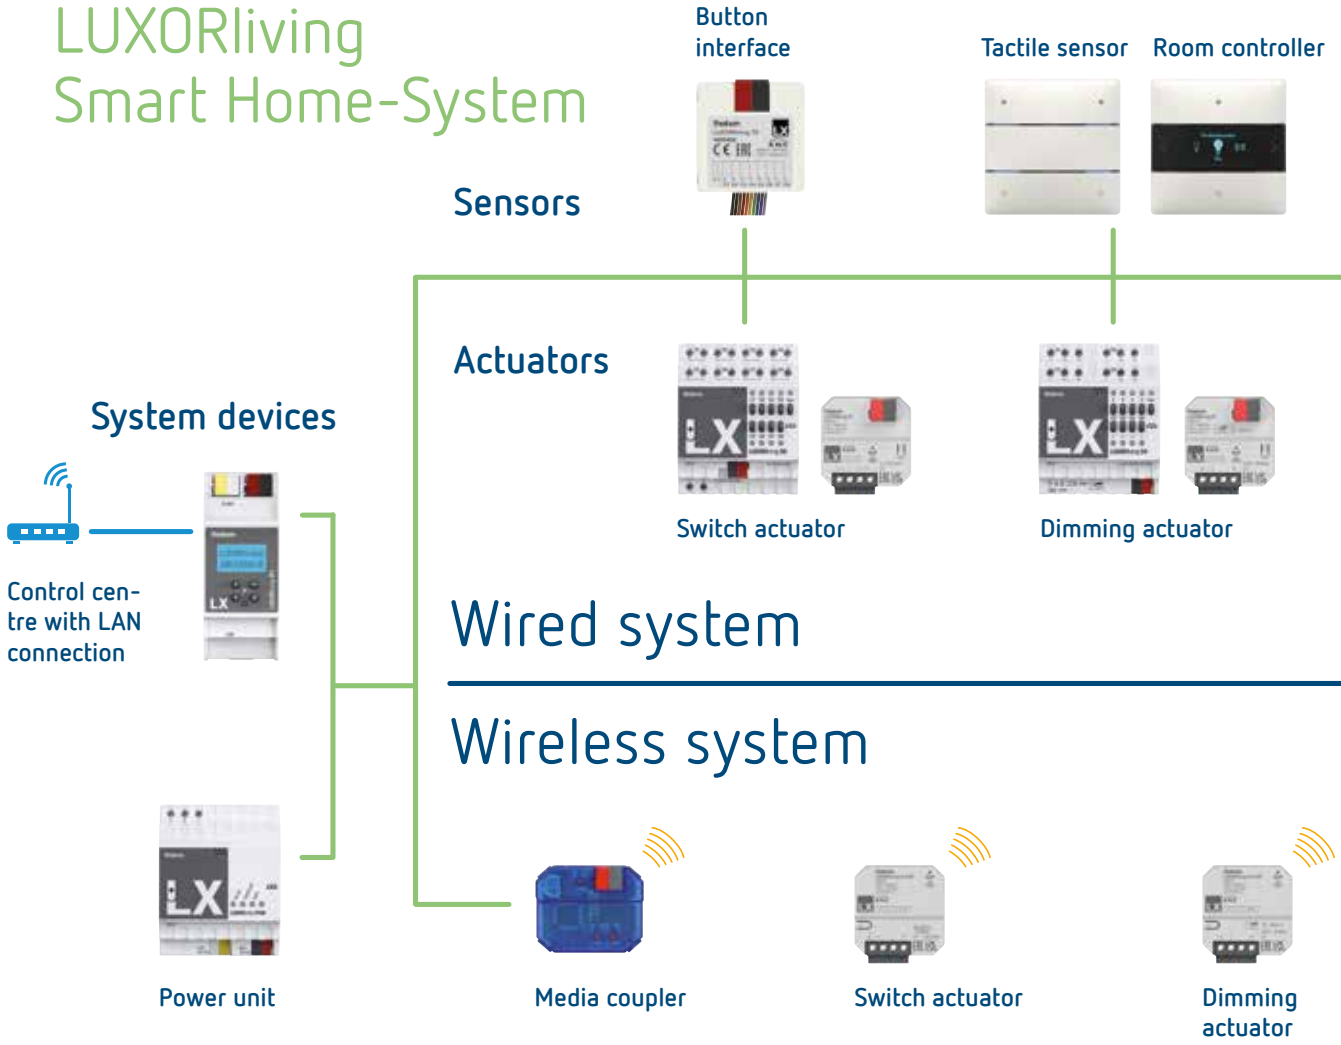
→ MAXplus

Control and program the DIMAX 544 plus.

→ RAMSES BLE

Easily program and control the RAMSES room thermostats.

LUXORliving
Smart Home-System



Simply flexible
when it comes to setup and installation

Simply wire, set up, program and you're done. Or retrofit with wireless actuators. The visualisation is generated automatically. With LUXORplug, you can create the project file in an instant. Whether you are carrying out the installation at your office or directly on site. You have everything at your fingertips. And online via Theben Cloud, you have everything under control with the LUXORplay app – total convenience on a smartphone or tablet.
LUXORliving makes a lot of things easier for everyone. But it keeps some things, such as the installation process, as simple as you've come to expect from Theben and LUXOR.

Certified components

LUXORliving uses standard KNX communication, making it a secure investment that is better fit for the future compared to proprietary systems. Updates ensure it is always at the cutting edge and the system is easy to extend if necessary. The highlight: LUXORliving has as much KNX as is needed and as little complexity as possible. That's what makes LUXORliving so incredibly simple. For the installer as well as for the user.

Simple start-up

LUXOR has always been easy to install. LUXORliving is child's play. Just install, wire and programme. Done. No ETS. No licence required. No prior knowledge either. Just go with your intuition – speedy, safe, successful.

BUS

Flexible BUS wiring

In conventional installations the functions are preset and fixed through the wiring. This is not the case with LUXORliving. Based on flexible BUS wiring, lamps, roller blinds or other applications can be assigned to the push buttons of your choice. This gives you leeway to change existing installations and reduces costs, as fewer switches are needed.

Free push button selection

In many smart home systems, the choice of button styles is set. This is not the case with LUXORliving. Here, homeowners can choose freely whether they use our LUXORliving iON push buttons or any other conventional push button in connection with our binary inputs and push button interfaces.

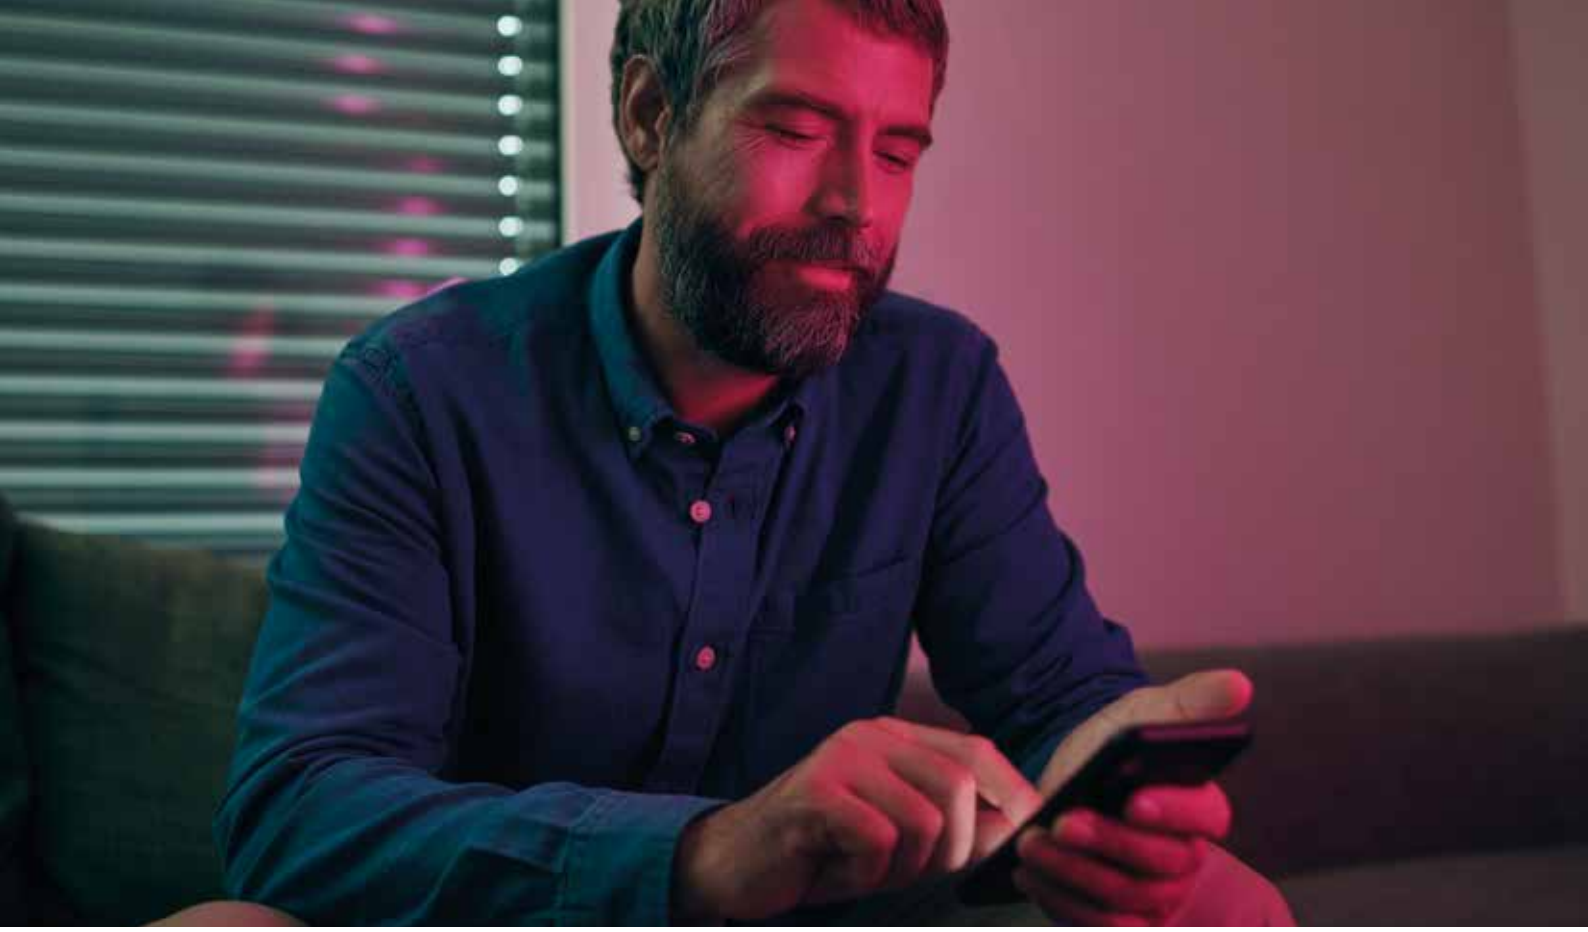
Clever Presence simulation

When the residents are at home, they use LUXORliving. When they're not at home, LUXORliving is of use to them. The clever smart home system makes sure that the lights come on and the blinds go down every evening, leaving the residents free to enjoy their holiday without having to worry.

1
2

Custom scenarios

Lighting moods and roller blind positions can of course be programmed freely and activated with a command as required. This means that each individual can create the scenes of their choice.



Flexible colour control in the smart home LUXORliving DALI broadcast

With the DALI-2 certified actuator LUXORliving D4 DALI, up to 30 DALI devices per channel can be easily controlled via broadcast commands. Broadcast communication requires no DALI addressing or grouping and greatly simplifies start-up and maintenance. The 4-channel actuator also supports the control of colour and colour temperature of devices according to DALI Device Type 8 (DT8) in the smart home system: For example, the atmosphere in living rooms can be made more pleasant by colder or warmer light.

Highlights at a glance

- 4 channels
- 30 DALI EBs per channel
- Simple start-up and maintenance thanks to broadcast communication
- Support for colour and colour temperature control (Device Type 8) via push button or LUXORplay app
- Easy start-up with LUXORplug
- Conforms to DALI-2 standard

Smart Home system LUXORliving, Push-button sensors

LUXORliving iON2 | LUXORliving iON4 | LUXORliving iON8

Description

LUXORliving iON2

- Push-button sensor with 2 buttons and 2 status LEDs with integrated temperature sensor
- For controlling of the functions switching, dimming, blinds, scene in the LUXORliving system
- Multi-colored status LEDs
- Automatic brightness control of the status LEDs depending on the ambient brightness
- Integrated temperature sensor for room temperature control with LUXORliving heating actuators
- Transparent cover for individual labeling in the scope of delivery
- Vertical installation of two ION push-button sensors on standard double socket with accessory 9070822 possible (standard combination distance 71 mm)

LUXORliving iON4

As LUXORliving iON2, but:

- Push-button sensor with 4 buttons and 4 status LEDs with integrated temperature sensor

LUXORliving iON8

- Room controller with integrated room temperature controller
- LC display for displaying functions, icons and values
- 10 freely parameterizable functions
- Display of various icons for the respective functions
- For controlling of the functions switching, dimming, blinds, scene, temperature control in the LUXORliving system
- Automatic brightness control of the display depending on the ambient brightness
- Vertical installation of two ION push-button sensors on standard double socket with accessory 9070822 possible (standard combination distance 71 mm)

Smart Home system LUXORliving, Motion detector

Description

- Passive infra-red motion detector for wall installation
- Square detection area 170°, 14 x 17 m (238 m²)
- Mixed light measurement suitable for the control of fluorescent, incandescent, halogen lamps and LEDs
- Integrated temperature sensor
- Integrated button
- Extension of detection area via master / slave switching
- Adjustable sensitivity
- With Theben frame
- Adapter frames for common switch ranges available as accessory, see www.theben.de/theMura

Description

- 4-way DALI actuator LUXORliving, DALI-2 certified
- Interface between bus system and DALI lighting system (Digital Addressable Lighting Interface)
- For controlling up to 30 DALI operating devices per channel via broadcast commands
- Enables very simple commissioning without the effort of addressing or grouping on the DALI side
- Even in the event of a fault, simple replacement of DALI control gear without further programming
- Internal DALI power supply with 60 mA output current per channel
- In addition to the classic functions such as switching, dimming, scenes, the DALI actuator also offers the possibility of colour and colour temperature control (Device Type 8)

Product selection

Smart Home system LUXORliving

- LUXORliving is the simple smart home system from Theben, offering all-round home comfort, whilst avoiding unnecessary waste. Switching lights on and off. Dimming. Regulating heating and controlling blinds.
- That's what it's all about. And the best thing: LUXORliving is so easy to assemble, install and use that you don't need to be a specialised fitter – unless you really want to!
- Anyone who is building or renovating should include LUXORliving in their plans. The smart home system makes houses and flats more comfortable and provides a pleasant working atmosphere in offices and doctor's surgeries too. What's more, it creates optimum conditions for you to use your energy-saving potential.

Highlights of LUXORliving at a glance

- Simple start-up
- Free push button selection
- Certified KNX system
- Flexible BUS wiring
- Safe panic function
- Control centre OFF
- Individual scenarios
- Clever presence simulation

Description Switching actuators

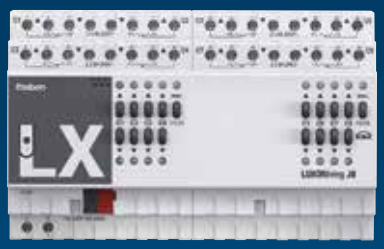
LUXORliving J4



LUXORliving J8

Description

Common functions

- 1-way flush-mounted actuator LUXORliving
- Easy installation due to the compact housing
- 2 binary inputs for floating contacts such as buttons, switches, temperature sensor (I2)
- Integrated temperature monitoring for increased operating safety, e.g. in the event of overload

LUXORliving D1

- 1-way flush-mounted dimming actuator LUXORliving
- Optimised dimming output for dimmable energy-saving lamps, LEDs, incandescent and halogen lamps, and dimmable transformers
- Easy to adapt to different lamps thanks to automatic load detection
- Adjustable dimming curve for precise and flicker-free dimming
- The binary inputs are assigned to the dimming output as standard (function test before programming)

LUXORliving J1

- 1-way flush-mounted blind actuator LUXORliving
- For controlling drives for blinds, roller blinds, sun and vision protection devices, skylights, and ventilation flaps
- The binary inputs are assigned to the output as standard (function test before programming)

LUXORliving S1

- 1-way flush-mounted switching actuator LUXORliving
- 1x NO contact & 1x NC contact with common control
- Adjustable features: NC/NO contact, switching, delayed switching, pulse function
- The binary inputs are assigned to the switch output as standard (function test before programming)

LUXORliving H1

- 1-way flush-mounted heating actuator LUXORliving
- Noiseless control of thermal actuators 230 V AC
- Integrated temperature controller heating / cooling
- Valve protection function

Smart Home system LUXORliving, Binary input

Description

LUXORliving T4 S RF

- 4-way flush-mounted wireless push-button interface
- Encrypted wireless communication
- 4 binary inputs for potential-free buttons and signaling contacts
- 1 additional input for temperature sensor
- Free assignment of the functions switching, dimming, blinds, temperature measurement and transmission
- Easy installation due to the compact housing
- Can be used with 4-way push-button module (9070806)

LUXORliving RF1

- Connects LUXORliving RF devices of a radio line with the twisted-pair bus
- Power supply via KNX bus voltage
- Supports long frames for „KNX Secure" and enables faster download of large applications in parallel
- Ranges of max. 30 m within the building are possible
- Has a repeater function, i.e. received telegrams are sent again to increase the range

Smart Home system LUXORliving, Binary input

LUXORliving B6

Description

- 6-way binary input LUXORliving
- 6 floating universal and wide-range voltage inputs (10-240 V AC/DC or internally generated auxiliary voltage of approx. 12 V DC)
- Software functions: Switch/push-button, dimming, blinds
- LED switching status display for each channel
- Manual operation on device

Product selection

Number of channels	Type	Article number
6	LUXORliving B6	4800430

Technical data

LUXORliving B6			
Operating voltage	110–240 V AC	Type of protection	IP 20
Stand-by consumption	< 0,3 W	Protection class	II according to EN 60 730-1
Width	4 modules

LUXORliving T2 | LUXORliving T4 | LUXORliving T8

Description

Common functions
- Binary input sensor interface LUXORliving
- Can be installed in flush-mounted sockets with conventional sensors / switches
- Software functions: Switch / push-button, dimming, blinds
- Colour coding of wiring pairs

LUXORliving T2
- 2-way binary input sensor interface
- 4-pole cable connection

LUXORliving T4
- 4-way binary input sensor interface
- 6-pole cable connection
- 2 NTC inputs for detection of the actual temperature

LUXORliving T8
- 8-way binary input sensor interface
- 10-pole cable connection
- 2 NTC inputs for detection of the actual temperature

LUXORliving H6 24V

Description

- LUXORliving heating actuator for controlling thermal actuators
- Option of channel-based actuator control: 24 V DC switching or 0–10 V DC continuous
- Integrated relay for demand-based control of heating circuit pump
- No room thermostat required: each channel has a temperature control
- Can be installed directly in the heating circuit distributor
- Screwless terminal technology
- Integrated power supply for max. 12 thermal actuators
- Continuous or switching actuating value can be selected
- Integrated valve protection - Manual operation on device

Optical presence detector thePixa
Your new plus in flexibility
inside the building can do more

- → Pixel-based detection technology
- → Detecting and counting objects / persons
- → 100 % GDPR compliant
- → Easy start-up via app programming
- → Triggering KNX building automation actions
- → Added value for building operators
- → Flexible detection zones
- → Tamper-proof thanks to KNX Data Secure

KNX Data Secure

GERMAN INNOVATION AWARD '21 GOLD

Optimised building automation and building operation - simple and convenient

The optical presence detector thePixa now opens up further applications with significant added value thanks to its pixel-based detection technology. These go far beyond the possibilities of PIR presence detectors. The optical presence detector thePixa detects how many people are in a room and where they are. This information is used to trigger predefined actions in the KNX building control system. However, not just the building automation features stand to gain. There are completely new benefits, especially for building operators. For example, flexible options for configuring desk-sharing or for optimising room occupancy and building cleaning activities.

The presence detector **thePixa** has been checked by **DEKRA*** for compliance with **GDPR!**

Easy programming via App

Via thePixa Plug app, you can divide the detected area into up to 6 zones if desired and programme them freely. The precise subdivision of the detection area, with dimensions up to 11 x 15.5 m, enables accurate lighting control in larger rooms. False switching operations are effectively prevented.
The high installation costs that are often incurred after conversion or room restructuring are completely eliminated. It is easy to create new zones within the detection area in the app. The settings programmed in the app are then simply transferred from a smartphone or tablet to thePixa via Bluetooth.

GDPR-compliant detection

thePixa KNX uses very low-resolution images and therefore fully complies with GDPR requirements (DEKRA tested*). There is no live picture at any time. Using image analysis, the optical presence detector identifies differences in the situations that arise in the rooms being monitored and processes the associated information.

iON touch sensors and room controllers
Convenient and stylish

Switch on and dim lights, raise and lower blinds, control the room temperature, or save and activate individual scenes. With Theben iON touch sensors and room controllers, a wide range of functions in any KNX-based smart building and in the Theben LUXORliving smart home system can be controlled simply by pressing a button. ID AID has come up with a frameless design that means iON cuts a stylish figure in any room.

- → Simple integration thanks to a built-in bus coupling unit
- → Integrated sensor for easy temperature measurement
- → Reliable status indication via coloured LEDs or LC display
- → Customisable button labels

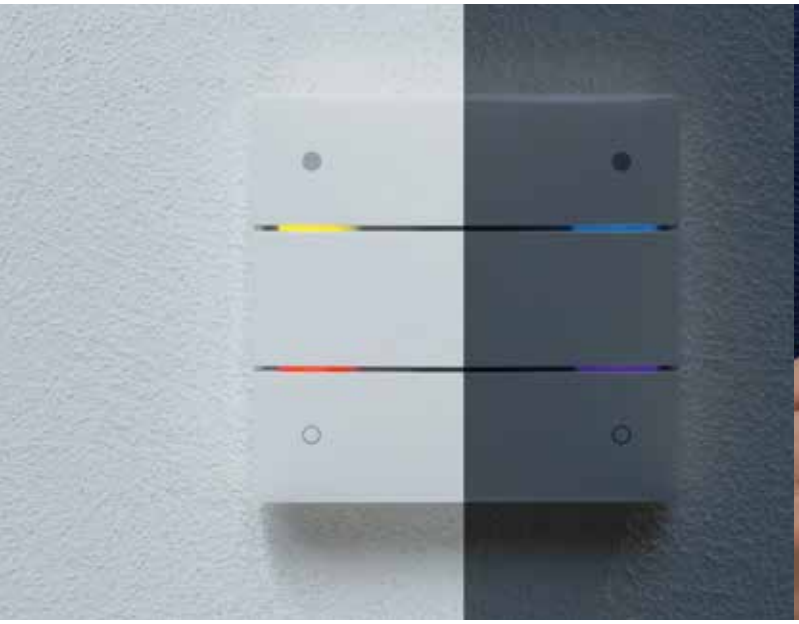
iON 102 KNX
- 1-way touch sensor (4969232)

iON 104 KNX
- 2-way touch sensor (4969234)

iON 108 KNX
- 20-way room controller (4969238)

For technical details, see page 48 onwards.

Did you know that our iON touch sensors and room controllers are also available in LUXORliving versions? For more information, see page 14.



A subtle presence – day and night

Multiple colours or one. Bright or dark. The status LEDs of iON 102 and 104 inform you about the current status of the touch sensor. You decide how: in vivid colours or in elegant monochrome. The brightness of the LEDs automatically adjusts to the surrounding brightness. They gleam a little less at night, so no one is disturbed, and a little brighter during the day, so they are clearly visible.

Clearly convenient

iON 102 and 104 can be labelled according to your needs and preferences. You can choose between clear function descriptions, such as "light on", "TV scene" or "blinds up". Or you can design the surface entirely to suit your taste. It's even easier if you download our practical templates from www.theben.de/ion-en

More functions – more convenience

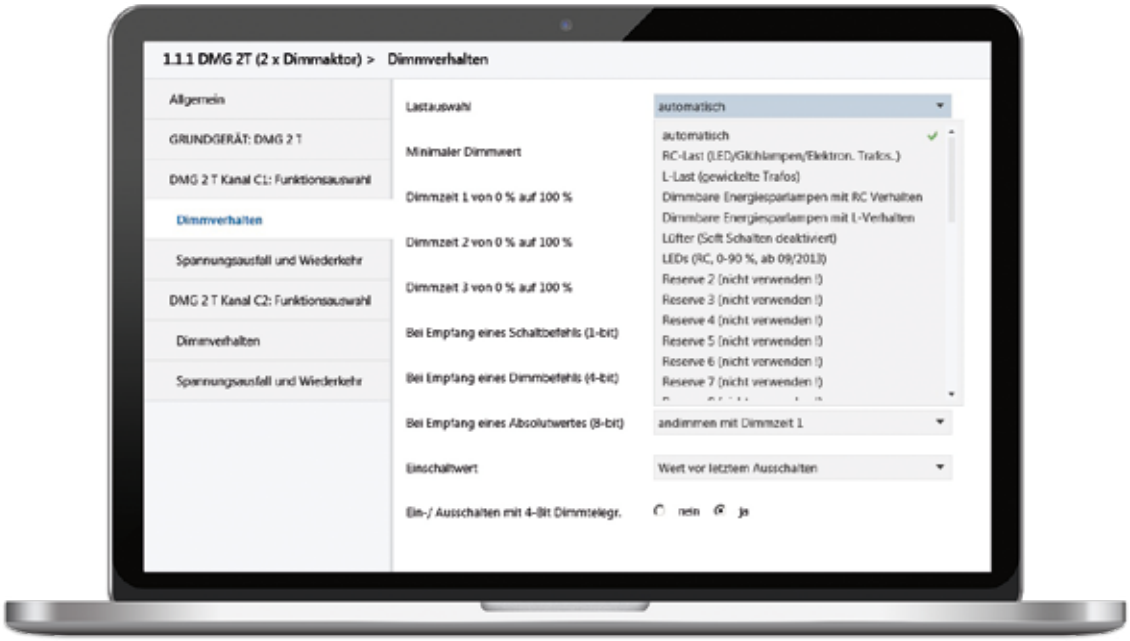
iON 108 room controllers feature a high-quality and extremely durable LC display. So you see clearly what's going on. Select an icon for each of the 10 or 20 functions and assign suitable function names to them. The current status is also displayed. Operating your smart home couldn't be easier..

Speaking of operation: iON 108 KNX can also be easily controlled via Bluetooth using an app. App operation is perfect for meeting rooms or hotel rooms. Guests simply control the functions of the room themselves.

Bluetooth®

Dimming LEDs precisely
Today and in the future

Whether you opt for the FIX series or the MIX series – with KNX universal dimmer actuators from Theben you can steplessly dim LED, halogen and energy-saving lamps without any flickering. The only prerequisite is that the selected lamp is dimmable. In view of the increasing number of connected LED lamps with small wattages, multiple channels provide greater freedom of design.



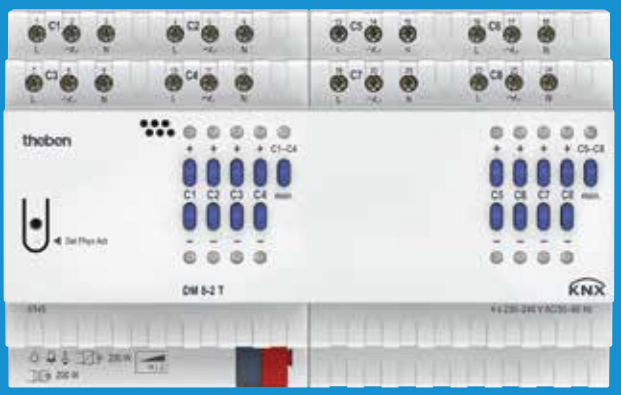
Up to date with KNX: Reloading dimming curves

KNX universal dimmer actuators from Theben go one step further: the ETS KNX programming software stores various dimming curves, which correct the dimming response appropriately depending on the lamp used, thus ensuring seamless, infinitely variable dimming. Dimming curves can also be individually adapted to your lamps for a consistent dimming response. Another advantage is the high dimming output with up to 400 LED watts per channel. This output can even be increased to 800 watts by connecting 2 channels in parallel.

Continuous, flicker-free, consistent
KNX dimming actuators for all LED wattages

MIX2 range (page 50 onwards)

Flush-mounted actuator range (page 74 onwards)



FIX1 and FIX2 ranges (page 50 onwards)

Optimised for small wattages

The times of high wattages are over.
Today, the art is in dimming LEDs with small wattages. Theben is on top of this trend, offering dimming actuators with a minimum load of just 2 watts.

Optimised dimming curves

Various dimming curves are stored in the ETS KNX programming software and these correct the dimming response appropriately depending on the lamp used, thus ensuring stepless dimming.

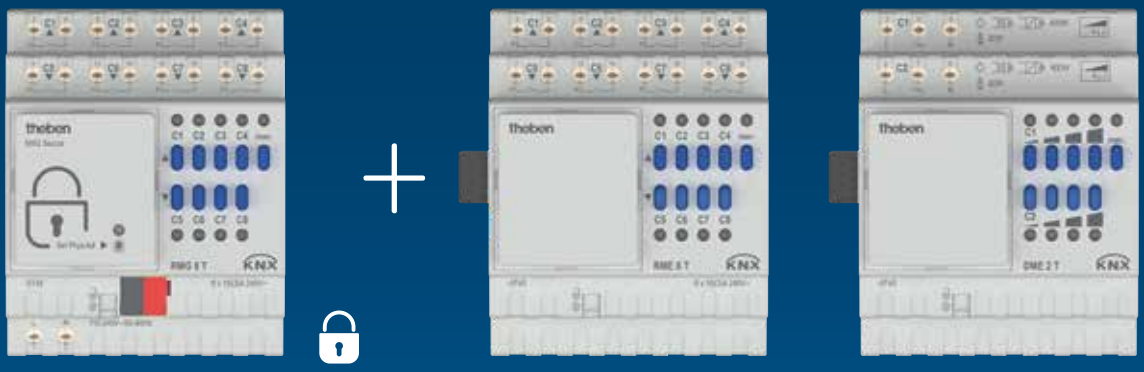
Fast start-up

Buttons (25 %, 50 %, 75 %, and 100 %) allow quick function tests to be performed for start-up, even without a bus connection. In the case of the MIX series, the bus module can even be plugged in afterwards.

Versatile scene function

Like the RMG 8 S KNX switching actuator, the DMG 2 T KNX allows you to save different scene functions.

MIX2 benefits at a glance
Everything you need for KNX



Basic module (G) + maximum 2 extension modules (E)

1. KNX Secure - no chance of data theft

The MIX2 devices are now KNX Secure certified and thus offer maximum protection against data theft and manipulation. Existing MIX2 devices can also be converted to KNX Data Secure in just a few simple steps.

2. Removable bus coupling unit

The installer fits the basic module (G). Meanwhile, the bus coupling unit is configured by the system integrator – from the comfort and convenience of the office. Then, just before start-up, the module is simply plugged in – job done! This is a cost-effective approach because you do not necessarily need an installer with an expert knowledge of bus technology to be present on site for the installation and wiring.

3. Inexpensive extension devices

As only the basic module is fitted with a bus coupling unit, the costs of the extension devices (E) are up to a third lower because fewer system devices are required. This really pays off. Especially in property construction. Just do the maths and you'll see for yourself!

4. Flexible expandability

Controlling and dimming lighting, adjusting the heating and indoor climate and ensuring protection from the sun are not just tasks that the KNX MIX2 range can handle – they are what it was made for! With MIX2, you can create a solution that is individually tailored to each room and its specific needs. Only Theben offers this flexibility.

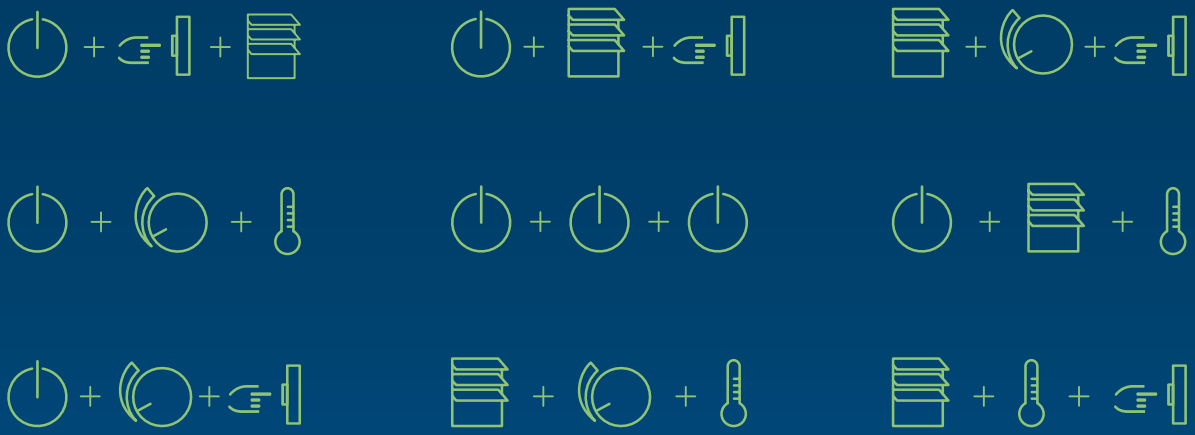
5. Clearly arranged application

The configuration menus in ETS are not only identically structured for all actuators, but also very clearly and intuitively arranged. You can select the actuators you want via drop-down menus according to your project and requirements. And if you need an extension module with a different range of functions, you can even select them later on. Only Theben offers this.

MIX2 actuators – the video
Intelligent, flexible, expandable

Our MIX2 video explains the many advantages of the MIX2 series in an easily understandable way

www.youtube.com/TheThebenAG



Mixing it up – with 129 functions and up to 729 combinations

Switching

Switch things on / off with or without a delay or receive a warning before the staircase light goes out, e.g. using the 4-way C load switch actuators, which offer you new levels of freedom on up to 12 channels. They feature current detection and are designed for higher lamp loads.

Switch actuators

MIX2 RMG 4 U KNX
MIX2 RME 4 U KNX
MIX2 RMG 4 I KNX
MIX2 RME 4 I KNX
MIX2 RMG 8 S KNX
MIX2 RME 8 S KNX

Dimming

Theben's universal dimming actuators have already proven themselves on the market. Compatible with all currently available LED lamps, they are flicker-free and ensure a beautifully even increase in brightness. And they have been enthusiastically received without exception. They are considered to be among the best dimming actuators of all.

Dimming actuators

MIX2 DMG 2 T KNX
MIX2 DME 2 T KNX

Blinds

The switch / blind actuators allow you complete flexibility when it comes to switching and control. Choose between 4 to 8 or 12 blinds and 24 switching channels. Or mix and match. You can do all this with just three modules. This approach gives you more freedom in how you use the channels – particularly, as you can assign the modules subsequently however you like.

Switch / blind actuators

MIX2 RMG 8 T KNX
MIX2 RME 8 T KNX

Blind actuators

MIX2 JMG 4 T KNX
MIX2 JME 4 T KNX
MIX2 JMG 4 T 24V KNX
MIX2 JME 4 T 24V KNX

Heating

Theben's heating actuators allow you to detect the temperature in individual rooms using affordable temperature sensors. Temperature control takes place in the actuator itself and the target temperature can, for example, be set centrally using the theServa KNX visualisation solution.

Heating actuators

MIX2 HMG 6 T KNX
MIX2 HME 6 T KNX

Binary inputs

Theben binary inputs cover the full range of contacts and voltages – whether floating contacts, or 24 V or 230 V. Each of the binary inputs offers six of them. That means more flexibility and greater security of investment. Not only that, but each channel can be tested manually during maintenance or service.

Binary inputs

MIX2 BMG 6 T KNX
MIX2 BME 6 T KNX

Making more out of light automatically
DALI gateways

With the DALI-2 certified DM 4 DALI KNX gateway, up to 30 DALI operating devices per channel can be easily controlled via broadcast commands. Broadcast communication requires no DALI addressing or grouping and greatly simplifies start-up and maintenance.

The highlight: the 4-channel gateway also supports the control of colour and colour temperature of devices according to DALI Device Type 8 (DT8) in a KNX building automation system. Of course, optimally protected by KNX Data Secure.

For example, the working atmosphere in offices and conference rooms can be made more comfortable by using colder or warmer light. Also, creative accent lighting is possible, e.g. in hotels, lounges, exhibition rooms or outdoor areas. By using LED strips, you gain maximum flexibility in the colour and colour temperature design of individual lighting concepts.

Description

iON 102 KNX

- Push-button sensor with 2 buttons and 2 status LEDs with integrated temperature sensor
- Secure communication via KNX-RF with support of „KNX Data Secure"
- For controling of the functions switching, dimming, blinds, value transmitter, operating mode, scene, color control, sequence
- Up to 3 different telegrams per button
- Sending different telegrams with a short, long or double click
- Multi-colored status LEDs with adjustable colors for each LED separately
- Behavior of each status LED can be set: static, flashing or pulsing
- Brightness of each status LED can be individually adjusted via object or parameter
- Automatic brightness control of the status LEDs depending on the ambient brightness
- Integrated temperature sensor for visualization and temperature control via heating actuators
- Function monitoring via object (signaling dismantling)
- Vertical installation of two ION push button sensors on standard double socket with accessories 9070822 possible
- Transparent cover for individual labeling in the scope of delivery

iON 104 KNX

As iON 102 KNX, but:

- Push-button sensor with 4 buttons and 4 status LEDs

iON 108 KNX

- Room controller with integrated bus unit
- Secure communication via KNX-RF with support of „KNX Data Secure"
- Access to the room controller via Bluetooth and operation with the IONplay app
- LC display for displaying functions, icons and values
- Integrated temperature controller for regulating and controlling the operating mode, temperature and fan level
- 20 freely parameterizable functions
- Free assignment of icons to the functions (40 icons to choose from)
- For controling of the functions switching, dimming, blinds, value transmitter, operating mode, scene, color control, sequence
- Display brightness individually adjustable via object or parameter
- Automatic brightness control of the display depending on the ambient brightness
- Function monitoring via object (signaling dismantling)
- Vertical installation of two ION push button sensors on standard double socket with accessories 9070822 possible

Description

Common functions

- DIN-rail 4-way switching actuator 16 A 140 µF, KNX TP
- Manual operation and LED switching status display for each channel
- Inrush current max. 800 A / 200 µs, max. 600 W LED / channel
- Switching functions: On / Off, pulse, On / Off delay, staircase light with warning
- Logical links: e.g. lock, AND, release, OR
- Adjustable characteristics: e.g. switching, delayed switching, pulse function
- Links, type of contact (NC contact / NO contact) and participation in central commands such as continuous On, continuous Off, central switching and save / call up scene

RMG 4 U KNX

- DIN-rail 4-way switching actuator 16 A 140 µF, MIX2 base module, KNX TP, Data Secure
- Secure communication via with support of „KNX Data Secure"
- Can be upgraded to maximum of 12 channels
- Up to two extension modules MIX or MIX2 can be connected to one base module
- Device and KNX bus module can be swapped independently of each other
- Removable KNX bus module enables devices to be changed without reprogramming
- Manual set-up and use of switching actuators is possible without KNX bus module

RME 4 U KNX

- DIN-rail 4-way switching actuator 16 A 140 µF, MIX2 extension module, KNX TP, Data Secure
- Secure communication via with support of „KNX Data Secure"
- For upgrading to maximum of 12 channels

RM 4 U KNX

- DIN-rail 4-way switching actuator, 16 A 140 µF, KNX TP

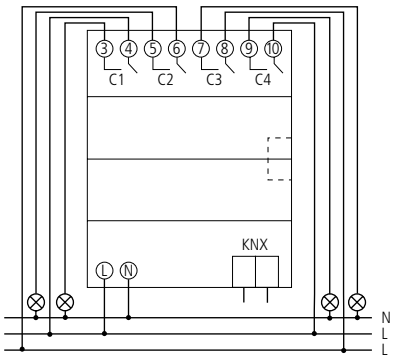
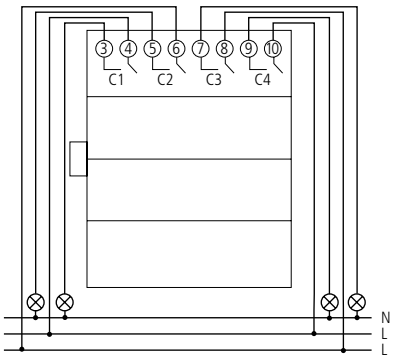
LED lamp > 2 W (typ.)	600 W		
Inrush current	max. 800 A / 200 µs		
Ambient temperature	–5 °C ... +45 °C		
Type of protection	IP 20		
Protection class	II		

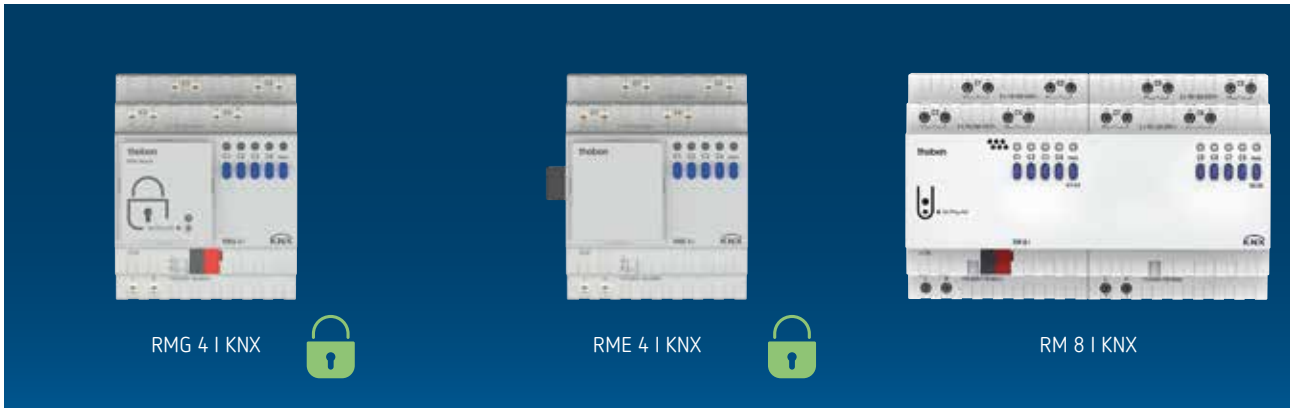
Connection diagrams



RMG 4 U KNX, RM 4 U KNX



RME 4 U KNX



Description

Common functions

- DIN-rail switching actuator 16 A C-load 200 µF, KNX TP
- With current recognition
- Manual operation and LED switching status display for each channel
- Inrush current max. 1500 A/200 µs, max. 850 W LED/channel
- Switching functions: On/Off, pulse, On/Off delay, staircase light with warning
- Logical links: e.g. lock, AND, release, OR
- Adjustable characteristics: e.g. switching, delayed switching, pulse function
- Links, type of contact (NC contact/NO contact) and participation in central commands such as continuous On, continuous Off, central switching and save/call up scene

RMG 4 I KNX

- DIN-rail 4-way switching actuator 16 A C-load 200 µF, MIX2 base module, KNX TP, Data Secure
- Secure communication via with support of „KNX Data Secure"
- Can be upgraded to maximum of 12 channels
- Up to two extension modules MIX or MIX2 can be connected to one base module
- Device and KNX bus module can be swapped independently of each other
- Removable KNX bus module enables devices to be changed without reprogramming
- Manual set-up and use of switching actuators is possible without KNX bus module

RME 4 I KNX

- DIN-rail 4-way switching actuator 16 A C-load 200 µF, MIX2 extension module, KNX TP, Data Secure
- Secure communication via with support of „KNX Data Secure"
- For upgrading to maximum of 12 channels

RM 8 I KNX

- DIN-rail 8-way switching actuator 16 A C-load 200 µF, KNX TP

RM 4 I KNX

- DIN-rail 4-way switching actuator 16 A C-load 200 µF, KNX TP

Description

Common functions

- DIN-rail switching actuator 25 A C-load 200 µF, KNX TP
- High-performance switching actuator
- Manual operation and LED switching status display for each channel
- Inrush current max. 1200 A/200 µs, max. 850 W LED/channel
- No additional operating voltage needed (only KNX bus voltage)
- LED switching status display for each channel
- Manual operation on device
- Switching functions: On/Off, pulse, On/Off delay, staircase light with warning
- Logical links: e.g. lock, AND, release, OR

RM 4 H KNX

DMG 2 T KNX

DME 2 T KNX

DM 4 T KNX

Description

Common functions

- DIN-rail universal dimmer actuator 400 W, KNX TP
- 5-400 W LED/channel, 800 W LED in parallel opeation
- For dimming dimmable LED, incandescent lamps, LV, HV halogen lamps, energy saving lamps and also suitable for controlling fans
- Manual operation and LED switching status display for each channel
- The dimming output can be upgraded by using additional dimmboosters „DMB 1 T KNX" - dimming output 300 W/VA (incadescent lamp) for each dimmbooster. Output to a maximum of 2000 W/VA (incadescent lamp) by using max. 4 boosters possible
- Automatic load detection (can be deactivated)
- For R, L and C loads

DMG 2 T KNX

- DIN-rail 2-way universal dimmer actuator 400 W, MIX2 base module, KNX TP, Data Secure
- Secure communication via with support of „KNX Data Secure"
- Can be upgraded to maximum of 6 channels
- Up to two extension modules MIX or MIX2 can be connected to one base module
- Device and KNX bus module can be swapped independently of each other
- Removable KNX bus module enables devices to be changed without reprogramming
- Manual set-up and use of switching actuators is possible without KNX bus module

DME 2 T KNX

- DIN-rail 2-way universal dimmer actuator 400 W, MIX2 extension module, KNX TP, Data Secure
- Secure communication via with support of „KNX Data Secure"
- For upgrading to maximum of 6 channel

Description

Common functions
- 2-way 1–10 V control unit MIX
- Free combination of switching, dimming, blinds and heating control as well as binary inputs
- Switching and dimming of lighting circuits in combination with electronic ballasts (EBs and ballasts LED)
- 1–10 V inputs and one switch output (relay contact) per channel
- LED switching status display for each channel
- Manual switch with On/Off/Bus settings (also without bus voltage)
- Zero-cross switching for relay-saving switching and high lamp loads

SMG 2 S KNX
- Base module MIX
- Can be upgraded to maximum of 6 channels

SME 2 S KNX

DALI-Gateway KNX plus

Description

- Single-master application controller as interface between the DALI system and the KNX bus
- DALI-2 certified
- Control of 64 DALI devices in 16 groups or single control
- Control of light colour and colour temperature according to EN 62386-209 (DT-8) in groups
- Scene module for 16 scenes (including DT8 colour control)
- Time-dependent control of brightness, light colour and colour temperature
- Scene module for 16 scenes (including colour control DT8)
- Effect module for sequence control
- Support of single-battery emergency luminaires and emergency luminaire systems with central battery (EN 62386-202, DT-1)
- LC display (2x 12 characters) for menu guidance during commissioning and parameter setting
- Commissioning via the operating elements on the device, via the integrated web server or via the free ETS app (DCA)

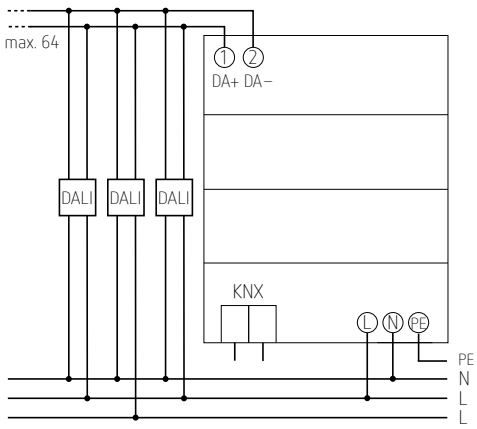
Product selection

Type	Article number
DALI-Gateway KNX plus	9070929

Technical data

	DALI-Gateway KNX plus
Operating voltag	110–240 V AC/DC
Frequency	50–60 Hz
Width	4 modules
DALI-Spannung	typ. 16 V DC, short-circuit proof, basic insulation (no SELV), Imax = 250 mA, Imin = 60 mA
Number of DALI devices	max. 64 per channel
Ambient temperature	–5 °C ... +45 °C
Type of protection	IP 20
Protection class	I

Connection diagrams



Description

- Multi-Master Application Controller as interface between the DALI system and the KNX bus
- DALI-2 certified
- Secure commissioning and communication through support of KNX Data Secure
- Integration of 8 DALI-2 sensors (motion/presence and brightness) according to EN 62386-303 and -304
- Control of 64 DALI devices in 16 groups or individual control
- Control of light colour and colour temperature according to EN 62386-209 (DT-8) in groups or individually
- Automatic adaptation of colour temperature to dimming value
- Scene module for 16 scenes (including DT8 colour control)
- Time-dependent control of brightness, light colour and colour temperature
- Scene module for 16 scenes (including colour control DT8)
- Effect module for sequence control
- Support of single-battery emergency luminaires and emergency luminaire systems with central battery (EN 62386-202, DT-1)
- LC display (2x 12 characters) for menu guidance during commissioning and parameter setting
- Commissioning via the operating elements on the device, via the integrated web server or via the free ETS app (DCA)

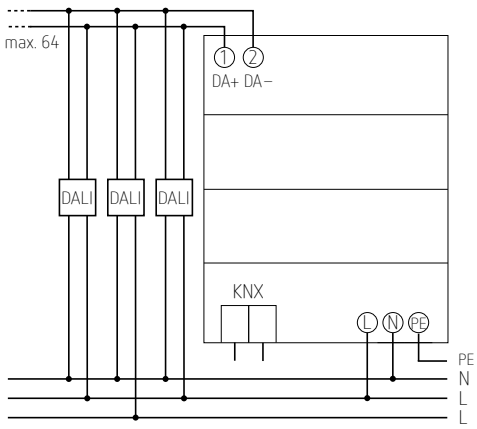
DALI-Gateway P64 KNX	4940303

Technical data

	DALI-Gateway P64 KNX
Operating voltag	110–240 V AC/DC
Frequency	50–60 Hz
Width	4 modules
DALI-Spannung	typ. 16 V DC, short-circuit proof, basic insulation (no SELV), Imax = 250 mA, Imin = 60 mA
Number of DALI devices	max. 64 per channel
Ambient temperature	–5 °C ... +45 °C
Type of protection	IP 20
Protection class	I

Connection diagrams



DALI-Gateway S64 KNX

DALI-Gateway S128 KNX

Description

Common functions

- The KNX-DALI gateway serves as an interface between the DALI system and the KNX bus
- DALI-2 certified
- A maximum of 64 DALI devices can be connected to one DALI output
- Control in 16 groups
- Coloured light control with Device Type 8 (DT8) for 16 groups: colour temperature, XY, RGB, HSV, RGBW
- Time-dependent colour control (also for Human Centric Lighting applications
- Scene module for 16 scenes (including colour setting DT8)
- Effect module for sequence control (including colour setting DT8): colour temperature, XY, RGB, HSV, RGBW
- Energy saving by switching off the ECG power supply in the groups (communication object)
- Simple replacement of ECGs in the event of a fault
- Commissioning via the free ETS app (DCA)

DALI-Gateway S64 KNX

- 1 channel for 64 DALI-lights

DALI-Gateway S128 KNX

- 2 channels for 2x64 DALI-lights

Product selection

Technical data

DALI-Gateway S64/S128 KNX			
Operating voltage KNX	Bus voltage, < 10 mA	Ambient temperature	-5 °C ... +45 °C
Operating voltage	100–240 V AC/DC	Protection class	I
Frequency	50–60 Hz	Type of protection	IP 20
Width	4 modules		

Description

- 4-wax DALI actuator
- DALI-2 certified
- Interface between the DALI system and the KNX bus
- 4 channels, broadcast communication
- Control of up to 30 DALI devices per channel
- Control of light colour and colour temperature according to EN 62386-209 (DT-8)
- Simple commissioning and maintenance thanks to broadcast communication
- Simple replacement of ECGs in the event of a fault
- Simple commissioning and programming in the ETS, without additional tools or ETS app
- Secure communication through KNX Data Secure

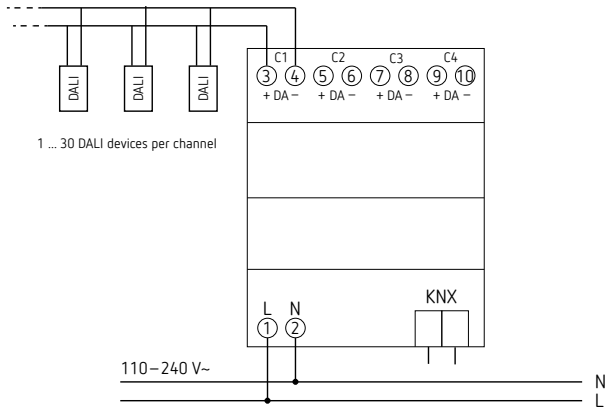
Anschlussbeispiel



Description

Common functions
- 1-way flush-mounted actuator
- Secure communication via with support of „KNX Data Secure"
- Easy installation due to the compact housing
- 2 binary inputs for floating contacts such as buttons, switches, window contacts, temperature sensor (I2)
- Integrated temperature monitoring for increased operating safety, e.g. in the event of overload
- The binary inputs are assigned to the output as standard (function test before programming)

SU 1 KNX
- 1-way flush-mounted switching actuator
- 1x NO contact & 1x NC contact with common control
- Adjustable features: NC/NO contact, switching, delayed switching, pulse function

JU 1 KNX
- 1-way flush-mounted blind/switching actuator
- For controlling drives for blinds, roller blinds, sun and vision protection devices, skylights, and ventilation flaps
- Integrated automatic ventilation function
- Flexible configuration options: blind actuator or 2-channel switch actuator

DU 1 KNX
- 1-way flush-mounted dimming actuator
- Optimised dimming output for dimmable energy-saving lamps, LEDs, incandescent and halogen lamps, and dimmable transformers
- Easy to adapt to different lamps thanks to automatic load detection
- Adjustable dimming curve for precise and flicker-free dimming

HU 1 KNX
- 1-way flush-mounted heating actuator
- Noiseless control of thermal actuators 230 V AC
- Function selection as a heating actuator (continuous or switching) or as a heating controller (integrated temperature controller heating / cooling)
- Valve protection function and summer function

Description

Common functions
- Flush-mounted 1-way actuator, KNX TP, Data Secure
- Secure communication via KNX-RF with support from KNX Data Secure
- Easy installation due to the compact housing
- 2 binary inputs for floating contacts such as buttons, switches, temperature sensor (I2)
- Integrated temperature monitoring for increased operating safety, e.g. in the event of overload
- The binary inputs are assigned to the output as standard (function test before programming)

SU 1 S RF KNX
- Flush-mounted 1-way switching actuator 10 A 130 µF, KNX TP, Data Secure
- Adjustable features: NC/NO contact, switching, delayed switching, pulse function

DU 1 S RF KNX
- Flush-mounted 1-way dimming actuator 250 W, KNX TP, Data Secure
- Optimised dimming output for dimmable energy-saving lamps, LEDs, incandescent and halogen lamps, and dimmable transformers.
- Easy to adapt to different lamps thanks to automatic load detection
- Adjustable dimming curve for precise and flicker-free dimming

JU 1 S RF KNX
- Flush-mounted 1-way blind actuator 5 A, KNX TP, Data Secure
- For controlling drives for blinds, roller blinds, sun and vision protection devices, skylights, and ventilation flaps
- Integrated automatic ventilation function

HU 1 S RF KNX
- Flush-mounted 1-way heating actuator, KNX TP, Data Secure
- Silent control of 230 V AC thermal actuators
- Integrated heating/cooling temperature controller
- Valve protection function

Description

TU 4 S RF KNX

- 4-way flush-mounted wireless push-button interface
- Secure communication via with support of „KNX Data Secure"
- 4 binary inputs for potential-free buttons and signaling contacts
- 1 additional input for temperature sensor
- Free assignment of the functions switching, dimming, blinds, temperature measurement and transmission
- Easy installation due to the compact housing
- Can be used with 4-way push-button module (9070806)

Media coupler TP-RF KNX

- Connects KNX RF devices of a radio line with the twisted-pair bus
- Power supply via KNX bus voltage
- Supports long frames for „KNX Secure" and enables faster download of large applications in parallel
- Ranges of max. 30 m within the building are possible
- Has a repeater function, i.e. received telegrams are sent again to increase the range

Description

Common functions

- Binary input
- LED switching status display for each channel
- Manual operation on device (even without bus connection)
- Manual operation per channel for simulating the input states
- All inputs can be operated with different voltages and at different potentials
- Connectable cable length up to 100 m
- Free allocation of functions: switch / push button, dimming, blinds / roller blinds, counter, repeat telegram, sequences

BMG 6 T KNX

- 6-way binary input MIX2
- Base module MIX2
- Can be upgraded to maximum of 18 channels
- 6 floating universal and wide-range voltage inputs (10 – 240 V AC / DC or internally generated auxiliary voltage of approx. 12 V DC)
- 2 additional channels operable by buttons on the device, but without input
- Up to two extension modules MIX or MIX2 can be connected to one base module
- Device and KNX bus module can be swapped independently of each other
- Removable KNX bus module enables devices to be changed without reprogramming
- Manual set-up and use of actuator is possible without KNX bus module

BME 6 T KNX

- 6-way binary input MIX2
- Extension module MIX2
- For upgrading to maximum of 18 channels

BM 6 T KNX

- 6-way binary input FIX1
- 6 floating universal and wide-range voltage inputs (10 – 240 V AC / DC or internally generated auxiliary voltage of approx. 12 V DC)
- 2 additional channels operable by buttons on the device, but without input

BM 12 T KNX

- 12-way binary input FIX2
- 12 floating universal and wide-range voltage inputs (10 – 240 V AC / DC or internally generated auxiliary voltage of approx. 12 V DC)
- 4 additional channels operable by buttons on the device, but without input

TA 4 S KNX | TA 6 S KNX | TA 8 S KNX

Description

Common functions
- Binary input/binary output sensor interfaces
- Can be installed in flush-mounted sockets with conventional sensors/switches
- Flexible LED controlling, thanks to increased output current of 3 mA commercially available LEDs and low curent LEDs can be controlled
- Inputs can be reconfigured to outputs with parameterizable flashing and pulsing function
- Colour coding of wiring pairs

TA 2 S KNX
- 2-way key interface
- 2 binary inputs for floating contacts such as buttons, switches
- 4-pole cable connection
- Free allocation of functions: Switch/key, dimming, blinds, valuator, sequences, controlling LED

TA 4 S KNX
- 4-way key interface
- 4 binary inputs for floating contacts such as buttons, switches
- 6-pole cable connection
- Free allocation of functions: Switch/key, dimming, blinds, valuator, sequences, measuring temperature, controlling LED
- 2 NTC inputs for detection of the actual temperature

TA 6 S KNX

As TA 4 S KNX, but:
- 6-way key interface
- 6 binary inputs for floating contacts such as buttons, switches
- 8-pole cable connection
- Can be used with 4-way push-button module (9070806)

TA 8 S KNX

As TA 4 S KNX, but:
- 8-way key interface
- 8 binary inputs for floating contacts such as buttons, switches
- 10-pole cable connection

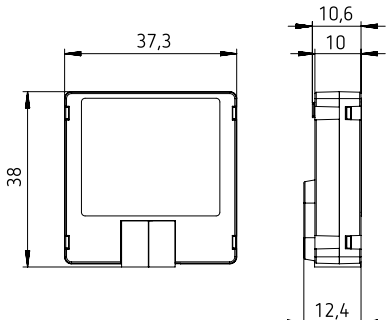
Scale drawings



Description

- Optical presence detector for ceiling installation
- Rectangular detection area 360°, 7,5 x 11,5 m (79 m²) at 3 m installation height, with up to 6 flexible detection zones
- For KNX bus-system, 6 channels light and 6 channels presence for HVAC control
- KNX Data Secure
- Restriction of the detection area via app (thePixa Plug)
- Automatic presence and brightness-dependent control for lighting and HVAC
- Each detection zone has its own light measurement
- Adjustment of brightness measurements via thePixa Plug app
- Configurable sensitivity of sensor
- Distinction between motion and presence
- Parallel switching of multiple presence detectors (Master/Slave or Master/Master)
- Test mode for checking function and detection area via app (thePixa Plug)
- Output of occupancy rate and occupancy density via telegram
- Integrated temperature sensor
- Ceiling installation in flush-mounting box (2-point fixing)
- Surface mounting on ceilings possible with surface frame (option)
- thePixa Plug app for settings and evaluations (iOS/Android)
- KNX firmware update possible (ETS app)
- Sensor firmware update possible (thePixa Plug app)
- 6 channels light, Z1 light – Z6 light: Switching or constant lighting control with 6 independent control systems and standby function (orientation light)
- Switching mode with dimmable lighting
- Free switch object with configuration type switching
- Fully or semi-automatic device
- Brightness switching value configurable in lux by using parameters
- Brightness switching value configurable in lux by using parameters and telegram
- Light time delay configurable by using parameters
- Aura effect for better orientation and greater safety
- Manual override by telegram
- 6 channels HKL, Z1 HKL – Z6 HKL: Configurable switch-on delay and time delay
- Sending of operating mode
- Separate block telegram
- 6 channels room occupancy, Z1 room occupancy – Z6 room occupancy: Output of number of persons
- Control of a fan with up to 3 stages
- 3 configurable thresholds (threshold switch)

Description

Common functions

- KNX Passive infrared presence detector for ceiling mounting
- Square detection range of 360° for safe and easy planning
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL) and halogen/incandescent lamps
- Can be used as fully or semi-automatic, switchable
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Brightness switching value or set point value can be set in lux using parameters, on the device itself or via remote control
- Teaching in of the brightness switching value or the set point value
- Room correction factor setting for brightness measurement calibration
- Light time delay can be set using parameters, on the device itself or via remote control
- Switch on delay and time delay for presence can be set
- Detection sensitivity can be set
- Self-learning time delay
- Reduced time delay in the event of a shorter stay in the room (short presence)
- Scenario functions
- Extremely easy setting of energy saving characteristics with the new „eco plus" function
- Test mode for checking function and detection range
- Parallel switching of several detectors in Master/Slave or Master/Master possible
- User remote control and management-remote control (optional)
- Room monitoring

thePrema P360 KNX UP

- 3 channels light and 2 channels presence
- 2 channels light C1, C2 with 2 light measurements and additional lighting channel C3 without brightness factor
- 2 presence channels can be set individually
- Adaptable 3 channels light measurement

thePrema S360 KNX UP

- 2 channels light and 2 channels presence
- 2 channels light C1, C2 with 1 light measure-ment
- 2 presence channels can be set individually with parallel offset
- Adaptable 1 channel light measurement

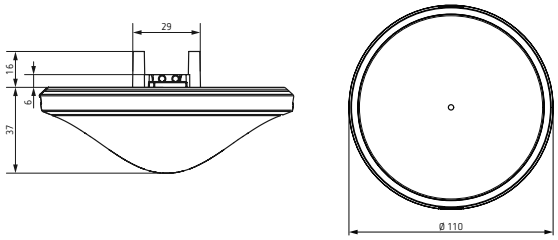
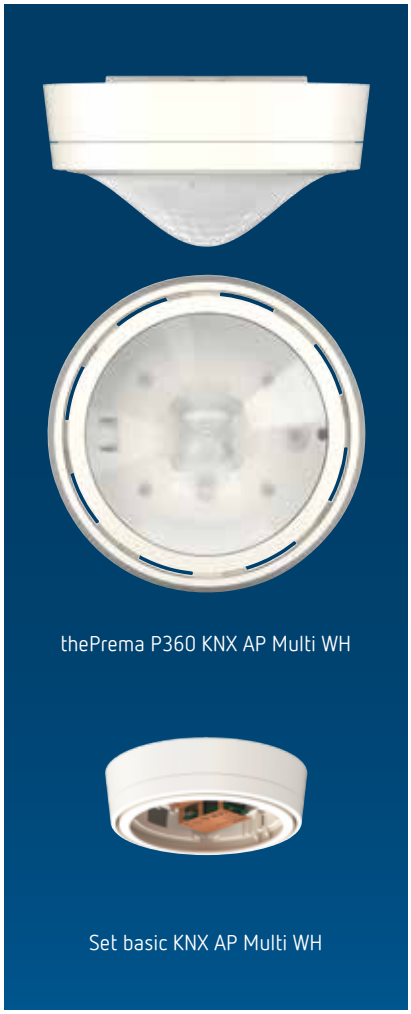
thePrema P360 KNX



thePrema S360 KNX



thePrema P360 KNX AP Multi WH

Set basic KNX AP Multi WH

Description

- KNX multisensor
- Consisting of KNX passive infrared presence detector and room air sensor (= 2 bus sharing units)

Room air sensor functions

- Measures CO_2 concentration, relative humidity, temperature and air pressure
- Three independent, configurable thresholds for CO_2 concentration and relative humidity
- Integrated room thermostat
- 4 binary inputs

Presence detector functions

- Automatic presence and brightness-dependent control for lighting and HVAC
- Square detection area 360°, up to 10 x 10 m (100 m^2), for reliable and easy planning
- 2 light channels C1, C2 with 2 light measurements and additional lighting channel C3 without influence of brightness
- 2 presence channels C4, C5 can be programmed individually
- Adaptable 3-channel light measurement
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL), halogen and incandescent lamps
- Operation as fully or semi-automatic device, switchable
- Switching operation or constant light control with standby function (orientation light)
- Lighting dimmable in switching mode with standby function
- Brightness switching value or set point value configurable in lux using parameters, object or remote control
- Teach-in of the brightness switching value or set point value
- Setting of the room correction factor for brightness measurement calibration
- Light time delay configurable using parameters, object or remote control
- Configurable switch-on delay and presence time delay
- Configurable detection sensitivity
- Self-learning time delay
- Reduced time delay in the event of short presence
- Room monitoring function with reduced sensitivity only for detection of walking persons
- Scene functionality
- Extremely simple adjustment of energy saving behaviour with "eco plus" function
- Test mode for checking function and detection area
- Parallel switching of multiple presence detectors (master/slave or master/master)
- Room monitoring
- Remote operation with the following remote controls:
  - theSenda B app remote control
  - theSenda P service remote control
  - theSenda S user remote control

Set basic KNX AP Multi WH

Description

- Passive infrared presence detector for ceiling installation
- Flat design, cover frame in white included in delivery
- Square detection area 360° (up to 64 m²) for reliable and easy planning
- Automatic presence- and brightness-dependent control for lighting and HVAC
- Two differently sized detection zones for greater flexibility. Adjustable via parameters or remote control.
- Manual alignment of the detection area (swivel mechanism)
- Mixed light measurement suitable for fluorescent lamps (FL/PL/ESL), halogen/incandescent lamps and LEDs
- 3 directed light measurements
- 2 light channels C1, C2 with 2 light measurements and additional lighting channel C3 without brightness factor
- Switched or constant light control with 2 independent control systems and standby function (orientation light)
- Switching mode with dimmable lighting
- Fully or semi-automatic
- Brightness switching value or set point value can be set in lux by using parameters, the object or via remote control
- Teach-in of the brightness switching value or the set point value
- Light time delay configurable
- Self-learning time delay can be set using parameters, object or via remote control
- Reduction of time delay when present briefly (short-term presence)
- Manual override by telegram or remote control
- 2 presence channels C4, C5, individually configurable
- Switch-on delay and time delay configurable
- Room monitoring with selective movement detection
- Setting the room correction factor for brightness measurement comparison
- Configurable sensitivity
- Extremely simple setting of the energy-saving ratio with the new «eco plus» function
- Test mode for checking function and detection area
- Scenarios
- Parallel switching of multiple presence detectors (Master/Slave or Master/Master)
- Installation in false ceilings with springs
- Surface mounting on ceilings possible with surface frame (optional)
- User remote control «theSenda S» (optional)
- Management remote control «theSenda B» (optional)
- Installation remote control «theSenda P» (optional)

theRonda P360 KNX UP WH

Description

- KNX Passive infrared presence detector for ceiling mounting
- Round detection area 360°, up to Ø 24 m (452 m²)
- 2 channels light and 2 channels presence
- 2 channels light C1, C2 with 1 light measurement
- 2 presence channels can be parametrized individually
- Adaptable 1 channel light measurement
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL) and halogen/incandescent lamps
- Can be used as fully or semi-automatic, switchable
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Brightness switching value or set point value can be set in lux using parameters, on the device itself or via remote control
- Teaching in of the brightness switching value or the set point value
- Room correction factor setting for brightness measurement calibration
- Light time delay can be set using parameters, on the device itself or via remote control
- Switch on delay and time delay for presence can be set
- Detection sensitivity can be set
- Reduced time delay in the event of a shorter stay in the room (short presence)
- Scenario functions
- Test mode for checking function and detection range
- Sensitivity adjustable
- Detection area can be limited using cover clip
- Manual override using telegram or remote control
- Parallel switching of several detectors in Master/Slave or Master/Master possible
- Ceiling installation in flush-mounted socket
- Ceiling installation also possible with surface-mounted frame
- User remote control and management-remote control (optional)

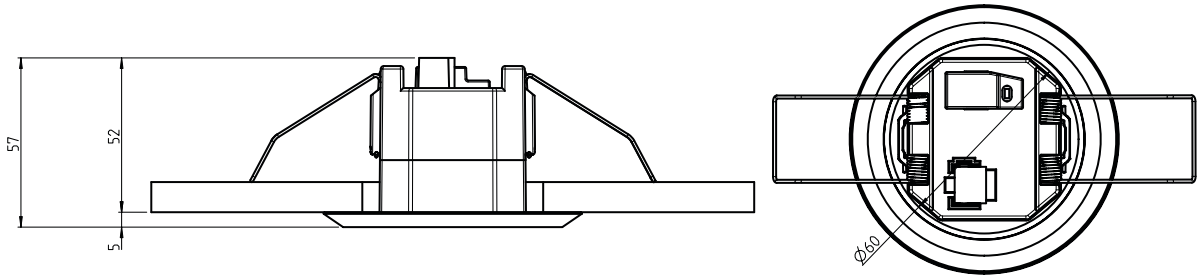
theRonda S360 KNX AP



theRonda S360 KNX FLAT DE

thePassa P360 KNX UP WH

Description

- KNX Passive infrared presence detector for ceiling mounting
- Square detection area for corridors and storage areas
- Detection area with 2 individually connectable and disconnectable detection zones, each 15 x 5 m (total 30 x 5 m)
- 2 channel light and 2 channel presence
- 2 channel light C1, C2 with 2 light measurements
- 2 presence channels can be parametrized individually
- Adaptable 2 channel light measurement
- Function aura effect, switches on the lighting group when there is a person in its detection area and dims the adjacent lighting groups
- Function chaser light, recognises the direction of movement of the people in the room and „predictively" switches on the adjacent lighting group
- Function walking direction recognition
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL) and halogen/incandescent lamps
- Can be used as fully or semi-automatic, switchable
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Brightness switching value or set point value can be set in lux using parameters, on the device itself or via remote control
- Teaching in of the brightness switching value or the set point value
- Room correction factor setting for brightness measurement calibration
- Light time delay can be set using parameters, on the device itself or via remote control
- Switch on delay and time delay for presence can be set
- Detection sensitivity can be set
- Reduced time delay in the event of a shorter stay in the room (short presence)
- Scenario functions
- Test mode for checking function and detection range
- Sensitivity adjustable
- Detection area can be limited using cover clip
- Manual override using telegram or remote control
- Parallel switching of several detectors in Master/Slave or Master/Master possible
- Ceiling installation in flush-mounted socket
- Ceiling installation also possible with surface-mounted frame
- User remote control and management-remote control (optional)

PresenceLight 360B-KNX

Description

- Presence detector (PIR)
- Automatic control of lighting depending on presence and brightness
- Square detection area allows accurate and simple planning
- IP 54 for versatile use
- 2 channels light for controlling one or two lighting groups
- Mixed light measurement, suitable for fluorescent lamps (FL/PL/ESL), halogen/incandescent lamps and LEDs
- Switching or constant light control with stand-by function
- Adjustable sensitivity
- Choice of fully or semi automatic operation: In „Semi-automatic" mode the light must be switched on manually and switches off automatically
- Short presence; Reduced switch-off delay time in case of a short presence
- Self-learning time delay
- Channel presence with switch-off delay and switch-on delay time and send values
- Function „monitoring" with reduced sensitivity only to detect walking persons
- Channel brightness (Lux)
- Set brightness level via bus object
- Scene functionality (8-bit scenes)
- Selected parameters can be configured remotely using the theSenda B remote control. Parameter settings are made via ETS
- Optional user remote control
- Ready for use by ex-factory set items
- Test operation to check detection area and installation
- Parallel switching of several presence detectors (master-slave or master-master) possible
- Ceiling mounting in flush-mounted box
- Possibility of surface mounting by using a surface frame

theMura KNX UP WH

Description

- Passive infrared presence / motion detector for wall mounting flush-mounted
- Rectangular detection area 170°, 14 x 17 m (238 m²) at 1.2 m mounting height
- For KNX bus system
- KNX Data-Secure
- Operation as fully or semi-automatic possible
- Integrated, freely parameterisable push-button (can be deactivated)
- Manual override via external KNX push-button possible
- One directional brightness measurement (mixed light measurement)
- Teach-in function
- Locking functions
- HVAC channel without brightness influence
- Switch-on delay and follow-up time of HVAC channel adjustable
- Extension of the detection range by master / slave or master / master switching
- Detection sensitivity adjustable
- Test mode for checking function and detection range
- Settings via ETS software (full range of functions)
- With Theben cover frame

theMura S180 KNX UP WH

- Motion detector
- 1 channel light and 1 channel presence for HVAC control
- 3 logic channels (AND, OR, XOR)

theMura P180 KNX UP WH

- Presence detector
- 2 channels light and 2 channels HVAC
- Switching or constant light control with stand-by functionality (orientation light)
- Dimmable lighting in switching mode with and without daylight influence
- Simple adjustment of brightness measurement
- Short-time presence
- Selectable control speed
- Aura function
- Scene functionality
- Integrated orientation light (white)
- Integrated temperature sensor
- Acoustic function
- 2 binary inputs
- 6 logic channels (AND, OR, XOR)
- Limited setting options with app / universal remote control theSenda B
- Limited setting possibilities with service remote control theSenda P

Product selection

Product type	Type	Article number
Motion detector	theMura S180 KNX UP WH	2069650
Presence detector	theMura P180 KNX UP WH	2069655

Technical data

	theMura S180 / P180 KNX UP WH
Operating voltage KNX	Bus voltage, < 10 mA
Mounting height	0,8 – 1,2 m
Brightness setting range	5 – 3000 lx
Light switch-off delay	30 s – 60 min
Presence switch-off delay	10 s – 120 min
Switch-on delay presence	10 s – 30 min / inactive
Size of concealed housing	Size 1
Ambient temperature	– 15 °C ... +45 °C
Protection rating	IP 20

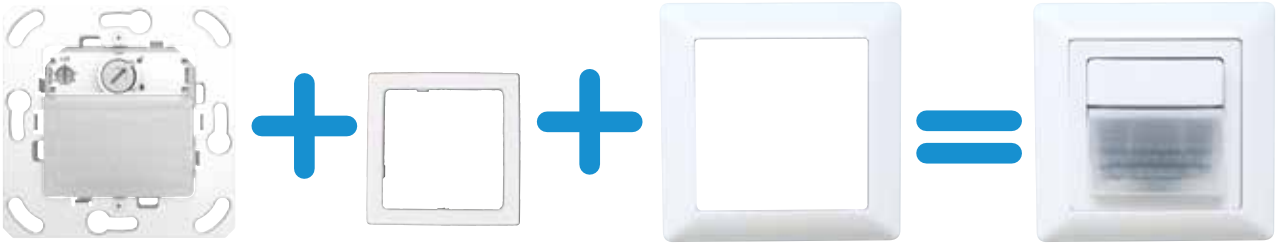
Application examples



Description

- Motion detector (PIR)
- Automatic lighting control based on presence and brightness
- For integration into KNX building systems
- For outdoor use
- For installation on walls and ceilings
- Integrated temperature sensor
- For larger, commercial outdoor applications such as offices, public buildings, hotels, schools, car parks and warehouses
- Easy to program with KNX ETS software
- Adjustable brightness switching value and switch-off delay
- Sensitivity can be reduced
- Area limit via lens attachment
- Mixed light measurement
- Teach-in of current brightness value possible
- Pulse function
- Test function for checking detection area
- Installation on flush-mounted socket possible (60 mm)
- Single-handed plug-in installation
- Instant start-up possible via factory preset
- Controls are place protected
- Spacer and corner angle included

IPsecure Router KNX

IPsecure Interface KNX

Description

IPsecure Interface KNX

- Interface IP and KNX
- For data exchange between KNX and IP networks
- Support of KNX IP Secure
- Meets the requirements of the KNXnet / IP standard
- Tunneling: Up to 5 Tunneling Server
- Firmware update possible (Theben IP Tool Software)
- Power supply: 12 – 30 V DC / PoE - IEEE 802.3af class 1

IPsecure Router KNX

- Router / interface / line coupler IP and KNX
- For data exchange between KNX and IP networks
- Support of KNX IP Secure
- Meets the requirements of the KNXnet / IP standard
- Complete filter table for all main groups (0... 31)
- Display of power failures on the bus (KNX IP Service)
- Unicast: Up to 10 devices can communicate via unicast
- Tunneling: 5 tunneling servers available (visualization, app ...)
- Firmware update possible (Theben IP Tool Software)
- Power supply: 12 – 30 V DC / PoE - IEEE 802.3af class 1

Product selection

Type	Article number
IPsecure Interface KNX	9070771
IPsecure Router KNX	9070770

Technical data

	IPsecure Interface KNX	IPsecure Router KNX
Operating voltage KNX	Bus voltage, ≤10 mA	
Operating voltage	12 – 30 V DC	
Width	2 modules	
Ambient temperature	-5 °C ... +45 °C	
Protection class	II according to EN 60 730-1	
Type of protection	IP 20	

Interface USB KNX

Line coupler S KNX

Description

Interface USB KNX

- For communication between the PC and the KNX system to be programmed
- Fast download of applications by supporting long frames (from ETS 5)
- Support of KNX Data Secure communication

Line coupler S KNX

- For the connection of KNX lines or areas
- Galvanic separation of the lines / areas
- Long frame support (from ETS 5)
- Support of KNX Data Secure communication
- Telegrams can be forwarded, filtered or blocked
- Can also be used as a line amplifier (repeater)

Product selection

Type	Article number
Interface USB KNX	9070397
Line coupler S KNX	9070880

Technical data

	Interface USB KNX	Line coupler S KNX
Operating voltage KNX	Bus voltage, ≤10 mA	
Operating voltage	–	24 V DC
Width	2 modules	
Ambient temperature	-5 °C ... +45 °C	
Protection class	II according to EN 60 730-1	III
Type of protection	IP 20	

Power supply KNX

US 1 KNX

Description

Common functions power supply
- 30 V DC auxiliary supply
- Power-supplying and monitoring of the KNX system voltage
- Reset key for 20 sec. bus reset
- Continuous short-circuit protection

PS 160 mA T KNX
- 160 mA supply voltage

PS 320 mA T KNX
- 320 mA supply voltage

PS 640 mA T KNX
- 640 mA supply voltage

PS 1280 mA T KNX
- 1280 mA supply voltage

US 1 KNX
- Surge arrester for KNX and LUXORliving devices
- In the form of a KNX bus module
- Can be used as a fine surge arrester in KNX or LUXORliving installations

Product selection

VARIA 826 S KNX

Description

- Multi-functional display with room thermostat
- Glass front in white
- Freely configurable for displaying and controlling functions e.g. light settings, sun protection systems
- Backlit display and integrated time switch
- For control and regulation of heating, fan coils, air conditioning systems
- Up to 7 different display pages
- Automatic summer/winter time adjustment with power reserve
- Controls up to 8 rooms via own temperature profiles
- Weekly time switch with 8 channels with up to 3 different statuses, e.g. for light, shutters, fans etc.
- 3 heating programs
- Alternative continuous or on/off control
- Operation modes: comfort, stand-by, temperature reduction at night, frost protection
- Weather data from Theben weather stations can be displayed
- Free choice of programming via the ETS without plug-in
- Installation in flush-mounted socket

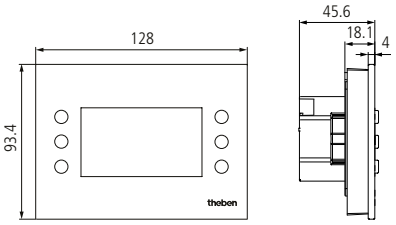
Product selection

Colour	Type	Article number
Glass front in white	VARIA 826 S WH KNX	8269210

Technical data

	VARIA 826 S WH KNX
Operating voltage KNX	Bus voltage, ≤ 15 mA, (< 25 mA without power supply)
Operating voltage	230 V AC
Frequency	50 Hz
Stand-by consumption	0,4 W
Power reserve	1,5 years
Display	Display with 132 x 72 points (8 lines with various functions) e.g. title, switching, dimming, blinds/shutters, % value, HVAC, counter value, temperature, 2-byte value, 8/16 bit counter value etc.
Ambient temperature	0 °C ... +45 °C
Type of protection	IP 20
Protection class	II according to EN 60 730-1

Scale drawings



KNX-OT-Box S

Description

- The KNT-OT-Box S serves as an interface between the boilers with OpenTherm (bus system in heating and ventilation technology) and the KNX system (building system technology)
- This enables the bidirectional exchange of data between the OpenTherm boiler and the heat distribution via the KNX system (individual room control)
- In combination with the OT-Box (9070712) from the RAMSES 856 top2 OT (8569132) also heating systems without OpenTherm interface can be controlled
- Device and KNX bus module can be swapped independently of each other
- Removable KNX bus module
- Button for OT-test-program
- The following functions are available with the KNT- OT-box:
- Customised flow control
- Weather-compensation flow control
- Control of domestic hot water
- Energy optimization of domestic hot water with solar support
- Legionella protection program
- Screed drying program

RAMSES 718 P KNX

Description

- Individual room thermostat
- For controlling heating actuators or motorised actuators
- Can be used as a continuous or two point control (can also be combined).
- Continuous PI control can be configured for 2 stage heating (basic and additional stage, e. g. underfloor heating and radiators) or for heating and cooling (radiators and cooling surfaces)
- Two front panels are included in delivery: a numerical scale and a relative scale
- Rotary control can be limited via parameters
- Manual override button for presence or operation modes: comfort, stand-by, temperature reduction at night, frost protection
- 4 binary inputs for conventional switches/sensors (switching, dimming, blinds), also for externeal temperature sensor, window contact or presence signal
- Temperature sensor can be connected to give remote temperature reading
- LED (red) for heating mode, (blue) for cooling mode, LEDs for operation mode

RAMSES 718 S KNX

Description

Common functions
- DIN-rail heating actuator, TP
- For controlling thermal actuators 24 V–240 V AC
- Maximum 5 actuators 230 V AC or 3 actuators 24 V AC per channel
- Short-circuit-proof and overcharge protected
- Continuous or switching actuating value selectable
- Valve protection function can be deactivated
- With the modes: comfort, standby, night as well as frost/heating protection
- Changeover to summer mode possible
- LED switching status display for each channel
- Manual operation on device (even without bus connection)

HMG 6 T KNX
- DIN-rail 6-way heating actuator, MIX2 base module, KNX TP, Data Secure
- Secure communication via with support of „KNX Data Secure"
- With 6 temperature controllers (P/PI)
- Can be upgraded to maximum of 18 channels
- Up to two extension modules MIX or MIX2 can be connected to one base module
- Device and KNX bus module can be swapped independently of each other
- Removable KNX bus module enables devices to be changed without reprogramming
- Manual set-up and use of actuator is possible without KNX bus module

HME 6 T KNX
- DIN-rail 6-way heating actuator, MIX2 extension module, KNX TP, Data Secure
- With 6 temperature controllers (P/PI)
- For upgrading to maximum of 18 channels

HM 6 T KNX
- DIN-rail 6-way heating actuator, TP
- With 6 temperature controllers (P/PI)

HM 12 T KNX
- DIN-rail 12-way heating actuator, TP
- With 12 temperature controllers (P/PI)

HMT 6 S KNX

Description

- Heating actuator for controlling thermal actuators, switching 24 V DC or permanently 0–10 V DC
- Integration of up to 2 heating circuit pumps
- Flow temperature adjustment to meet requirements: Automatic calculation of the maximum actuating value for energy-efficient adjustment of the actuating value to actual requirements
- No KNX room thermostat needed: Flexible use of each channel as a heating actuator or heating controller
- Can be installed directly on a rail in the heating circuit distributor
- Screwless terminal technology
- Integrated power supply for a maximum of 12 thermal actuators
- Silent semiconductor switch (triac)
- For integrating boiler control
- Continuous or switching actuating value selectable

Beschreibung

- Motorised KNX actuator for heating and cooling valves
- Integrated temperature sensor
- Integrated controller for efficient heating and cooling with one additional stage each
- High actuating force of up to 220 N with a maximum valve stroke of 8 mm
- 2 universal binary inputs, connection option e.g. for external temperature sensor, window contact, presence detector or push-button
- Integrated logic for up to 10 window contacts
- Can be used in the heating circuit distributor
- Integrated bus coupling unit
- Automatic valve adaptation
- Universally applicable due to large
- range of valve adapters
- 2 different valve adapters for the most common valves M30x1.5 and Danfoss included (VA 10, VA 100)
- Secure commissioning and communication through support of KNX Data Secure

AMUN 716 S KNX

Description

- CO_2 airquality sensor with integrated individual room thermostat
- Measures CO_2 level, relative humidity, temperature and barometric air pressure
- Three independent, configurable thresholds for the CO_2 level and relative humidity
- CO_2 setting range of 300-5000 ppm
- Actions can be carried out if thresholds are exceeded or not reached (send, priority, switching, value)
- For controlling heating actuators or motorised actuators
- Two front panels are included in delivery: a numerical and a relative scale
- Manual override button for presence or operation modes: comfort, stand-by, temperature reduction at night, frost protection
- 4 binary inputs for conventional switches/sensors (switching, dimming, blinds), also for externeal temperature sensor, window contact or presence signal
- Display of the current operating mode and heating/cooling mode through multi-colored LED

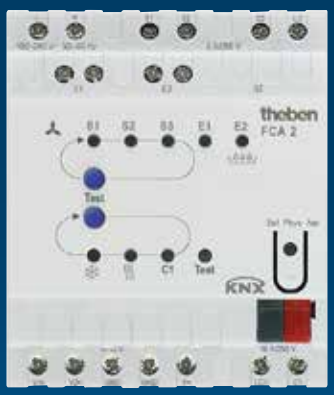
FCA 1 KNX



FCA 2 KNX

Description

Common functions
- Fan coil actuator
- For controlling fan coils
- For 2 and 4 pipe systems
- For up to three fan stages
- Additional relay for electrical heater or cooler bank
- Potential-free input for window contacts or temperature sensor
- Potential-free, condensation monitoring
- Display of operation status via 9 LEDs
- Manual operation on device (fan satges, switching between heating and cooling)
- Adjustment of setpoint value for cooling in relation to external temperature
- Potential-free switching contact for either cooler or heater bank
- With emergency program

FCA 1 KNX
- For 2-way and 3-way valves

FCA 2 KNX
- Optionally with 0-10 V fan control
- For proportional 0-10 V valves

TR 648 top2 RC KNX

TR 648 top2 RC-DCF KNX

Description

Common functions

- Digital time switch with yearly and astronomical time program
- 8 channels
- DuoFix spring terminals for 2 conductors each
- Text-oriented user guidance in display
- 800 memory locations
- Interface for OBELISK top2 memory card (PC programming)
- 8 year power reserve (lithium battery)
- ON-OFF switching times
- Pulse program
- Cycle program
- Extensive yearly clock functions
- Astronomical switching function (automatic calculation of sunrise and sunset times for the whole year)
- Switching preselection
- Permanent switching ON/OFF
- Count-down timer
- Integrated hour counter
- Holiday program
- 2 random programs
- Display backlight (can be turned off)
- PIN coding
- Automatic summer/winter time changeover
- Time and date synchronisation of other bus participants

TR 648 top2 RC KNX

- Time synchronisation via connection of external DCF or GPS antennas, additional posititioning for astronomical program with GPS

TR 648 top2 RC-DCF KNX

- Time synchronisation via connection of external DCF antenna
- Can be operated without mains supply

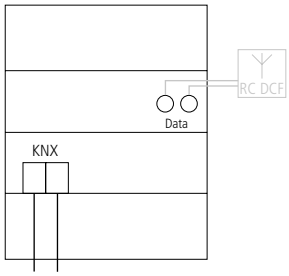
TR 648 top2 RC KNX



TR 648 top2 RC-DCF KNX

Description

Meteodata 140 S KNX

- Self-contained outdoor weather station
- For measuring wind, rain, brightness and temperature
- For fully automatic blinds and sun protection control with automatic adjustment of blinds according to position of the sun
- Rain sensor with integrated heating
- The weather station can also be operated without mains supply. The heating of the rain sensor will not function then
- Measurement and evaluation directly on device
- Sun protection for up to eight facades via 3 integrated brightness sensors
- 8 sun protection channels
- 4 additional threshold channels for connection of external KNX sensors
- 6 logic channels
- Display of weather data e.g. with VARIA 826 KNX multi-function display

Meteodata 140 S GPS KNX

As Meteodata 140 S KNX, but

- Integrated GPS receiver (provides additionally time information)
- Automatic calculation of elevation and azimuth
- The weather station can also be operated without mains supply. The GPS module will not function then

Meteodata 140 basic KNX

As Meteodata 140 S KNX, but:

- Without rain sensor
- No automatic adjustment of blinds according to position of the sun
- 3 sun protection channels

LUNA 134 KNX

Description

- Light level controller
- External light sensor included in delivery
- For brightness-dependent controlling
- 10 channels
- 4 threshold values channels for connecting external KNX-sensors (e.g. temperature)
- 6 logic channels
- Up to 3 lights sensors can be connected
- Manual operation on device
- 4 keys for setting threshold and switch on/off delay
- DuoFix spring terminals
- Display back light (can be turned off)
- Thresholds can be shown or changed on display
- PIN coding

LUNA 131 S KNX

Description

- Brightness and temperature sensor
- For brightness and temperature dependent controlling in outdoor areas
- 5 freely configurable channels: 1 sun protection channel and 4 universal channels
- Sun protection channel with automated sun protection especially for blind, awning and shutter applications
- Universal channels allow linking of brightness and temperature
- Brightness range from 1 - 100,000 lux
- Temperature range -20 °C to + 55 °C
- Learning object for brightness threshold

OSIRIA 230 SR KNX, OSIRIA 240 SR KNX

OSIRIA 241 BR KNX, OSIRIA 241 AR KNX

Description

OSIRIA 220 AR KNX, OSIRIA 230 AR KNX, OSIRIA 240 AR KNX

- KNX indoor clock, round, single-sided
- Black bar hour and minute hands, red second hand
- White metallic dial with black arabic numerals
- Impact-resistant plastic housing
- Matte border
- Flat, shock-resistant Plexiglas
- Diameter dial: 250 mm/300 mm/400 mm

OSIRIA 230 SR KNX, OSIRIA 240 SR KNX

- KNX indoor clock, round, single-sided
- Black bar hour and minute hands, red second hand
- White metallic dial with black fine-line numerals
- Impact-resistant plastic housing
- Matte border
- Flat, shock-resistant Plexiglas
- Diameter dial: 300 mm/400 mm

OSIRIA 241 BR KNX, OSIRIA 241 AR KNX

- KNX indoor clock, round, single-sided
- Silver metallic painted metallic housing (RAL 9006 white-aluminium)
- Black bar hour and minute hands, red second hand
- White metallic dial with black DIN bar numerals or arabic numbers
- Curved, shock-resistant Plexiglas
- Diameter dial: 400 mm

OSIRIA 251 BQ KNX

OSIRIA 232 BQ KNX

Description

OSIRIA 242 AR KNX, OSIRIA 242 SR KNX

- KNX indoor clock, round, double-sided
- With wall or ceiling holder (150 mm)
- White dials
- Black Arabic numerals
- Black bar hour and minute hands, red second hand
- White painted metallic housing
- Shock-resistant plexiglass
- Diameter dial: 400 mm

OSIRIA 251 BQ KNX

- KNX indoor clock, square, single-sided
- Wall clock limited protected against thrown balls e.g. for sports halls, schools, etc.
- White metallic dial with black DIN bar numerals
- Black bar hour and minute hands, red second hand
- Single-faced, robust, white painted metallic housing (RAL 9016) for heavy-duty applications
- Laminated safety glass
- 3-point fastening resistant to being pried out
- Dial: 400 mm x 400 mm

OSIRIA 232 BQ KNX

- KNX indoor clock, square, single-sided, for flush-mounted installation (for OP rooms)
- White metallic dial with black DIN bar numerals
- Black bar hour and minute hands, red second hand
- Stainless steel housing frame flush with tiles or wall V4A for wall installation (flush-mounted)
- Resistant to acids, cleaning agents and disinfectants; in the installed state protected against dust and water in acc. with protection rating IP 54 (DIN 40050)
- 3 mm flat mineral lens
- Dial: 250 x 250 mm

DALI-2 Room Solution
Complete. Open.
As simple as broadcast

DALI

Welcome to the DALI-2 Room Solution from Theben. This complete single-room solution includes all necessary DALI-2 core components, such as presence detectors and sensors, push button interfaces and actuators.

What if you could implement individual, DALI-2 based lighting controls with HCL functionality, RGBW light and time-controlled functions as easily as with broadcast detectors? If DALI-2 components from other manufacturers could also be integrated without any problem? And if programming could be carried out conveniently via app?

#01 Complete

Complete solution consisting of presence detectors, presence sensors, push button interfaces and switch actuators.

#02 Open

Investment security thanks to open DALI-2 system.

#03 Versatile

HCL functionality, RGBW light and time-controlled functions.

#04 Convenient

Start-up and control via DALI-2 RS Plug app. Available for iOS and Android, or Windows Download at www.theben.co.uk/dali2-en

Download iOS version

Download Android version

#05 Intuitive

Simple start-up – individual addressing as easy as broadcast.

Appsolutely convenient
Start-up and control
via DALI-2 RS Plug app

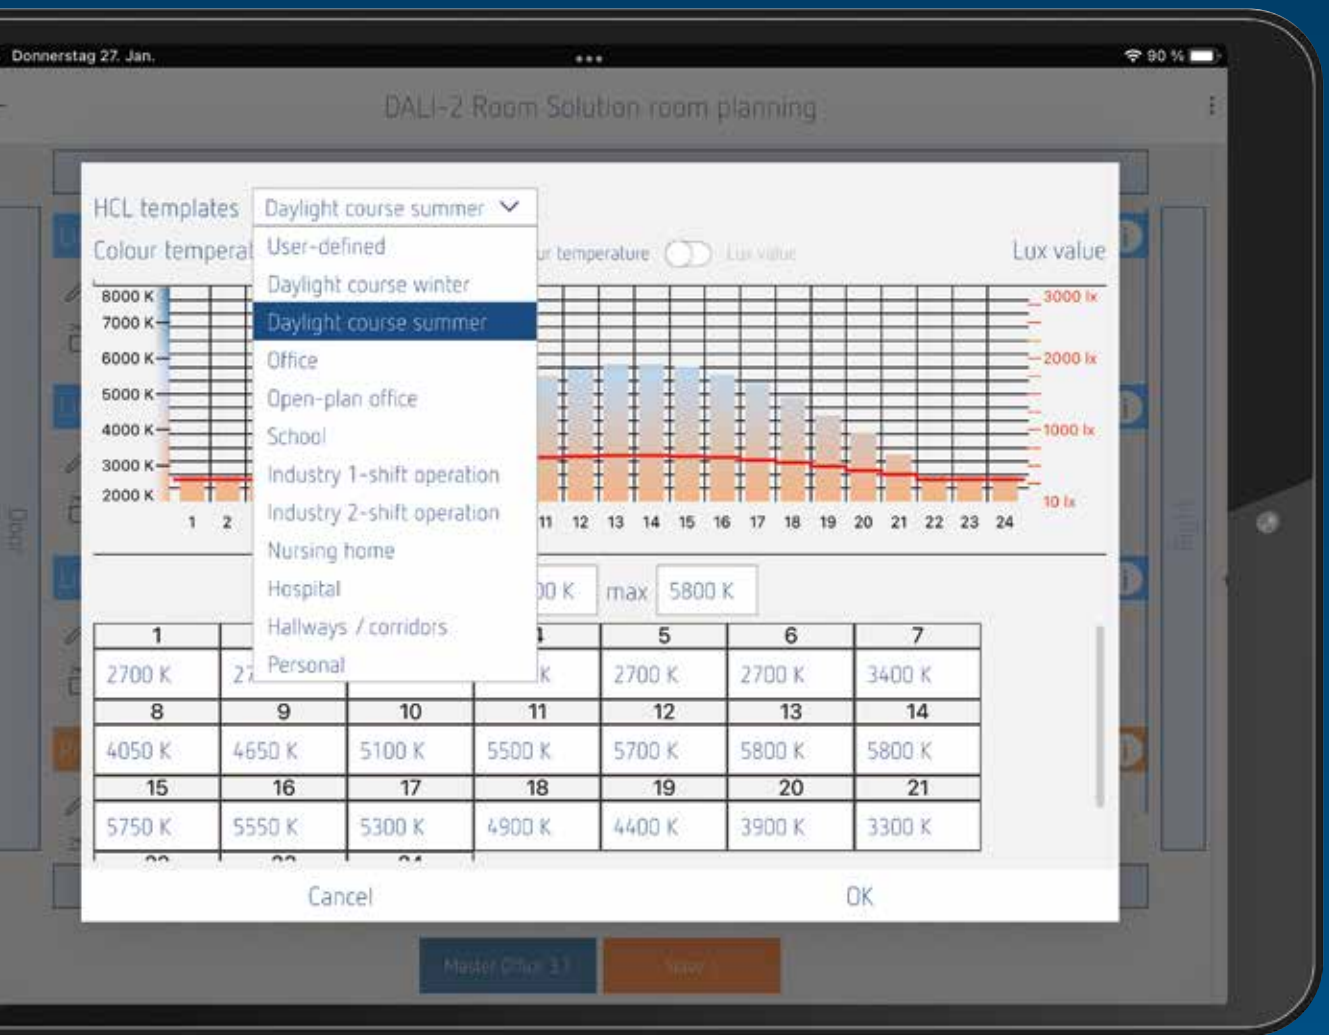
The DALI-2 Room Solution can be comprehensively and intuitively configured and operated using the DALI-2 RS Plug app for iOS, Android and Windows tablets.

Communication between tablet and presence detectors is bidirectional via Bluetooth. This means that all parameters can be quickly and easily read. Furthermore, you can install detector firmware and function updates in a flash, keeping all devices fully up to date. Compared to other systems, start-up of this solution is quick and easy.

Main functions:

- → Intuitive user interface with drag and drop
- → Fast programming thanks to settings that can be copied
- → Efficient copy function for quick transfer of a project or a single room
- → Easy parameter setting for basic users and expert users
- → User-friendly setting and selection of HCL trends, scenarios and time switch functions
- → Improved support during start-up thanks to diagnostics data
- → Secure backup: The project can be saved for documentation purposes and uploaded again later.

DALI



The lighting control dream team
Presence detectors and DALI-2

Theben offers you a wide range of DALI-2 presence detectors and presence sensors for nearly any need. DALI-2 broadcast presence detectors provide high-quality standard solutions with simple start-up, a lighting group with constant lighting control and orientation light. In addition, an external DALI-2 relay can be easily integrated, such as for HVAC applications.

Addressable DALI-2 presence detectors allow flexible assignment of up to three lighting groups on one DALI line with constant lighting control and orientation light. The devices offer 2- or 3-channel mixed light measurement. Moreover, the push buttons can be conveniently assigned to the individual lighting groups by remote control or push button.

The DALI-2 Room Solution allows you to implement individual, DALI-2 based lighting controls with HCL functionality, RGBW light and time-controlled functions. As simple as with broadcast detectors. All DALI-2 presence sensors can also be integrated into the DALI-2 Room Solution.

Theben DALI-2 presence sensors can be operated with any multi-master application controller that complies with IEC 62386 parts 101/104. This way, you can also connect your DALI-2 lighting management system to the higher-level control of a building management system.

A large selection of KNX/DALI gateways provides a bridge into the KNX world and thus further functionality, such as shading and climate control.

DALI

DALI

theRonda P360 DALI-2 HCL UP WH

Description

Functional description DALI-2 Room Solution

- The DALI-2 Room Solution is a DALI-2 single room solution that handles all aspects of lighting control. Compared to DALI presence detectors, the DALI-2 Room Solution offers new functionalities such as HCL function, TW/RGB functionality, time-controlled functions and others. For the single room solution, all key components (presence detector, switching actuator, push-button interface) and the app for commissioning are available from a single source

Functional description theRonda DALI HCL

- Passive infrared presence detector for ceiling mounting, DALI-2 certified
- Circular detection zone 360°, Ø 24 m, (452 m²) at 3 m mounting height
- DALI-2 addressable up to 4 channels of light
- Evaluates information from DALI push-button interfaces and controls actuators such as DALI ECGs or DALI relays according to DALI-2 standard
- Colour temperature control based on time of day HCL (Human Centric Lighting)
- Operation with RGBW light sources
- Time-controlled actions via integrated timer
- Flexible assignment of up to 4 lighting groups, additionally up to 4 switching groups and 2 presence groups via app
- Constant light control or dimmable lighting in switching mode with and without daylight influence, orientation light
- Switching mode and constant light control without presence influence
- 3 mixed light measurements
- Scenes can be created with any DALI ECGs and called up via push-buttons or remote control
- Simple integration of up to 4 DALI push-button interfaces (16 push-buttons) via app
- Simple, intuitive commissioning and operation thanks to app, bidirectional communication via BLE and thus simple reading of all parameters
- Dimming speed manual dimming adjustable in 2 steps
- Self-learning switch-off delay time
- Shortening of the overrun time in case of short presence (short-time presence)
- Teach-in function
- Detection sensitivity adjustable
- Extremely simple setting of energy-saving behaviour (eco / eco plus)
- Selectable control speed
- Manual override via app, remote control or push-button
- Fully or semi-automatic
- Test mode for checking function and detection range
- Simple extension of the detection range through automatic integration of DALI-2 presence sensors
- App „DALI-2 RS Plug" (for iOS / Android / Windows)
- Remote control „theSenda B" (optional)
- Area restriction with cover clips (optional)

DALI

Description

- 1-way DALI-2 switching actuator flush-mounted
- For the control of loads with 230 V AC mains voltage such as lamps, fans, pumps, etc.
- Additionally suitable for applications with extra-low voltage or control of a higher-level control system (HVAC), etc.
- Compact relay module for direct control of loads via the DALI bus according to IEC 62386 part 208
- Powerful relay suitable for loads with high inrush current such as LED luminaires
- Adjustable switch-on level after bus voltage is removed
- The switching thresholds of the relay can be easily adjusted via the DALI bus
- One DALI bus device and can be addressed accordingly according to 62386 part 102
- Power supply via the DALI bus
- Simple installation in commercially available flush-mounted boxes

Product selection

DALI

Description

theRonda P360-110 DALI UP,
theRonda S360-110 DALI UP

- Passive infrared presence detector for ceiling mounting, DALI-2 certified
- Round detection area 360°
- 1 light channel DALI-2 broadcast
- DALI-2 technology according to IEC 62386 Parts 101 and 103
- 1 push-button input
- Using of conventional push-buttons for maximum design freedom
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Choice of fully or semi-automatic operation
- Adjustable brightness switching value
- Teach-in function via remote control or push-button
- Setting of room correction factor (Automatic adjustment of brightness measurement)
- Light time delay can be set
- Calibrated 1 channel light measuremen
- Brief-presence
- Self-learning time delay
- Extremely easy setting of energy saving characteristics with the new „eco plus" function
- Selectable control speed
- Manual override via remote control or push-button
- Behavior after push button operation selectable (school / office)
- Test mode light
- Test-Mode presence
- Remote-controllable
- Scenes
- Sensitivity adjustable
- Detection area can be limited using cover clip
- Extension of detection area via Master/Slave or Master/Master switching
- Optimized handling by installer during assembly, wiring, commissioning

theRonda P360-330 DALI UP

As theRonda S360-110 & P360-110, but:

- Flexible assignment of up to 3 light groups towards one DALI line
- Easy, intuitive configuration of the DALI groups
- Up to 3 push-button inputs
- Flexible assignment of the push-buttons to the desired light channel using remote control
- Calibrated 3 channels light measurement

DALI

Description

- Passive infrared presence detector for ceiling mounting, DALI-2 certified
- Square detection area for corridors and storage areas
- Detection area with 2 individually connectable and disconnectable detection zones, each 15 x 5 m (total 30 x 5 m)
- Up to 2 light channels DALI-2 addressable or 1 light channel DALI-2 in Broadcast mode
- DALI-2 technology according to IEC 62386 Parts 101 and 103
- Flexible assignment of up to 2 light groups towards one DALI line
- Easy, intuitive configuration of the DALI groups
- Up to 2 push-button inputs
- Using of conventional push-buttons for maximum design freedom
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Choice of fully or semi-automatic operation
- Easy integration of an external DALI relay by an additional group e.g. for HVAC applications possible
- Adjustable brightness switching value
- Teach-in function via remote control or push-button
- Setting of room correction factor (Automatic adjustment of brightness measurement)
- Light time delay can be set
- Calibrated 2 channels light measurement
- Brief-presence
- Self-learning time delay
- Extremely easy setting of energy saving characteristics with the new „eco plus" function
- Selectable control speed
- Manual override via remote control or pushbutton
- Behavior after push button operation selectable (school / office)
- Test mode light
- Test-Mode presence
- Remote-controllable
- Scenes
- Sensitivity adjustable
- Detection area can be limited using cover clip
- Extension of detection area via Master/Slave or Master/Master switching
- Optimized handling by installer during assembly, wiring, commissioning

Technical data

	thePassa P360-221 DALI UP WH
Operating voltage	110–230 V AC
Frequency	50–60 Hz
Installation height	2–15 m
Minimum height	> 1,7 m
Switching output	DALI
Power consumption	≤ 0,4 W
Setting range brightness	10–3000 lx
Stand-by time light	0 s–60 min/on
Stand-by brightness	1–25 %
Control output	100 mA
Ouput light	DALI-interface according to IEC SN EN 62 386 for max. 64 DALI devices
Size of concealed housing	Size 1
Ambient temperature	–15 °C ... +50 °C
Type of protection	IP 54 (when fitted)

Detection range (Rectangular)

DALI

Description

- Passive infrared presence sensor for ceiling installation, DALI-2 certified
- This device provides information about presence and brightness in the form of a DALI telegram in line with IEC 62386 Part 303/304
- Easy to calibrate brightness measurement
- Test mode for checking function and detection area
- Configurable detection sensitivity
- Can be configured via DALI bus or remote control
- The "theSenda S" or "theSenda B" user remote controls can be used to dim or switch the lamps, to control the blinds or to execute additional functions via the higher-level control system.
- Ceiling installation in flush-mounted box
- Surface mounting on ceilings possible with 110A back box (option)
- Area restriction with cover clips (optional)
- "theSenda B" app remote control (optional) and corresponding "theSenda Plug" app (for iOS/Android)
- A Multi-Master Application Controller is required for start-up/control and configuration. It must be in accordance with IEC 62386 Parts 101/103 and, optionally, 301/303/304

theRonda P360 DALI-2 S UP WH

- Circular detection area 360°, up to Ø 24 m (452 m²)
- 3-way mixed light measurement, suitable for fluorescent lamps (FL/PL/ESL), halogen/incandescent lamps and LEDs
- 1 instance for presence
- 4 instances for brightness – integral/interior/centre/window

theRonda S360 DALI-2 S UP WH

- Circular detection area 360°, up to Ø 8 m (50 m²)
- 1-way mixed light measurement, suitable for fluorescent lamps (FL/PL/ESL), halogen/incandescent lamps and LEDs
- 1 instance for presence
- 1 instance for brightness

DALI

Description

- Passive infrared presence sensor for ceiling installation, DALI-2 certified
- Square detection area 360°, up to 8 x 8 m (64 m²), for reliable and easy planning
- This device provides information about presence and brightness in the form of a DALI telegram in line with IEC 62386 Part 303/304
- 2 instances for presence
- Standard/reduced detection zone
- Optics can be tilted to adjust the detection area
- 3-way mixed light measurement, suitable for fluorescent lamps (FL/PL/ESL), halogen/incandescent lamps and LEDs
- 4 instances for brightness - interior/centre/window/integral
- Easy to calibrate brightness measurement
- Test mode for checking function and detection area
- Configurable detection sensitivity
- Can be configured via DALI bus or remote control
- The „theSenda S" or „theSenda B" user remote controls can be used to dim or switch the lamps, to control the blinds or to execute additional functions via the higher-level control system.
- Flat design with interchangeable bezel frame in different colours
- Ceiling installation in flush-mounted box
- Surface mounting on ceilings possible with surface frame 75B (option)
- Area restriction with cover clips (optional)
- „theSenda B" app remote control (optional) and corresponding „theSenda Plug" app (for iOS/Android)
- A Multi-Master Application Controller is required for start-up/control and configuration. It must be in accordance with IEC 62386 Parts 101/103 and, optionally, 301/303/304

Presence detector LUXA 103
For indoor and outdoor use
More than standard

Theben LUXA 103 presence detectors are the versatile device family for efficient lighting and HVAC control both indoors and outdoors. The devices with a circular detection area are ideal for use in individual and open-plan offices, meeting rooms, storerooms, basements and toilets. LUXA 103 corridor sensors with a rectangular detection area control the lighting in corridors, walkways and hallways.

Thanks to the black, white and grey colour variants, the surface-mounted devices blend seamlessly into any interior or exterior design concept.

LUXA 103 S360-100-12 DE-UP WH
Item number 1030062

LUXA 103 S360-100-12 AP
with grey surface-mount frame,
Item number 9070844

LUXA 103 S360-100-28 AP
with black surface-mount frame,
Item number 9070843

The highlights at a glance

- Elegant, timeless, flat design
- Convenient setting via an app and remote control, only remote control or potentiometers
- Simple installation and wiring
- Surface-mounted device, combination device for ceiling installation and flush mounting
- Corridor sensors with matching design
- Device variant with second channel for HVAC control
- Can be networked with other LUXA 103 devices or the theMura slave
- Integrated button input
- Perfect for high LED switching loads
- Protection class IP 54 for outdoor areas and wet rooms

Actual size just 13.5 mm!

Easy programming
via app and remote control

Bluetooth®

The theSenda Plug app for presence and motion detectors

It is particularly easy to program LUXA 103 presence detectors. The best way to do this is to use the theSenda B remote control in combination with the free theSenda Plug app. The parameters entered are sent by Bluetooth to the theSenda B remote control and from there are transmitted by infrared to the detector. This allows all LUXA 103 devices to be configured and operated easily, quickly and safely. Do you prefer a classic approach to programming? Then simply use the integrated potentiometers to configure the device.

The theSenda Plug app for iOS and Android automatically displays all installed detectors. Flexible parameter setting means that parameter sets can be saved specifically according to the customer, be filed in parameter libraries or be established externally and imported. This means that identical parameters can be set quickly, even in larger properties with many detectors.

Available on the App Store

LUXA 103 S360-100 DE-UP WH | LUXA 103 S360-101 DE-UP WH | LUXA 103 S360-100/101 AP WH

Description

- Passive infrared presence detector
- Circular detection area 360°, Ø 12 m (113 m²) at 3 m mounting height
- Extension of the detection area by parallel switching, a maximum of 8 detectors can be connected in parallel
- Networking with wall detector theMura Slave possible
- Connection option for push-button for manual switching
- Operation as fully or semi-automatic possible
- One directional brightness measurement (mixed light measurement)
- Teach-in function, pulse function, test function, staircase lighting function
- Ready for operation immediately due to factory presetting
- Changes of values and settings are possible with potentiometers and with one of these optional remote controls:
  - App / universal remote control theSenda B
  - Service remote control theSenda P
  - Optional user remote control for manual override theSenda S / theSenda B
- Restriction of the detection range possible
- Also suitable for outdoor applications, by changing the installation location the detection range is reduced to Ø 8m

LUXA 103 S360-100-12 DE-UP WH

- Ceiling installation as supplied or flush-mounting by means of removable springs / protection cap and enclosed mounting frame
- 1 channel light (relay 230 V)

LUXA 103 S360-101-12 DE-UP WH

As LUXA 103 S360-100-12 DE -UP WH, but:

- 1 channel light (relay 230 V) and 1 channel presence (relay potential-free for HVAC control)

LUXA 103 S360-100-12 AP WH

- For surface-mounting
- 1 channel light (relay 230 V)

LUXA 103 S360-101-12 AP WH

As LUXA 103 S360-100-12 AP WH, but:

- 1 channel light (relay 230 V) and 1 channel presence (relay potential-free for HVAC control)

Presence detectors, 230 V AC

Description

- Passive infra-red presence detector for ceiling installation
- Circular detection area 360°, up to Ø 8 m (50 m²)
- Automatic presence- and brightness-dependent control for lighting
- Mixed light measurement suitable for fluorescent lamps (FL / PL / ESL), halogen / incandescent lamps and LEDs
- Channel A light: relay, 230 V
- Choice of fully or semi-automatic operation
- Brightness switching value configurable, teach-in function
- Pulse function for staircase light time switch
- Time delay configurable
- Test mode for checking function and detection area
- Connection option for sensor for manual switching
- Extension of detection area via Master / Slave switching
- Ready for immediate use due to factory presetting
- Diameter of ceiling cutout 34 – 36 mm
- Remote controllable with optionally remote controls theSenda B, theSenda P and theSenda S

Presence detectors, 230 V AC

LUXA 104 S360-200-24 DE-UP WH

Description

- Passive infrared presence detector for ceiling installation (flush-mounted or in false ceilings)
- Circular detection area 360°, up to Ø 24 m (452 m2) at mounting height 3 m
- 2 channels light with 2 light measurements (Relay 230 V)
- Automatic presence- and brightness-dependent control for lighting
- Mixed light measurement suitable for fluorescent lamps (FL / PL / ESL), halogen / incandescent lamps and LEDs
- Choice of fully or semi-automatic operation
- Adjustable brightness switching value
- Teach-in function
- Reduction of switch-off delay time in the event of short presence (brief-presence)
- Connection option for push-button
- Pulse function for staircase light time switch
- Detection area can be limited using cover clip
- Sensitivity adjustable
- Extension of detection area via Master / Slave or Master / Master switching, a maximum of 10 detectors can be switched in parallel with each other
- Ceiling installation also possible with surface-mounted frame
- Ready for immediate use due to factory preset
- User remote control theSenda S, service remote control theSenda P or remote control with app theSenda B available as accessory

Operating voltage	230 V AC	
Frequency	50 Hz	
Installation height	2 – 4 m	
Minimum height	> 1,7 m	
Setting range brightness	30 – 3000 lx	
Light switch-off delay	10 s – 60 min	
Incandescent / halogen lamp load	2300 W	
Inrush current	max. 400 A / 200 µs	
LED lamp < 2 W (typ.)	25 W	
LED lamp 2 – 8 W (typ.)	70 W	
LED lamp > 8 W (typ.)	80 W	
Switching capacity presence	–	50 W / 50 VA, max. 2 A
Ambient temperature	–15 °C ... +50 °C	
Type of protection	IP 54 (when fitted)

Presence detectors, 230 V AC

theRonda S360 AP WH

Description

- Passive infra-red presence detector for ceiling installation
- Circular detection area 360°, up to Ø 9 m (64 m²)
- Mixed light measurement suitable for fluorescent lamps (FL / PL / ESL), halogen / incandescent lamps and LEDs
- Channel A light: relay, 230 V
- Operation as fully automatic device
- Brightness switching value configurable, teach-in function
- Pulse function for staircase light time switch
- Time delay configurable
- Detection sensitivity configurable
- Test mode for checking function and detection area
- Ready for immediate use due to factory presetting (Brightness switching value 300 lux, Time delay 10 min)
- One of these optional remote controls is required for changing the values and attitudes:
- Management remote control theSenda B
- Installation remote control theSenda P
- Optional user remote control: theSenda S

theRonda S360-100 AP

- Automatic motion and brightness-dependent control for lighting

theRonda S360-101 AP

- Automatic motion and brightness-dependent control for lighting and HVAC
- Channel H, presence: relay, floating e.g. for HVAC control

Presence detectors, 230 V AC

theRonda S360 UP WH

Description

- Passive infrared presence detector for ceiling mounting
- Round detection area 360°, up to Ø 9 m (64 m²)
- Mixed light measurement suitable for fluorescent lamps (FL / PL / ESL), halogen / incandescent lamps and LEDs
- Channel A, light: relay, 230V
- Choice of fully or semi-automatic operation
- Adjustable brightness switching value, teach-in function
- Reduction of switch-off delay time in the event of short presence (brief-presence)
- Connection option for sensors or switches for manual switching with automatic recognition of sensor / switch
- Pulse function for staircase light time switch
- Switch-on delay and switch-off delay configurable
- Sensitivity adjustable
- Detection area can be limited using cover clip
- Ready for immediate use due to factory preset
- An optional remote control is required for changing the values and attitudes
- Test mode for checking function and detection area
- Ceiling installation in flush-mounted socket
- Ceiling installation also possible with surface-mounted frame
- User remote control theSenda S, service remote control theSenda P, management remote control theSenda B (optional)

theRonda S360-100 UP

- Automatic presence- and brightness-dependent control for lighting

theRonda S360-101 UP

- Automatic presence- and brightness-dependent control for lighting and HVAC
- Channel H, presence: relay, floating
- e.g. for HVAC control
- Switch-on delay and switch-off delay configurable
- Extension of detection area via Master / Slave or Master / Master switching, a maximum of 10 detectors can be switched in parallel with each other

theRonda S360 Slave UP

- Slave version for theRonda S360-101 UP
- Just to be used with theRonda S360-101 UP as Master

Presence detectors, 230 V AC

Description

- Passive infrared presence detector for ceiling mounting
- Square detection area 360° (up to 64 m²) for reliable and easy planning
- Mixed light measurement suitable for fluorescent lamps (FL / PL / ESL), halogen / incandescent lamps and LEDs
- Choice of fully or semi-automatic (absence detection) operation
- Adjustable brightness switching value, teach-in function
- Self-learning time delay
- Reduction of switch-off delay time in the event of short presence (brief-presence)
- Connection option for sensors or switches for manual switching with automatic recognition of sensor / switch
- Pulse function for staircase light time switch
- Switch-on delay and switch-off delay configurable
- Room monitoring with selective movement detection
- Exceptionally easy configuration of the energy-saving behaviour with the new «eco plus» function
- Staircase time function
- User remote control theSenda S, management remote control theSenda B (optional)
- Ready for immediate use due to factory preset
- Test mode for checking function and detection area
- Extension of detection area via Master / Slave or Master / Master switching, a maximum of 10 detectors can be switched in parallel with each other
- Ceiling installation in flush-mounted socket
- Ceiling installation also possible with surface-mounted frame

thePrema S360-101 E

- Automatic presence- and brightness-dependent control for lighting and HVAC
- Channel A, light: relay, 230 V
- Channel H, presence: relay, floating e.g. for HVAC control
- Operating mode of light and presence relay can be flexibly selected using the remote control theSenda B

thePrema S360-100 E

- Automatic presence- and brightness-dependent control for lighting
- Channel A, light: relay, 230V

thePrema S360 Slave E

- Slave version for thePrema
- Just to be used with thePrema as Master

* According to guarantee conditions, see www.theben.de/en/guarantee

Presence and motion detectors / LED spotlights

Presence detectors, 230 V AC

PresenceLight 180

Description

- Presence detector (PIR)
- Automatic control of lighting depending on presence and brightness
- Cover frame in white included in delivery, cover frames in black or silver available as optional accessories
- IP 54 for versatile use
- Light switch output (relay, 230 V)
- Mixed light measurement, suitable for fluorescent lamps (FL / PL / ESL), halogen / incandescent lamps and LEDs
- Brightness threshold and self-learning switch-off delay adjustable
- Pulse function for staircase time switch
- Parameters can be set using the potentiometers or via the optional service remote controls
- Optional user remote control
- Ready for use by ex-factory set items
- Test operation to check detection area and installation
- Wall mounting in flush-mounted box
- Possibility of surface mounting by using a surface frame

Description

Common functions

- Passive infrared motion / presence detector for flush-mounted wall mounting
- Semicircular detection area 170°, up to 14x17 m
- Mixed light measurement suitable for the control of fluorescent, incandescent, halogen lamps and LEDs
- Integrated button (can be blocked)
- Available with Theben frame or without frame
- Adapter frames for common switch ranges available as accessory, see www.theben.de / theMura

theMura S180-100 UP WH (with Theben frame)
theMura S180-100 B UP (without frame)

- Motion detector,
- 1 channel light
- Fully or semi-automatic operation
- Adjustable brightness switching value, teach-in function
- Staircase light function
- Switch-on delay configurable
- Extension of detection area via master / slave switching
- Ready for immediate use due to factory presetting

theMura S180-101 UP WH (with Theben frame)

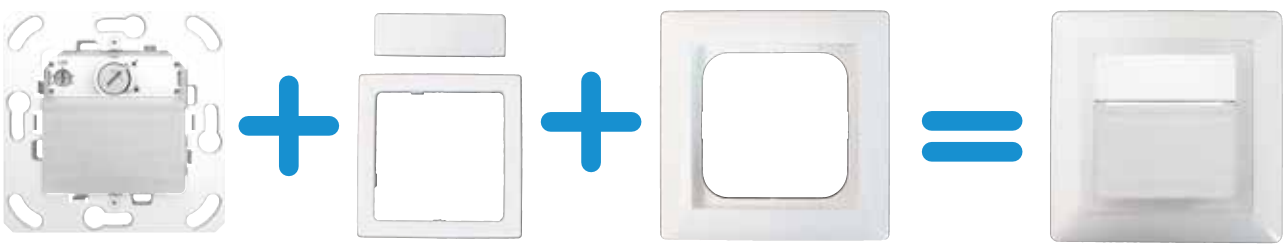
Application example



Presence detectors KNX

Description

- Optical presence detector for ceiling installation
- Rectangular detection area 360°, 7,5 x 11,5 m (79 m²) at 3 m installation height, with up to 6 flexible detection zones
- For KNX bus-system, 6 channels light and 6 channels presence for HVAC control
- KNX Data Secure
- Restriction of the detection area via app (thePixa Plug)
- Automatic presence and brightness-dependent control for lighting and HVAC
- Each detection zone has its own light measurement
- Adjustment of brightness measurements via thePixa Plug app
- Configurable sensitivity of sensor
- Distinction between motion and presence
- Parallel switching of multiple presence detectors (Master / Slave or Master / Master)
- Test mode for checking function and detection area via app (thePixa Plug)
- Output of occupancy rate and occupancy density via telegram
- Integrated temperature sensor
- Ceiling installation in flush-mounting box (2-point fixing)
- Surface mounting on ceilings possible with surface frame (option)
- thePixa Plug app for settings and evaluations (iOS / Android)
- KNX firmware update possible (ETS app)
- Sensor firmware update possible (thePixa Plug app)
- 6 channels light, Z1 light – Z6 light: Switching or constant lighting control with 6 independent control systems and standby function (orientation light)
- Switching mode with dimmable lighting
- Free switch object with configuration type switching
- Fully or semi-automatic device
- Brightness switching value configurable in lux by using parameters
- Brightness switching value configurable in lux by using parameters and telegram
- Light time delay configurable by using parameters
- Aura effect for better orientation and greater safety
- Manual override by telegram
- 6 channels HVAC, Z1 HVAC – Z6 HVAC: Configurable switch-on delay and time delay
- Sending of operating mode
- Separate block telegram
- 6 channels room occupancy, Z1 room occupancy – Z6 room occupancy: Output of number of persons
- Control of a fan with up to 3 stages
- 3 configurable thresholds (threshold switch)

Presence detectors KNX

* According to warranty terms and conditions, see www.theben.de/en/guarantee

Description

Common functions

- KNX Passive infrared presence detector for ceiling mounting
- Square detection range of 360° for safe and easy planning
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL/PL/ESL) and halogen/incandescent lamps
- Can be used as fully or semi-automatic, switchable
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Brightness switching value or set point value can be set in lux using parameters, on the device itself or via remote control
- Teaching in of the brightness switching value or the set point value
- Room correction factor setting for brightness measurement calibration
- Light time delay can be set using parameters, on the device itself or via remote control
- Switch on delay and time delay for presence can be set
- Detection sensitivity can be set
- Self-learning time delay
- Reduced time delay in the event of a shorter stay in the room (short presence)
- Scenario functions
- Extremely easy setting of energy saving characteristics with the new „eco plus" function
- Test mode for checking function and detection range
- Parallel switching of several detectors in Master/Slave or Master/Master possible
- User remote control and management-remote control (optional)
- Room monitoring

thePrema P360 KNX UP

- 3 channels light and 2 channels presence
- 2 channels light C1, C2 with 2 light measurements and additional lighting channel C3 without brightness factor
- 2 presence channels can be set individually
- Adaptable 3 channels light measurement

thePrema S360 KNX UP

- 2 channels light and 2 channels presence
- 2 channels light C1, C2 with 1 light measure-ment
- 2 presence channels can be set individually with parallel offset
- Adaptable 1 channel light measurement

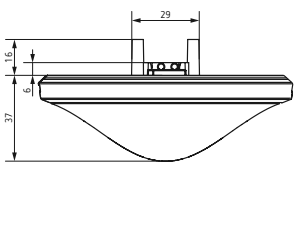
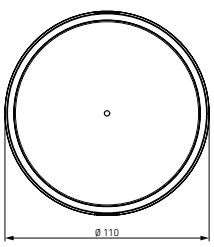
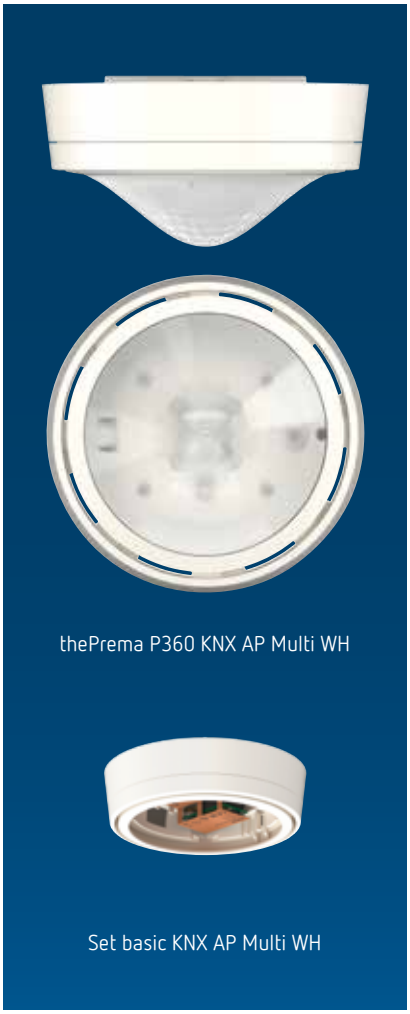
thePrema P360 KNX





thePrema S360 KNX

Presence detectors KNX



thePrema P360 KNX AP Multi WH

Set basic KNX AP Multi WH

Description

- KNX multisensor
- Consisting of KNX passive infrared presence detector and room air sensor (= 2 bus sharing units)

Room air sensor functions

- Measures CO_2 concentration, relative humidity, temperature and air pressure
- Three independent, configurable thresholds for CO_2 concentration and relative humidity
- Integrated room thermostat
- 4 binary inputs

Presence detector functions

- Automatic presence and brightness-dependent control for lighting and HVAC
- Square detection area 360°, up to 10 x 10 m (100 m^2), for reliable and easy planning
- 2 light channels C1, C2 with 2 light measurements and additional lighting channel C3 without influence of brightness
- 2 presence channels C4, C5 can be programmed individually
- Adaptable 3-channel light measurement
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL / PL / ESL), halogen and incandescent lamps
- Operation as fully or semi-automatic device, switchable
- Switching operation or constant light control with standby function (orientation light)
- Lighting dimmable in switching mode with standby function
- Brightness switching value or set point value configurable in lux using parameters, object or remote control
- Teach-in of the brightness switching value or set point value
- Setting of the room correction factor for brightness measurement calibration
- Light time delay configurable using parameters, object or remote control
- Configurable switch-on delay and presence time delay
- Configurable detection sensitivity
- Self-learning time delay
- Reduced time delay in the event of short presence
- Room monitoring function with reduced sensitivity only for detection of walking persons
- Scene functionality
- Extremely simple adjustment of energy saving behaviour with "eco plus" function
- Test mode for checking function and detection area
- Parallel switching of multiple presence detectors (master / slave or master / master)
- Room monitoring
- Remote operation with the following remote controls:
  - theSenda B app remote control
  - theSenda P service remote control
  - theSenda S user remote control

Presence detectors KNX

PlanoSpot 360 KNX DE WH

Description

- Passive infrared presence detector for ceiling installation
- Flat design, cover frame in white included in delivery
- Square detection area 360° (up to 64 m²) for reliable and easy planning
- Automatic presence- and brightness-dependent control for lighting and HVAC
- Two differently sized detection zones for greater flexibility. Adjustable via parameters or remote control.
- Manual alignment of the detection area (swivel mechanism)
- Mixed light measurement suitable for fluorescent lamps (FL / PL / ESL), halogen / incandescent lamps and LEDs
- 3 directed light measurements
- 2 light channels C1, C2 with 2 light measurements and additional lighting channel C3 without brightness factor
- Switched or constant light control with 2 independent control systems and standby function (orientation light)
- Switching mode with dimmable lighting
- Fully or semi-automatic
- Brightness switching value or set point value can be set in lux by using parameters, the object or via remote control
- Teach-in of the brightness switching value or the set point value
- Light time delay configurable
- Self-learning time delay can be set using parameters, object or via remote control
- Reduction of time delay when present briefly (short-term presence)
- Manual override by telegram or remote control
- 2 presence channels C4, C5, individually configurable
- Switch-on delay and time delay configurable
- Room monitoring with selective movement detection
- Setting the room correction factor for brightness measurement comparison
- Configurable sensitivity
- Extremely simple setting of the energy-saving ratio with the new «eco plus» function
- Test mode for checking function and detection area
- Scenarios
- Parallel switching of multiple presence detectors (Master / Slave or Master / Master)
- Installation in false ceilings with springs
- Surface mounting on ceilings possible with surface frame (optional)
- User remote control «theSenda S» (optional)
- Management remote control «theSenda B» (optional)
- Installation remote control «theSenda P» (optional)

Presence detectors KNX

theRonda P360 KNX UP WH

Description

- KNX Passive infrared presence detector for ceiling mounting
- Round detection area 360°, up to Ø 24 m (452 m²)
- 2 channels light and 2 channels presence
- 2 channels light C1, C2 with 1 light measurement
- 2 presence channels can be parametrized individually
- Adaptable 1 channel light measurement
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL / PL / ESL) and halogen / incandescent lamps
- Can be used as fully or semi-automatic, switchable
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Brightness switching value or set point value can be set in lux using parameters, on the device itself or via remote control
- Teaching in of the brightness switching value or the set point value
- Room correction factor setting for brightness measurement calibration
- Light time delay can be set using parameters, on the device itself or via remote control
- Switch on delay and time delay for presence can be set
- Detection sensitivity can be set
- Reduced time delay in the event of a shorter stay in the room (short presence)
- Scenario functions
- Test mode for checking function and detection range
- Sensitivity adjustable
- Detection area can be limited using cover clip
- Manual override using telegram or remote control
- Parallel switching of several detectors in Master / Slave or Master / Master possible
- Ceiling installation in flush-mounted socket
- Ceiling installation also possible with surface-mounted frame
- User remote control and management-remote control (optional)

Presence detectors KNX

thePassa P360 KNX UP WH

Description

- KNX Passive infrared presence detector for ceiling mounting
- Square detection area for corridors and storage areas
- Detection area with 2 individually connectable and disconnectable detection zones, each 15 x 5 m (total 30 x 5 m)
- 2 channel light and 2 channel presence
- 2 channel light C1, C2 with 2 light measurements
- 2 presence channels can be parametrized individually
- Adaptable 2 channel light measurement
- Function aura effect, switches on the lighting group when there is a person in its detection area and dims the adjacent lighting groups
- Function chaser light, recognises the direction of movement of the people in the room and „predictively" switches on the adjacent lighting group
- Function walking direction recognition
- Mixed light measurement suitable for LEDs, fluorescent lamps (FL / PL / ESL) and halogen / incandescent lamps
- Can be used as fully or semi-automatic, switchable
- Switch or constant light control mode with stand-by function
- Dimmable lighting in switch mode with stand-by function
- Brightness switching value or set point value can be set in lux using parameters, on the device itself or via remote control
- Teaching in of the brightness switching value or the set point value
- Room correction factor setting for brightness measurement calibration
- Light time delay can be set using parameters, on the device itself or via remote control
- Switch on delay and time delay for presence can be set
- Detection sensitivity can be set
- Reduced time delay in the event of a shorter stay in the room (short presence)
- Scenario functions
- Test mode for checking function and detection range
- Sensitivity adjustable
- Detection area can be limited using cover clip
- Manual override using telegram or remote control
- Parallel switching of several detectors in Master / Slave or Master / Master possible
- Ceiling installation in flush-mounted socket
- Ceiling installation also possible with surface-mounted frame
- User remote control and management-remote control (optional)

Presence detectors KNX

PresenceLight 360B-KNX

Description

- Presence detector (PIR)
- Automatic control of lighting depending on presence and brightness
- Square detection area allows accurate and simple planning
- IP 54 for versatile use
- 2 channels light for controlling one or two lighting groups
- Mixed light measurement, suitable for fluorescent lamps (FL / PL / ESL), halogen / incandescent lamps and LEDs
- Switching or constant light control with stand-by function
- Adjustable sensitivity
- Choice of fully or semi automatic operation: In „Semi-automatic" mode the light must be switched on manually and switches off automatically
- Short presence; Reduced switch-off delay time in case of a short presence
- Self-learning time delay
- Channel presence with switch-off delay and switch-on delay time and send values
- Function „monitoring" with reduced sensitivity only to detect walking persons
- Channel brightness (Lux)
- Set brightness level via bus object
- Scene functionality (8-bit scenes)
- Selected parameters can be configured remotely using the theSenda B remote control. Parameter settings are made via ETS
- Optional user remote control
- Ready for use by ex-factory set items
- Test operation to check detection area and installation
- Parallel switching of several presence detectors (master-slave or master-master) possible
- Ceiling mounting in flush-mounted box
- Possibility of surface mounting by using a surface frame

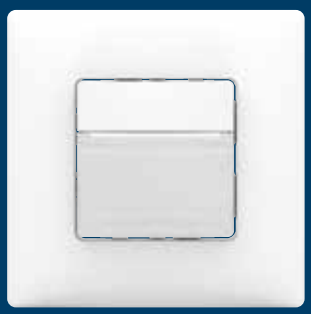
Presence detectors KNX



theMura KNX UP WH

Description

- Passive infrared presence / movement detector for wall mounting flush-mounted
- Rectangular detection area 170°, 14 x 17 m (238 m²) at 1.2 m mounting height
- For KNX bus system
- Secure commissioning and communication through support of KNX Data Secure
- Mixed light measurement suitable for fluorescent lamps (FL / PL / ESL), halogen / incandescent lamps and LEDs
- Integrated push-button (can be deactivated)
- Integrated bootloader: firmware can be subsequently updated
- Extension of the detection range through master / slave switching
- Adjustable sensitivity
- With Theben frame
- Adapter frames for common switch ranges available as accessory, see www.theben.de / theMura

theMura S180 KNX UP WH

- Motion detector
- 1 channel light and 1 channel presence for HVAC control
- Switching
- Dimmable lighting in switching mode with and without daylight influence
- 3 logic channels (AND, OR, XOR)

theMura P180 KNX UP WH

- Switching or constant light control with stand-by functionality (orientation light)
- Dimmable lighting in switching mode with and without daylight influence
- Simple adjustment of brightness measurement
- Short-time presence
- Selectable control speed
- Aura function
- Scene functionality
- Integrated orientation light (white)
- Integrated temperature sensor
- Acoustic function
- 2 binary inputs
- 6 logic channels (AND, OR, XOR)
- Limited setting options with app / universal remote control theSenda B
- Limited setting possibilities with service remote control theSenda P

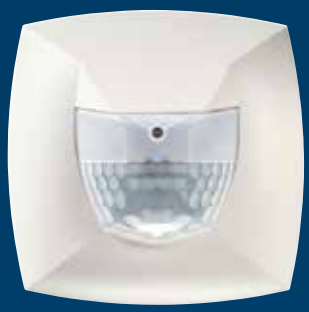
Presence detectors KNX



PresenceLight 180B-KNX

Description

- Presence detector (PIR)
- Automatic control of lighting depending on presence and brightness
- IP 54 for versatile use
- 2 channels light for controlling one or two lighting groups
- Mixed light measurement, suitable for fluorescent lamps (FL / PL / ESL), halogen / incandescent lamps and LEDs
- Switching or constant light control with stand-by function
- Adjustable sensitivity
- Choice of fully or semi automatic operation: In „Semi-automatic" mode the light must be switched on manually and switches off automatically
- Short presence; Reduced switch-off delay time in case of a short presence
- Channel presence with switch-off delay and switch-on delay time and send values
- Function „monitoring" with reduced sensitivity only to detect walking persons
- Channel brightness (Lux)
- Set brightness level via bus object
- Scene functionality (8-bit scenes)
- Selected parameters can be configured remotely using the theSenda B remote control. Parameter settings are made via ETS
- Optional user remote control
- Ready for use by ex-factory set items
- Test operation to check detection area and installation
- Parallel switching of several presence detectors (master-slave or master-master) possible
- Wall mounting in flush-mounted box
- Possibility of surface mounting by using a surface frame

Motion detectors

Description

- Passive infra-red motion detector for ceiling installation
- Circular detection area 360°, up to Ø 8 m (50 m²)
- Automatic motion and brightness-dependent control for lighting
- Mixed light measurement suitable for fluorescent lamps (FL / PL / ESL), halogen / incandescent lamps and LEDs
- Channel A light: relay, 230 V
- Operation as fully automatic device
- Brightness switching value configurable, teach-in function
- Pulse function for staircase light time switch
- Time delay configurable
- Extension of detection area via Master / Slave switching
- Test mode for checking function and detection area
- Diameter of ceiling cutout 34 – 36 mm
- Ready for immediate use due to factory presetting

Motion detectors

theMova FLAT DE WH

Description

- Passive infrared motion detector for ceiling installation
- Circular detection area 360°, up to Ø 9 m (64 m²)
- Mixed light measurement suitable for fluorescent lamps (FL/PL/ESL), halogen/incandescent lamps and LEDs
- Channel A light: relay, 230 V
- Operation as fully automatic device
- Configurable brightness switching value, teach-in function
- Pulse function for staircase light timer switch
- Configurable time delay
- Configurable detection sensitivity
- Test mode for checking function and detection area
- Ready for immediate use due to factory presetting (brightness switching value 300 lux, time delay 10 minutes)
- One of these optional remote controls is required to change the values and settings:
  - theSenda B app remote control
  - theSenda P service remote control
  - Optional user remote control: theSenda S

theMova S360-100 FLAT DE

- Automatic motion and brightness-dependent control for lighting

theMova S360-101 FLAT DE

- Automatic motion and brightness-dependent control for lighting and HVAC
- Channel H, presence: relay, floating, e.g. for HVAC control
- Configurable switch-on delay and time delay

Motion detectors

LUXA 103 UA

Description

- Motion detector (PIR)
- Automatic lighting control based on presence and brightness
- 1 channel
- With acoustic function
- Activation by the PIR sensor and deactivation by the microphone (microphone can also be deactivated)
- Flexible installation options, ceiling installation using clamping brackets as well as flush-mounted or surface mounting using the optional surface frame
- Mixed light measurement suitable for the control of fluorescent, incandescent, halogen lamps and LED
- Zero-cross switching
- Detection area can be limited using three enclosed segments
- Instant start-up possible via factory preset
- No unintentional adjustment due to covered up controls
- Adjustable brightness switching value and switch-off delay
- Sensitivity can be reduced to limit detection area
- Pulse function
- Test function

GERMAN DESIGN AWARD WINNER 2021

Description

Common functions
- Passive infrared motion/presence detector for flush-mounted wall mounting
- Semicircular detection area 170°, up to 14x17 m
- Mixed light measurement suitable for the control of fluorescent, incandescent, halogen lamps and LEDs
- Integrated button (can be blocked)
- Available with Theben frame or without frame
- Adapter frames for common switch ranges available as accessory, see www.theben.de/theMura

theMura S180-100 UP WH (with Theben frame)
theMura S180-100 B UP (without frame)
- Motion detector,
- 1 channel light
- Fully or semi-automatic operation
- Adjustable brightness switching value, teach-in function
- Staircase light function
- Switch-on delay configurable
- Extension of detection area via master/slave switching
- Ready for immediate use due to factory presetting

theMura S180-101 UP WH (with Theben frame)
theMura S180-101 B UP (without frame)
- Presence detector
- 1 channel light
- 1 channel presence
- Fully or semi-automatic operation
- External button can be connected
- Adjustable brightness switching value, teach-in function
- Automatic calibration of brightness measurement
- Switch-on delay configurable
- Short-term presence
- Acoustic function
- Orientation light
- Configurable sensitivity
- External button can be connected
- Staircase light function
- Extension of detection area via master/slave switching
- Ready for immediate use due to factory presetting
- Remote operation with theSenda S, theSenda P, theSenda B

theMura S180 Slave UP WH
(with Theben frame)
theMura S180 Slave B UP (without frame)
- Slave version for:
  - theMura S180-100 UP WH
  - theMura S180-100 B UP
  - theMura S180-101 UP WH
  - theMura S180-101 B UP

theMura S180-100 2W UP WH
(with Theben frame)
theMura S180-100 2W B UP (without frame)
- Motion detector
- 1 channel light
- 2-wire version in combination with an ELPA staircase time switch for switching the lamp loads
- Adjustable brightness switching value, teach-in function
- Ideal for replacing existing buttons
- Switch-on delay configurable on the staircase time switch
- Parallel connection possible (up to 12 detectors towards an ELPA)

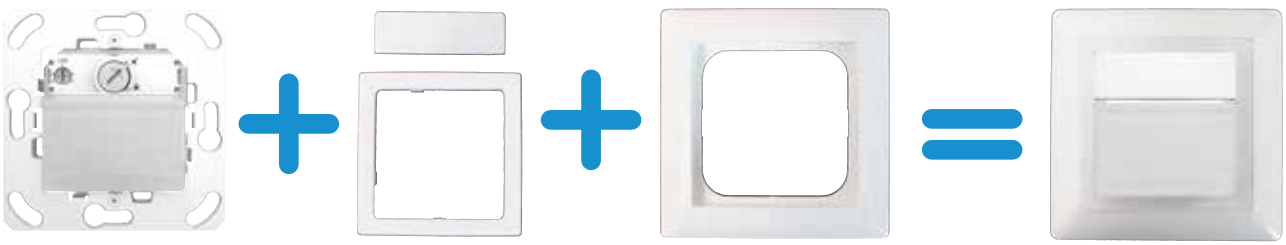
Application example



Motion detectors

LUXA 103-200 T

Description

- Motion detector (PIR)
- Automatic lighting control based on presence and brightness
- 2 wire connection, ideal for retrofitting
- Light switch output (triac, 230 V AC)
- Mixed light measurement suitable for incandescent and halogen lamps (no electronic ballast)
- Advance shut-off warning through dimming 15 seconds before light switches off
- Wall installation
- Compatible with branded switches, replaces conventional light switches
- Area limit via lens attachment
- Manual AUTO / ON / OFF switching by simple adjustment of cover flap
- Teach-in of current brightness value
- Instant start-up possible via factory preset
- No unintentional adjustment due to covered up controls
- Adjustable brightness switching value and switch-off delay
- Sensitivity can be reduced to limit detection area
- Pulse function

A clear line
Motion detectors
theLuxa R, S and P

Most people wouldn't even notice them. Or only at the point when the light comes on, a feeling of safety abounds and everyone can see the way: theLuxa motion detectors from Theben.

They contribute decisively to saving energy as well as increasing comfort and safety. The light is automatically switched on when needed, and only then. theLuxa always shows its best side – whether in white (WH) or in black (BK). Whatever wall it is on. Or even on the ceiling – thanks to the swivel joint on some versions.

theLuxa is available in the standard versions R180, S150/S180 and S360, or as a remote-controlled Performance version with floating contacts for simple, time-saving and thus inexpensive integration into KNX building system technology.

For further information and technical data, see the pages that follow.

Motion detectors, outdoor

Description

Common functions
- Motion detector (PIR)
- 180° detection angle, 12 m at mounting height 2.5 m
- Automatic lighting control based on presence and brightness
- 180° detection angle
- For outdoor use
- Sensor head can be turned by ± 90° horizontally and by 30° downwards / upwards
- Adjustable brightness switching value and switch-off delay
- Mixed light measurement suitable for the control of fluorescent, incandescent, halogen lamps and LEDs
- Area limit via stickers
- Test function for checking detection area
- Single-handed plug-in installation

KNX Motion detectors, outdoor

Description

- Motion detector (PIR)
- Automatic lighting control based on presence and brightness
- For integration into KNX building systems
- For outdoor use
- For installation on walls and ceilings
- Integrated temperature sensor
- For larger, commercial outdoor applications such as offices, public buildings, hotels, schools, car parks and warehouses
- Easy to program with KNX ETS software
- Adjustable brightness switching value and switch-off delay
- Sensitivity can be reduced
- Area limit via lens attachment
- Mixed light measurement
- Teach-in of current brightness value possible
- Pulse function
- Test function for checking detection area
- Installation on flush-mounted socket possible (60 mm)

Uniform yet diverse
LED light
theLeda D

Whether you are looking for indirect lighting for your house facade or impressive illumination for your garden, front door or patio, you need look no further than theLeda D. With their matt anodised aluminium housing and pleasant warm white light, these LED lights look stunning wherever they are used.

GERMAN DESIGN AWARD SPECIAL 2019

The theLeda D line offers you plenty of flexibility. You can choose between direct lighting with LED spotlights, indirect lighting with uplighters and downlighters and two bollard lights in different lengths. There is also the option of a practical socket on the rear. And the best part is that no matter which model you opt for, you are always guaranteed a uniform look for your home. All theLeda D models are available with or without an integrated motion detector.
Further information and technical data on page 252 onwards.

Description

Common functions
- LED spotlight
- Suitable for outdoor use
- Flexible extension options thanks to optional module with motion detector including switch output or light sensor incl. switch output
- Spotlight can be turned by 360°
- Not dimmable

theLeda B20L
- 20 W LED spotlight

theLeda B30L
- 30 W LED spotlight

theLeda B50L
- 50 W LED spotlight

theLeda B100L W
- 100 W LED spotlight

theLeda B motion module RC
- theLeda B radio-controlled motion detector module
- 180° detection angle at 12 m range
- Additional light switch output
- Sensor can turned horizontally by ± 90° and downwards/backwards by 90°
- IP 55 protection rating
- theLeda B remote control included in scope of supply for the motion detector module
- A remote control can be combined with different motion detector modules
- Up to 6 remote controls can be combined with a single motion detector module
- Remote control range up to 100 m on open air test site

theLeda B motion module
- 180° detection angle at 12 m range
- Additional light switch output
- Sensor can turned horizontally by ± 90° and downwards/backwards by 90°
- Protection rating IP 55

theLeda B light module
- Duty cycle range: 2, 4, 6, 8 hours, on/permanent on at night
- Switch-on brightness can be set from 2–200 lux
- Additional light switch output
- Protection rating IP 55

Application example

Version 1:
LED spotlight

For lighting control
via a switch or a button

Version 2:
LED spotlight with light sensor

For lighting-based lighting control

Version 3:
LED spotlight with motion detector

For motion- and lighting-based lighting control

Version 4:
LED spotlight with RC motion detector

For motion-and lighting-based lighting control

Each RC motion detector is supplied with a remote control

Presence and motion detectors
Spotlights, with motion detector

theLeda S10 WH

theLeda S20 BK

Description

Common functions

- LED spotlight with motion detector
- Suitable for outdoor use
- Automatic lighting control based on presence and brightness
- 180° detection angle at a detection range of 10 m
- Area limit via lens attachment
- Orientation light with configurable dimming level
- Short and extended function via manual control system
- Integrated heat sink in housing color
- Single-handed plug-in installation
- Instant start-up possible via factory preset
- Adjustable lux value and switch-off delay
- Setting elements easily accessible on the side

theLeda S10

- 1 LED spot with 10 W
- Spotlight can be swivelled ± 40° horizontally, and adjusted 70° downwards, wall-wash functionality by swivelling 180°

theLeda S20

- 2 LED spot with 10 W each
- Spotlights can be swivelled ± 20° horizontally, and adjusted 70° downwards

Presence and motion detectors
LED light with motion detector

Description

Common functions
- Stylish LED light with motion detector (PIR)
- High-quality housing made from anodised extruded-aluminium profiles
- Suitable for outdoor use
- Automatic lighting control based on presence and brightness
- 180° detection angle at 10 m range
- Teach-in, test, twilight switch, dimmable orientation light and self-calculating night interruption functions can be adjusted
- High IP 55 protection rating for outdoor installation
- Easy installation with socket
- Wireless connectivity
- Long-lasting LEDs: service life of 50,000 hours
- Manual control via an interrupter switch (PERM ON 6 h)

theLeda D S AL
- 8.5 W LED light
- Light emission at front (spotlight)

theLeda D SU AL
- 14 W LED light
- Light emission at front (spotlight) and at top (uplighter)

Presence and motion detectors

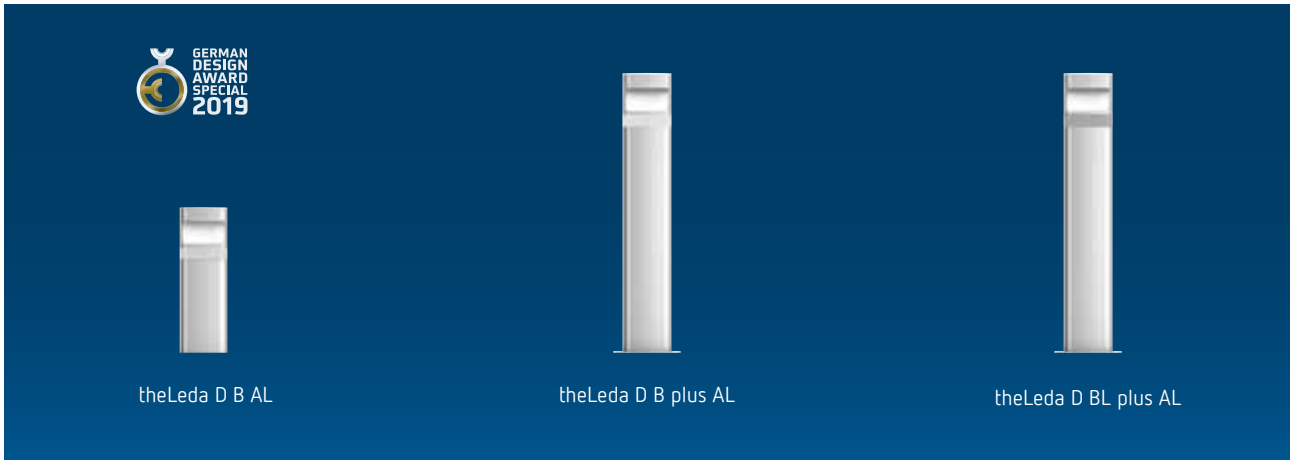
LED bollard light, with / without motion detector



Description

Common functions (theLeda D with motion detector)

- Stylish LED bollard light with motion detector (PIR)
- High-quality housing made from anodised extruded-aluminium profiles
- Suitable for outdoor use
- Automatic lighting control based on presence and brightness
- 180° detection angle with 12 m diameter, optimised for paths
- Teach-in, test, twilight switch, dimmable orientation light and self-calculating night interruption functions can be adjusted
- Can be adjusted via the theSenda S and P remote controls, via theSenda B and the theSenda Plug app, or by setting the potentiometer on the device itself
- High IP 55 protection rating for outdoor installation (with IP 54 socket)
- Wireless connectivity, can only be set via theSenda B with theSenda Plug
- Exceptionally efficient thanks to high light output
- Long-lasting LEDs: service life of 50,000 hours
- Manual control via an interrupter switch (PERM ON 6 h)

theLeda D B AL

- 8,5 W short LED bollard light
- Light emission at front (spotlight)

theLeda D B plus AL

- 8,5 W long LED bollard light
- Light emission at front (spotlight)

theLeda D B plus S AL

- 8,5 W long LED bollard light
- Light emission at front (spotlight)
- With socket on the back of the housing

Common functions (theLeda D without motion detector)

- Stylish LED bollard light
- High-quality housing made from anodised extruded-aluminium profiles
- Suitable for outdoor use
- High IP 55 protection rating for outdoor installation
- Wireless connectivity, can only be set via theSenda B with theSenda Plug
- Exceptionally efficient thanks to high light output
- Long-lasting LEDs: service life of 50,000 hours

theLeda D BL AL

- 8,5 W short LED bollard light
- Light emission at front (spotlight)

theLeda D BL plus AL

- 8,5 W long LED bollard light
- Light emission at front (spotlight)

Digital time switches, DIN rail, 2 modules

Description

Common functions
- Digital time switch with weekly program
- DuoFix spring terminals
- Text-oriented user guidance in display
- 56 memory locations
- Interface for OBELISK top2 memory card (PC programming)
- 10 year power reserve (lithium battery)
- Zero-cross switching for relay-saving switching and high lamp loads (not with 24 V devices)
- ON-OFF switching times
- Switching preselection
- Permanent switching ON/OFF
- Integrated operating hour counter
- Holiday program
- Display back light (can be turned off)
- PIN coding
- Automatic summer/winter time changeover

TR 610 top3
- 1 channel
- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy OBELISK top3
- Maximum manipulation security, time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch
- 100 % compatible with top2

TR 612 top3
- 2 channels
- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy OBELISK top3
- Maximum manipulation security, time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch
- 100 % compatible with top2

Description

Common functions

- Digital time switch with weekly program
- DuoFix spring terminals
- Text-oriented user guidance in display
- 84 memory locations
- Interface for OBELISK top2 memory card (PC programming)
- 10 year power reserve (lithium battery)
- Zero-cross switching for relay-saving switching and high lamp loads (not with 24 V devices)
- ON-OFF switching times
- Pulse program
- Cycle program
- Switching preselection
- Permanent switching ON/OFF
- Timer countdown
- Integrated operating hour counter
- Holiday program
- 2 random programs
- Display back light (can be turned off)
- PIN coding
- Automatic summer/winter time changeover

Functions top3 devices

- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy OBELISK top3
- Maximum manipulation security, time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch
- 100 % compatible with top2

TR 611 top3

- 1 channel, external input
- 3 special programs (small annual program)
- 84 memory locations

TR 611 top3 RC

- Time synchronisation option via connection of an external DCF or GPS antenna (GPS not with 24 V device)
- Additional power unit required for GPS if only one device is connected to the antenna
- 1 channel, external input
- 3 special programs (small annual program)
- 84 memory locations

TR 611 top3

- 2 channels, 2 external inputs
- 3 special programs (small annual program)
- 84 memory locations
- Channel switching and channel locking possible

TR 611 top2

- 1 channel
- External input
- 84 memory locations

TR 622 top2

- 2 channel
- 2 external inputs
- 84 memory locations

Digital time switches, DIN rail, 2 modules

SELEKTA 170 top3

SELEKTA 174 top3

SELEKTA 175 top2

Description

Common functions

- Astronomical time switch with weekly program
- Astronomical time switch function (automatic calculation of sunrise and sunset times for the whole year)
- DuoFix spring terminals
- Text-oriented user guidance in display
- Interface for OBELISK top2 memory card (PC programming)
- 10 year power reserve (lithium battery)
- Zero-cross switching for relay-saving switching and high lamp loads (not with 24 V devices)
- Calculated astronomical switching times
- Programmable ON-OFF switching times
- Switching preselection
- Permanent switching ON/OFF
- Integrated operating hour counter
- Holiday program
- PIN coding
- Automatic summer/winter time changeover

Functions top3 devices

- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy OBELISK top3
- Maximum manipulation security, time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch
- 100 % compatible with top2
- Display back light (can be turned off)

SELEKTA 170 top3

- 1 channel
- 56 memory locations

SELEKTA 174 top3

As SELEKTA 170 top3, but:

- 2 channels

SELEKTA 171 top3 RC

- Time synchronisation via connection of external DCF or GPS antennas, additional posititioning for astronomical program with GPS (GPS not with 24 V device)
- 1 channel, external input
- 3 special programs (small annual program)
- 3 custom twilight ranges plus adjustable offset (sunset, twilight, darkness)
- Astro-pulse, 84 memory locations

SELEKTA 172 top3

- 2 channels, 2 external inputs
- 3 special programs (small annual program)
- 3 custom twilight ranges plus adjustable offset (sunset, twilight, darkness)
- Astro-pulse, 84 memory locations
- Channel switching and channel locking possible

SELEKTA 172 top3 RC

As SELEKTA 171 top3 RC, but:

- 2 channels, without external inputs
- Display back light (can be turned off)

SELEKTA 170 top2

- 1 channel
- 56 memory locations

SELEKTA 175 top2

- 1 channel
- 56 memory locations
- External input

Time and light control

Digital time switches, DIN rail, 3 modules, 4 modules

Description

Common functions
- Digital time switch with yearly and astronomical time program
- DuoFix spring terminals
- Text-oriented user guidance in display
- 800 memory locations
- Interface for OBELISK top2 memory card (PC programming)
- 8 year power reserve (lithium battery)
- Zero-cross switching for leay-saving switching and high lamp loads (not with 24 V devices)
- Automatic summer/winter time changeover
- ON-OFF switching times
- Pulse program
- Cycle program
- Extensive yearly clock functions
- Astronomical time switch function (automatic calculation of sunrise and sunset times for the whole year)
- Switching preselection
- Permanent switching ON/OFF
- Count-down timer
- Integrated operating hour counter
- Holiday program
- 2 random programs
- Display back light (can be turned off)
- PIN coding

TR 641 top2
- 1 channel
- External input

TR 641 top2 RC
- Time synchronisation via connection of external DCF or GPS antennas, additional posititioning for astronomical program with GPS
- 1 channel
- External input
- Extension module can be connected
- Memory card OBELISK top2 included in delivery

TR 642 top2
- 2 channels
- 2 external inputs

TR 642 top2 RC
- As TR 641 top2 RC but:
- 2 channels
- 2 external inputs

TR 644 top2
- 4 channels
- 4 external inputs

TR 644 top2 RC
- As TR 641 top2 RC but:
- 4 channels
- 4 external inputs

EM 4 top2

Description

- Extension module for TR 641 top2 RC, TR 642 top2 RC and TR 644 top2 RC
- 4 channels
- Width: 4 modules
- DuoFix spring terminals
- 4 external inputs
- Switching preselection
- Permanent ON/OFF switching
- 4 LEDs for displaying switching status
- Zero-cross switching for relay-saving switching and high lamp loads

TC 649 E

Description

TC 649 E

- Digital time switch / astro time switch with weekly program and annual program
- With integrated webserver, can be controlled via LAN/smartphone
- 4 channels
- 800 memory programs
- Channel 1 to 4 can be switched over as time or astro time switch program
- 3 special programs per channel: switching program / astro program; Duration Off; Duration Each with year date function
- Local holidays, fixed date ranges, recurring date ranges and Easter-themed holidays
- Astro times with other night interruption / fixed ON circuit
- Permanent ON or OFF switching via LAN switchable
- Pulse program
- Automatic summer winter time changeover Europe; Canada; UNITED STATES; Iran, Australia and freely definable
- Deactivate summer / winter time change over
- Hour counter

TC 649 C

- As TC 649 E, but:
- With integrated web server, external operation via app possible via a cloud solution
- Time switching or astronomical programs can be sent to a single device via the cloud and direct switching can be performed via the cloud
- Via the cloud, the control box can be operated from any computer or smartphone and tablet with the Obelisk top3 app and internet access
- An additional network router or GSM, UMTS or LTE router is required to connect to the cloud

Product selection

TR 608 top2 S

TR 609 top2 S

SELEKTA 175 top2

Description

Common functions
- 1 channel
- DuoFix spring terminals
- Text-oriented user guidance in display
- Interface for OBELISK top2 memory card (PC programming)
- 10 year power reserve (lithium battery)
- Switching preselection
- Integrated operating hour counter
- Holiday program
- PIN coding
- Automatic summer/winter time changeover

TR 608 top2 S
- Digital time switch with weekly program
- 56 memory locations
- ON-OFF switching times
- Permanent switching ON/OFF

TR 609 top2 S
- Digital time switch with weekly program
- 84 memory locations
- External input
- Pulse program
- Cycle program
- Timer countdown
- 2 random programs
- ON-OFF switching times
- Permanent switching ON/OFF

SELEKTA 175 top2
- Astronomical time switch with weekly program
- External input
- 56 memory locations
- Astronomical time switch function (automatic calculation of sunrise and sunset times for the whole year)
- Offset for adjusting of sunrise and sunset times
- Calculated astronomical switching times
- Fixed ON-OFF switching times can be programmed (e.g. night time interruption)
- Permanent switching ON/OFF

Digital time switches, Wall installation

TR 030 top3 UP

SELEKTA 070 top3 UP

Description

Common functions

- Digital time switch with weekly program for flush-mounted wall mounting
- 1 channel
- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy OBELISK top3
- Maximum manipulation security, time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch
- 3 special programs (small annual program)
- 84 memory locations
- DuoFix spring terminals
- Text-oriented user guidance in display
- 6 year power reserve
- Interface for OBELISK top2 memory card (PC programming)
- Switching preselection
- Permanent switching ON/OFF
- Integrated operating hour counter
- Holiday program
- PIN coding
- Automatic summer/winter time changeover
- Adapter frames for common switch ranges available as accessory

TR 030 top3 UP

- Digital time switch with weekly program
- Pulse program
- Cycle program
- Random program

SELEKTA 070 top3 UP

- Astronomical time switch with weekly program
- Astronomical time switch function (automatic calculation of sunrise and sunset times for the whole year)
- Offset to adjust sunrise and sunset times
- 3 custom twilight ranges plus adjustable offset (sunset, twilight, darkness)
- Astro-pulse
- Programmable ON-OFF switching times, for example fornight interruption

theben-eltimo 020 top3

theben-eltimo 020 Astro top3

Description

Common functions
- Digital plug-in timer
- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy OBELISK top3
- Maximum manipulation security, time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch
- Use with earthed sockets
- 1 channel
- Easy operation via keys for program function and day of the week, hours, minutes
- ON-OFF switching times
- Switching preselection
- Permanent switching ON/OFF
- Random program
- Automatic summer/winter time changeover

theben-eltimo 020 top3
- Digital plug-in timer with weekly program

theben-eltimo 020 Astro top3
- Digital plug-in timer with weekly and astronomical program

Product selection

Program	Number of channels	Memory locations	Time basis	Operating voltage	Type	Article number
Weekly program	1	56	Quarz	230 V AC	theben-eltimo 020 top3	0200130
Weekly program, Astronomical program	1	56	Quarz	230 V AC	theben-eltimo 020 Astro top3	0200170

Technical data

	theben-eltimo 020 top3
Operating voltage	230 V AC
Frequency	50 Hz
Installation type	Plug-in
Type of contact	NO contact
Power reserve	6 years
Switching capacity at 250 V AC, cos φ = 1	16 A
Switching capacity at 250 V AC, cos φ = 0,6	10 A
LED lamp < 2 W (typ.)	30 W
LED lamp < 2 W (typ.)	300 W
Incandescent/halogen lamp load 230 V	2600 W
Switching capacity	3680 W
Shortest switching times	1 min
Time accuracy at 25 °C	≤ ± 0,25 s/Tag (Quarz)
Stand-by consumption	0,5 W
Type of protection	IP 20
Protection class	II for housing, I for plug system as per EN 62 730-1
Ambient temperature	–10 °C ... +40 °C

Switch smarter
Since 1977
theben-timer

When no one was thinking about automated and smart control of the home, the theben-timer already offered the possibility of time-dependent control of switching operations. That was in 1977.

Whether floor lamps, televisions, coffee machines, radios, alarm clocks or aquariums. With the small socket timer, a wide variety of consumers could be switched on and off safely and reliably. The simple operating concept has hardly changed in 45 years. Why should it? It works. And really well!

The analogue timer for the power socket was developed as early as 1976. Since then, it has become the bestseller in Theben's product range, with over 33 million units sold worldwide.

More convenience less power consumption

If you are going on holiday, simply program several timers in the house with different times. This is a simple way of simulating presence: the house appears occupied from the outside and is protected against break-ins. In addition, you can reduce electricity consumption with theben-timer.

At home everywhere: With almost infinite variety of applications

With theben-timer you can easily and safely switch off voice assistants or WLAN routers or repeaters overnight. In return, air purifiers can be switched on time-controlled and thus prevent „thick air".

Safer is simply safer:

The theben-timer 26 safety-plus is equipped with a permanently integrated shutter. This prevents objects from being inserted into the socket and contact with live parts. The theben-timer 26 safety plus thus fulfils the requirements of the DIN standard VDE 0620:2021-02. The interlock only opens when both openings are pressed simultaneously.

SAFETY+

Absolute classics
Reliable and robust
Hour counters

Our tried-and-tested counters are very quick to install and can be used to record operating and service times reliably. In turn, this allows precise planning and monitoring of your production processes, maintenance cycles and warranty periods.

Analogue time switches, Surface-mounted, Drive with quick fastening for DIN rail

FRI 77 g

FRI 77 g-2

Description

Common functions
- Analogue cooling time switch with daily and short time program
- Tappet
- 2 separate switching discs

FRI 77 g
- 2 channels
- Wall-mounted
- 8 tappets included in delivery
- Optional delayed switching on of fan

FRI 77 h-2
- 1 channel
- Drive with quick fastening for DIN rail
- 6 tappets included in delivery

FRI 77 g-2
- 2 channels
- Drive with quick fastening for DIN rail
- 8 tappets included in delivery
- Optional delayed switching on of fan

TM 345 M

TM 345 B

Description

Common functions

- Electronic time relay
- Can be used universally for controlling automatic processes in machines, lighting, ventilation, heating, cupboards etc.
- Precise analogue time setting
- Multi-voltage input for all supply and control voltages, no jumpers or additional terminals are required
- LED to display the switching status

TM 345 M

- Locking snap switch to select the period of time, as well as the following operating modes:
- Response delay (AV), without control contact
- Wipe contact (EW), without control contact
- Release delay (RV), with control contact
- Pulse former (IF), with control contact
- Response and release delay (VZ), with control contact
- Pulse output (WR), with control contact
- Flip-flop (TG)

TM 345 B

- With flip-flop function
- Pulse and break time independently adjustable

Product selection

Hour counters, analogue, front panel and DIN rail

Description

Common functions
- Hour counter with synchronous motor drive

BZ 142-1, BZ 143-1
- Front panel devices with click-in or stretch clamp supports for walls up to a maximum of 10 mm thick
- Clamp or flat plug connection 6.3 mm
- Versions for direct voltage with quartz-controlled stepper motor
- Progress display

BZ 142-3
- With plug-in base for wall installation (terminal cover required)
- Plug-in base with quick fastening for 35 mm profile rails (DIN EN 60 715)
- Screw terminals
- Contact protection to comply with accident prevention regulation BGV A3
- Housing colour: anthracite
- Versions for direct voltage with quartz-controlled stepper motor
- Progress display

BZ 145
- Built in distributor device with quick fastening for 35 mm profile rails (DIN EN 60 715)
- Top mounting with additional terminal box cover plate, sealable
- Control panel installation with assembly kit No. 907 0 001
- Contact protection to comply with accident prevention regulation BGV A3
- Captive screw terminals

The right light at the right moment
OKTO impulse switches
ELPA staircase time switches

With its legendary, multi-million-selling ELPA staircase time switches, Theben has been setting the bar for functionality, reliability and durability for many decades. We have now transferred these uniquely Theben attributes to our new OKTO impulse switches. And all for an appealing price.

Technical details can be found from page 308.

OKTO ES:
LED-compatible and quiet

Electronic latching relays

Electronic OKTO impulse switches are equipped with zero-cross switching for optimum LED switching. This protects the relay contact and extends the lamp's service life. The OKTO impulse switches ES12-230 and ES12-UC can be used with illuminated buttons up to a load of 100 mA. After a power failure, the last switching status is automatically restored.

- High LED switching capacity
- Extra quiet
- Potential-free multi-voltage input (OKTO ES12-UC)

OKTO S:
Efficient and safe

Electro-mechanical latching relays

OKTO electromechanical impulse switches offer a bistable mechanism, which maintains the last switch position without consuming any power until the next pulse is received. This reduces dissipation loss and energy consumption to great effect. In the event of a power failure, the last switch position is held mechanically.

- Only two wires required for each button
- Bistable mechanism
- 0 W standby consumption
- Electrically secure all-pin deactivation (OKTO S22-230)
- Integrated manual switch

ELPA 7:
Efficient and flexible

Electronic staircase time switches

The ELPA 7 electronic staircase time switch is perfect for energy-efficient lighting control in stairwells as well as garages and patios, Zero-cross switching ensures optimum LED switching, protects the relay contacts and extends the service life of the lamp. ELPA 7 staircase light timer switches can be installed in existing or new systems thanks to the automatic 3- or 4-conductor detection.

- High LED switching capacity to protect bulbs
- Extra quiet
- High neon lamp load
- Switch-off pre-warning with secondary switching
- Automatic 3 or 4 conductor detection
- Option to connect theMura S180-100 2W UP
- Manual switch for permanent light

Staircase time switches, DIN rail, electronic with multi-function, Electronic

ELPA 1 | ELPA 6 plus | ELPA 3

Description

Common functions

- Staircase time switch, electronical
- Terminal layout same as ELPA 8
- Extremely accurate
- Push button input with electronic overload protection
- Automatic 3 or 4 conductor detection (4 conductor with connection for floor lighting, 3 conductor no longer permitted for new systems)

ELPA 1

- Zero-cross switching for relay-saving switching and high lamp loads
- Multi-functional device with 10 available functions, set at the front of the device
- Additional multi-voltage input electrically isolated for AC/DC 8...240 V, e.g. für intercoms
- Switch-off pre-warning (two double flashes) in accordance with DIN 18015-2 to avoid sudden darkness
- Extended function activated via long button press
- Immediate secondary switching (stair light switch) or prematurely switched off (pulse switch with switch-off delay)
- Permanent switch
- Electronic pulse light

ELPA 6 plus

- Zero-cross switching for relay-saving switching and high lamp loads
- Multi-functional device with 10 available functions, set at the front of the device
- Switch-off pre-warning (two flashes) optimized for switching LEDs
- Extended function activated via long button press
- Immediate secondary switching (stair light switch) or prematurely switched off (pulse switch with switch-off delay)
- Permanent switch
- Electronic pulse light

ELPA 3

- Additional multi-voltage input electrically isolated for AC/DC 8...240 V, e.g. für intercoms
- Immediate secondary switching
- Toggle switch for permanent light

ELPA 7

- Switch-off pre-warning
- Zero-cross switching for relay-saving switching and high lamp loads
- Immediate secondary switching
- Toggle switch for permanent light

Staircase time switches, DIN rail, Electro-mechanical

Description

Common functions

- Staircase time switch, electro-mechcanical
- No closed-circuit current consumption
- Toggle switch for permanent light ON
- Reliable due to synchronous motor drive
- Simplest possible time setting and direct delay time readout on absolute scale
- Precision mechanics and therefore exact switching period
- Very low sensitivity to interference

ELPA 8

- 4 conductor with floor lighting connection
- 3 conductor without floor lighting (no longer permitted for new systems)
- Retriggerable

ELPA 9

- 3 conductor connection and floor lighting, but without secondary switching (no longer permitted for new systems)
- Terminal layout same as ELPA 8

* According to guarantee conditions, see www.theben.de/en/guarantee

OKTO ES12-230 | OKTO ES12-UC | OKTO S12-230 | OKTO S22-230

Description

Common functions OKTO ES
- Electronical latching relay with 1 channel/ contact (normally open contact)
- Comfortable lighting control of one common consumer with several push-buttons possible
- Particularly quiet operation of the installation switch
- High glow lamp load up to 100 mA
- Automatic 3-/4-wire detection of the pulse switch
- Lamps-friendly due to zero-crossing switching for high LED loads (up to 600 W)
- Stand-by consumption of only 0.3 W

OKTO ES12-230
- 1 channel

OKTO ES12-UC
- 1 channel
- Potential-free multi-voltage input (8 V to 230 V)

Common functions OKTO S
- Electro-mechanical latching relay with 1 channel/contact (normally open contact)
- Comfortable lighting control of one common consumer with several push-buttons possible
- Simple and inexpensive electrical installation with 2 wires per push-button
- Operation via integrated manual switch possible
- Potential-free with SELV
- LED switching load up to 200 W
- No closed-circuit current consumption

OKTO S12-230
- 1 channel

OKTO S22-230
- 2 channels
- Electrically safe all-pole disconnection

Smart and compact
DIMAX 545 plus P
Flush-mounted universal dimmer

Thanks to its compact housing, flush-mounted installation of the new DIMAX 545 plus P universal dimmer is considerably simplified. The integrated Bluetooth technology enables convenient control via the MAXplus app for tablets and smartphones (iOS, Android). In addition, the flush-mounted dimmers have been optimised for dimming LEDs.

- → **Easy installation:** Thanks to particularly compact housing.
- → **App control:** Convenient setting of light scenes, brightness values, staircase lighting and snooze function, among others.
- → **Astro and time functions:** Astro-controlled, predefined switch-on brightness (depending on location), weekly timers can be combined with the dimming functions.
- → **Night limitation:** Set time on request – the switch-on brightness is reduced to the set dimming value.
- → **WakeUp-Light:** gentle dimming up of the light via smartphone.
- → **Perfect for LEDs:** Configure minimum/maximum brightness, switch-on brightness and dimming behaviour

	Universal dimmer for R, L, and C loads	Mounting type	Multi-voltage input	Multifunction	Operation via App possible	Type	Page

				–	√	DIMAX 545 plus P	320

DIMAX 532 plus

DIMAX 534 plus

Description

Common functions

- Universal dimmer for R, L and C loads with automatic load detection
- Switch-on brightness can be saved individually
- Adjustable minimum brightness (required for ESL and LED)
- Multi-voltage input, e.g. for intercoms
- Low stand-by consumption
- Memory function in the event of power failure
- Automatic electronic overload and overheating switch-off
- Dimming switch-on function
- Permanent ON function (test function)
- No minimum load requirement
- Soft ON and Soft OFF protects the light
- The dimming output can be upgraded by using additional dimmboosters „DMB 1 T KNX" - dimming output 300 W/VA for each dimmbooster

DIMAX 534 plus

- Comfort setting with wake-up and snooze function (can be deactivated), e.g. for children's bedrooms
- Adjustable dimming rate (with automatic functions)
- One and two button operation for ease of use
- Up to 3 light scenes can be called up via separate input (diode module required for more than one light scene)
- Central OFF/ON or light scene for up to 10 devices possible with one push button
- Staircase light function with dimming function in accordance with DIN 18015-2 (resettable, long-time function)
- Can be controlled by push buttons or switches e.g. for combination with presence detectors or time switch

DIMAX 534 plus

DIMAX 541 plus E | DIMAX 542 plus S | DIMAX 545 plus P

Description

Common functions
- Universal dimmer for R, L and C loads with automatic load detection
- Optimised settings for LEDs, incandescent lamps
- Easy installation thanks to a highly compact housing
- Ideal for all dimmable LEDs and halogen lamps
- Memory function saves the most recently set light level value and then dims to this value the next time it is switched on
- Convenient snooze function

DIMAX 541 plus E
- Push button operation

DIMAX 542 plus S
- Push button operation, setting via potentiometer
- Adjustable minimum brightness for LEDs
- „Gentle" lamp-conserving function for switching on and off
- Automatic detection of the load type
- Overheating protection against overload
- Short-circuit protection

DIMAX 545 plus P
- Operation by button or app via Bluetooth Low Energy
- Adjustable minimum brightness for LEDs
- Adjustable dimming response
- Adjustable staircase light function
- App for Android and iOS
- Special load setting
- Sequential scenes
- Password protection possible
- „Gentle" lamp-conserving function for switching on and off
- Automatic detection of the load type
- Overheating protection against overload
- Short-circuit protection

LUNA top3 –
Daylight-based adjustments
Now possible via a smartphone app

The new LUNA top3 digital twilight switches from Theben are reaching new heights in terms of functionality, programmability and energy efficiency. Twilight programmes can be easily controlled using an app and transferred to the twilight switch via Bluetooth Low Energy. Thanks to the newly developed zero-cross switching, you can keep the high inrush currents of LEDs firmly under control. top3 can handle 5 times more LED power than top2 (max. 600 W/800 A/200 µs). For technical details, see page 306 onwards.

Practical, reliable and low-maintenance: Channel switching and locking

The new dual-channel LUNA 122 top3 twilight switch now offers a channel switching and locking feature. The channel switching option allows you to activate basic lighting while at the same time saving energy. For example, this can ensure even loads for street lighting while also increasing the maintenance intervals and life of the lamps. The channel locking feature prevents a channel from using conflicting commands which could damage connected devices (e.g. forward and return for motors).

Special programmes with yearly functions

The new LUNA 121 top3 and LUNA 122 top3 twilight switches feature a small annual program so that you can program one-off and recurring events (e.g. pre-programmed holidays which you need only select).

Maximum security against tampering

Time switch programs can only be transferred from the app to the timer if the Bluetooth OBELISK top3 is plugged into the timer. This protects your device against unwanted access by third parties and ensures maximum security against tampering. This is particularly important for devices installed in public places.

Twilight switches, Analogue, DIN rail

LUNA 108 plus

LUNA 110 plus

Description

Common functions
- Analogue twilight switch
- External light sensor included in delivery
- Display of channel and switching status
- Infinitely adjustable switching brightness

LUNA 108 plus
- Fixed On and Off switching delay

LUNA 110 plus
- Adjustable On and Off switching delay
- DuoFix spring terminals
- Extended brightness levels and adjustable delay
- Five adjustable brightness levels for simple setting of lux value
- Zero-cross switching for relay-saving switching and high lamp loads (not with 24 V devices)
- Permanent OFF and permanent ON function can be set on the potentiometer
- Test function

Time and light control

Twilight switches, Digital without clock, DIN rail

Description

Common functions

- Twilight switch/light controller
- External light sensor included in the scope of supply
- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy with OBELISK top3
- Maximum security against tampering, time switch programmes can only be transferred from the app to the timer if the Bluetooth OBELISK top3 is plugged in
- Switching brightness digitally adjustable
- Adjustable on and off switching delay
- Switching brightness and switching delay can be set separately for switching on and off
- Onscreen display of channel and switching status as well as current lux value
- DuoFix load line connections
- Zero-cross switching for relay-saving switching and high lamp loads
- Up to 4 sensors can be attached
- Up to 10 devices can be connected to a digital sensor
- Interface for OBELISK top2 memory card (PC programming)
- Extended brightness range
- Permanent ON/OFF switching
- Test function
- Switching pre-selection
- Display lighting
- PIN coding
- Hour counter

LUNA 121 top3

LUNA 122 top3

Description

Common functions

- Twilight switch/light controller with integrated time switch with weekly programme
- External light sensor included in the scope of supply
- Time synchronisation option via connection of an external antenna, e.g. top2/3 RC-DCF or top2/3 GPS antennas
- 3 special programmes (small annual programme)
- 84 memory locations
- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy with OBELISK top3
- Maximum security against tampering, time switch programmes can only be transferred from the app to the timer if the Bluetooth OBELISK top3 is plugged in
- Switching brightness digitally adjustable
- Adjustable on and off switching delay
- Switching brightness and switching delay can be set separately for switching on and off
- Onscreen display of channel and switching status as well as current lux value
- DuoFix load line connections
- Zero-cross switching for relay-saving switching and high lamp loads
- Up to 4 sensors can be attached

Clock thermostat
RAMSES 814 BLE UP
Convenient control via smartphone app

The RAMSES 814 BLE UP clock thermostat by Theben is the first invisible clock thermostat (heating or cooling). It is completely hidden in the flush-mounted box, under the blind cover or the box lid.

This clock thermostat can be controlled and programmed via an app, is really easy to use and can be quickly adapted to different user prompts. A direct Bluetooth Low Energy (BLE) connection is established between the app and the RAMSES 814 BLE UP. This impresses with its ability to measure and control the temperature accurately while consuming only minimal power. No additional components are necessary, making it an attractively priced product with no hidden costs.

Convenient operation

Fiddly buttons and basic operating displays are a thing of the past. The RAMSES 814 BLE UP is conveniently operated using smartphones and tablets with a high-definition colour touch screen.

Maximum security against tampering

The RAMSES 814 BLE UP only needs a local Bluetooth connection to work in your home. There is no need for an Internet connection or any additional gateways or routers. A clear advantage in terms of security against tampering.

Easy to install

In contrast to other smart thermostats, the RAMSES 814 BLE UP does not need any additional components (gateways, switch actuators, etc.). Install the RAMSES 814 BLE UP just like a conventional clock thermostat: quickly, easily and without fuss. And the best thing of all: with the RAMSES 814 BLE UP, no data is stored in the cloud.

RAMSES 812 BLE

Description

- Digital clock thermostat for time-dependent monitoring and control of room temperature
- Mains version
- Suitable for energy-saving room temperature control in houses, apartments, etc.
- Operation via app
- Direct Bluetooth Low Energy (BLE) connection between the app and RAMSES BLE, no communication via the Internet
- Settings configured conveniently via the app with intuitive operation from a smartphone or tablet
- Increased user convenience
- External input for the flexible connection of the external room temperature sensor, floor sensor, motion detector or telephone contact
- Intelligent control algorithm (pulse-duration controller, hysteresis controller)
- Suitable for on/off heating systems, zone-based or single-room control, electric heating units

Product selection

RAMSES 816 BLE

Description

- Digital clock thermostat for time-dependent monitoring and control of room temperature
- Suitable for energy-saving room temperature control in houses, apartments, etc.
- Operation via app
- Direct Bluetooth Low Energy (BLE) connection between the app and RAMSES BLE, no communication via the Internet
- Settings configured conveniently via the app with intuitive operation from a smartphone or tablet
- Increased user convenience
- Power supply via OpenTherm bus (clock thermostat)

RAMSES 816 BLE

- Mains version (control box)
- Relay switch output at the control box (floating, 10 (1) A)
- External input for the flexible connection of the external room temperature sensor, floor sensor, motion detector or telephone contact
- Replaces 2-wire controller in the room when the lower housing is fitted next to the heating
- Suitable for switching higher currents (relay in lower housing) for electric heating units
- Suitable for on/off heating systems, zone-based or single-room control, for higher switching capacities with control box, and for 2-wire connection (for replacing 2-wire battery devices)

RAMSES 816 BLE 2

- Power supply via OpenTherm bus (clock thermostat)
- Mains version (control box)
- Relay switch output at the control box (floating, 5 A) for heating ON/OFF
- Special function for device reset, relay closes briefly for time adjustable in seconds
- Modulation output 0-10 V
- Suitable for heaters with 0-10 V modulation input
- Suitable for heaters with device reset, input or master reset

RAMSES 816 BLE 3

- Power supply via OpenTherm bus (clock thermostat)
- Mains version (control box)
- 1 x relay 10 A floating, 1 x relay 5 A, floating, for heaters with 2-stage regulation
- Hysteresis adjustable between stage 1 and stage 2, (temperature difference between room ACTUAL and room SETPOINT value adjustable from 0.5 °C to 2.5 °C in 0.5 °C steps)
- Heating and cooling function possible
- Heating from 20 °C downwards with relay 1
- Cooling start temperatures (range 20-30 °C)
- Waiting time adjustable for change over between heating and cooling (1-50 h)

Clock thermostats, Digital battery version

RAMSES 811 top2

RAMSES 831 top2

Description

Common functions

- Digital clock thermostat with a low profile design for time-dependent monitoring and control of room temperature
- Battery version
- Suitable for energy-saving room temperature control in houses, apartments, heating zones, offices, showrooms, factories, medical practices, holiday homes
- Temperature is set quickly via rotary switch
- INFO key for viewing important settings
- Quick start-up via 3 basic programs with individually changeable comfort and reduced temperature
- Party / ECO program
- Fully automatic summer/winter-time correction
- Holiday program with reduction phase or date-controlled heating phase for holiday homes
- Different control types can be individually set
- Optimum start option thanks to operating point and switching differential setting option
- 24 programmable time phases per program also enable reduction phases during the day
- Plug-in base for wall or flush-mounted socket installation

RAMSES 831 top2

- Backlit display through keystroke
- External input for connection of presence detectors, temperature sensors, floor sensors, window contacts or telephone remote switches
- Optimisation function for automatic correction of heating start up

Description

- Digital clock thermostat for time-dependent monitoring and control of room temperature
- Zone control, 1 zone
- 1 external temperature sensor required
- Daily/weekly program can be set to the minute
- Date-controlled holiday program
- Programming displayed graphically by a bar arrangement in the LCD
- Fully automatic summer/winter-time correction
- Manual switching pre-selection and operation mode selector for: Automatic mode, comfort mode, reduction mode, frost protection mode
- PIN coding
- DuoFix spring terminals
- Text-oriented user guidance in display
- Interface for OBELISK top2 memory card (Copying of programs)

RAMSES 850 BLE OT

Description

- Digital clock thermostat for time-dependent monitoring and control of room temperature
- Power supply via OpenTherm bus
- Suitable for energy-saving room temperature control in houses, apartments, etc.
- Operation via app
- Direct Bluetooth Low Energy (BLE) connection between the app and RAMSES BLE, no communication via the Internet
- Settings configured conveniently via the app with intuitive operation from a smartphone or tablet
- Increased user convenience
- Communication with the heating unit via OpenTherm
- External input for the flexible connection of the external room temperature sensor, floor sensor, motion detector or telephone contact
- PI room controller, controlled by atmospheric conditions, with or without room influence
- Preset with three modifiable weekly programs for heating and one for tap water
- Suitable for modulating gas condensing boiler systems and modulating heating systems with OpenTherm interface

Product selection

RAMSES 813 top2 HF Set A

RAMSES 813 top2 HF Set 1

Description

Common functions

- Radio-controlled system for room temperature control
- The system consists of one digital clock thermostat and one receiver
- Suitable for energy-saving room temperature control in houses, apartments, heating zones, offices, showrooms, factories, medical practices, holiday homes
- Required temperature set via the rotary dial
- INFO key for viewing important settings
- Quick start-up via 3 basic programs with individually changeable comfort and reduced temperature
- Party / ECO program
- Automatic summer/winter time adjustment
- Different control types can be individually set
- Optimum start option thanks to operating point and switching differential setting option
- 24 programmable time phases per program also enable reduction phases during the day
- 2 comfort and 2 reduced temperatures can be allocated to each phase
- Including base for free choice of position
- An optionally available plug-in base is required for wall installation
- Holiday program with reduced temperature or date-controlled heating phase
- Optional pump protection function
- Optional feature to warn when boiler maintenance required

RAMSES 813 top2 HF Set A

- Consisting of a RAMSES 813 top2 HF and a REC 11 receiver with an NO contact 16(2) A/250 V AC for wall mounting

RAMSES 813 top2 HF Set 1

- Consisting of a RAMSES 813 top2 HF and a REC 1 receiver with a two-way switch 6(2) A/250 V AC

RAMSES 816 top2 OT

Description

- Digital mixer control
- 3 different weekly programs
- 3 comfort and 2 reduced temperatures can be allocated to each zone
- INFO button for the most important data
- Party/ECO program
- Chimney sweeping function with push button OT box
- Minimum boiler temperature can be set
- 2-stage burner control option
- Holiday program with reduced temperature or date-controlled heating phase can be programmed e. g. for holiday homes
- USB interface for modem
- Automatic summer/winter time adjustment
- Control of feed temperature via motorcontrolled mixer
- 3-point controller with feed sensor
- Pump protection function
- Inputs: feed sensor heating circuit (contained in set), external sensor
- Elapsed-time counter for recording relay switching times e.g. burner operating time
- Adjustable reminder function for heater maintenance

Description

- Digital heating control for time-dependent monitoring and control of room temperature
- Open Therm heating controller for 2 or 3 point control, weather-dependent, service water and circulation control
- Automatic sensor recognition for weather- or room-dependent control; can be switched manually at any time
- 3 different weekly programs
- 3 comfort and 2 reduced temperatures can be allocated to each phase
- INFO button for the most important data
- Additional switching program for domestic hot water utilisation times
- Adjustable service water storage temperature, programmable legionella protection
- Party/ECO program
- Chimney sweeping function with push button OT box
- Minimum boiler temperature can be set
- 2 heating curves can be set for 2 heating circuits
- 2-stage burner control option
- Holiday program with reduced temperature or date-controlled heating phase can be programmed e. g. for holiday homes
- USB interface for modem
- Automatic summer/winter time adjustment
- Boiler/feed temperature (control circuit 1) controlled by switching the burner
- Control of feed temperature (control circuit 2) via pump control or motor-controlled mixer
- 3-point controller with feed sensor
- Time- and temperature-dependent control of hot water circulation pump.
- Pump protection function
- Inputs: External sensor (contained in set), feed sensor heating circuit (contained in set), contact or immersion sensor for domestic hot water, contact sensor for circulation
- Elapsed-time counter for recording relay switching times e.g. burner operating time
- Adjustable reminder function for heater maintenance

Clock thermostats, Analogue battery version, Analogue 230 V

RAMSES 784 S

Description

Common functions

- Analogue clock thermostat with a low profile design for time-dependent monitoring and control of room temperature
- Segment program disc with daily program
- Normal and reduced temperature can be set separately
- Operating point and electronic recirculation are set from the front
- Party switch and program display

RAMSES 784 S

- Battery version
- Electronic temperature control
- Quartz mechanism
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C
- Battery monitoring with battery replacement indicator via flashing LED
- Silting and pump protection function (option)

RAMSES 722 S

- Mains version
- Synchronous motor drive
- Electronic temperature control
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C

Clock thermostats, Analogue battery version, Analogue 230 V

RAMSES 784

RAMSES 721

RAMSES 725

Description

Common functions

- Analogue clock thermostat with a low profile design for time-dependent monitoring and control of room temperature
- Operating point and electronic recirculation are set from the front
- Party switch and program display

RAMSES 784

- Battery version
- Tappet program disc with daily or weekly program
- Electronic temperature control
- Normal and reduced temperature can be set separately
- Quartz mechanism
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C
- Battery monitoring with battery replacement indicator via flashing LED
- Silting and pump protection function (option)

RAMSES 722

- Mains version
- Tappet program disc with daily or weekly program
- Synchronous motor drive
- Normal and reduced temperature can be set separately
- Electronic temperature control
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C

RAMSES 782

- Mains version
- Tappet program disc with daily or weekly program
- Quartz mechanism, 3 day power reserve
- Normal and reduced temperature can be set separately
- Electronic temperature control
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C

RAMSES 721

- Mains version
- Tappet program disc with daily program
- Synchronous motor drive
- Normal temperature can be set
- Reduced temperature approx. 5 K lower in relation to the set comfort temperature
- Without selector switch
- Electronic temperature control
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C

RAMSES 725

- Mains version
- Tappet program disc with daily or weekly program
- Synchronous motor drive
- Reduced temperature can be set
- Central control of reduced temperature as per time program
- Electronic temperature control
- Selector switch for operating mode: continuous reduced temperature, continuous normal temperature, automatic mode, frost and plant protection +6 °C

AMUN 716 CO2 Monitor
The reliable way to measure CO_2 concentration levels

Theben CO_2 sensors monitor CO_2 concentration levels in schools and classrooms, in offices and meeting rooms or in passive and low-energy buildings. CO_2 sensors thereby make a decisive contribution to room air quality.

→ Mobile CO_2 sensor with USB cable for measuring air quality

→ Suitable for schools/nurseries, offices, conference and meeting rooms, and rooms in homes

→ In the event of a potentially dangerous CO_2 concentration, the device gives a visual warning via the LED traffic light indicator so that the ventilation can be optimised to create a healthy room climate.

LED light system on the AMUN 716 CO2 Monitor

Lots of people sharing a room can quickly produce poor air quality. This is mostly caused by exhaled carbon dioxide (CO_2). In turn, this lowers well-being, concentration and performance.

The classification system used by the German Environment Agency for inhaled air quality

CO2 content in the room	Hygiene assessment	Recommendations
< 1000 ppm	Hygienically acceptable	No further measures required
1000 to 2000 ppm	Serious cause for concern	Ventilation measures, check and improve ventilation habits
> 2000 ppm	Hygienically unacceptable	Check that the room can be properly ventilated; implement further measures if applicable

CO2
theben

A compact solution to improve air quality: thePrema P360 KNX AP Multi WH presence detector with CO_2 sensor

With its integrated CO_2 sensor, the thePrema P360 KNX Multi presence detector from Theben not only detects the presence of people, but also the CO_2 concentration in the room. Good room air quality and regular ventilation of enclosed spaces are more important than ever at the moment. In offices and classrooms in particular, constant measurement of the CO_2 concentration means that rooms can be ventilated in a targeted manner in order to minimise harmful aerosols and improve the air quality.

This is where the thePrema P360 KNX Multi from Theben comes in: the device combines a presence detector and a CO_2 sensor in one compact housing. People in the room are reliably detected and, at the same time, the CO_2 concentration is measured precisely. The ventilation is controlled efficiently via the KNX building automation system on the basis of easily configurable threshold values.

→ KNX multisensor

→ Consisting of KNX passive infrared presence detector and KNX room air sensor KNX (= 2 bus sharing units)

→ Measures CO_2 concentration, relative humidity, temperature and air pressure

Easy installation and integration into the KNX building automation system

As multiple devices are combined in one housing, there is only one unit to install. This reduces the amount of effort involved in installation considerably. In addition to its presence detection and CO_2 level functions, the unit also measures the relative humidity, temperature and barometric air pressure. This allows further actions of the KNX-based building control system to be triggered with a single unit. Practical: Existing thePrema KNX presence detectors can be upgraded easily and cost-effectively.

Set basic KNX AP Multi WH (Article number 9070900)
for retrofitting into existing KNX detectors of the following types:
thePrema S/P KNX UP WH

AMUN 716 CO2 Monitor

Description

- Mobile CO_2 sensor with USB cable for measuring air quality
- Suitable for schools / nurseries, offices, conference or meeting rooms and living spaces
- The device warns optically via the LED traffic light system in case of a potentially dangerous CO_2 concentration - so ventilation can be optimized immediately and a healthy room climate can be created
- Green threshold value: Up to 1,000 ppm CO_2, hygienically ok, everything is in the green range!
- Threshold value orange: Up to 2,000 ppm CO_2, hygienically noticeable, Aeration - good idea!
- Threshold value red: Over 2,000 ppm CO_2, hygienically unacceptable, Ventilation is an absolute must!
- Fresh air must be supplied and the used air removed at latest when the red threshold value is reached
- Includes USB cable for easy setup
- Stand and non-slip pad included, alternative wall mounting is also possible
- Development based on the recommendation for CO_2 in indoor air of the Federal Environment Agency according to various guidelines, e.g. the Bavarian „Guideline for the Promotion of Investment Costs for Technical Measures for Infection-Protection-Compatible Ventilation in Schools (FILS-R)

AMUN 716 SR

Description

- CO_2 sensor
- Suitable for conference and meeting rooms, offices, schools/nurseries, passive and low-energy housing.
- For fan control
- Warning display for CO_2 concentration (lights)
- Power unit optionally available. Power unit is suitable for flush mounted installation
- Simple upgrade of uncontrolled ventilation systems possible
- 2 switch outputs CO2 controlled for 2 stage control, with manual and automatic mode as well as display of switching status
- 3 x 0–10 V outputs for CO2, temperature and relative humidity

RAMSES 701 RAMSES 706 RAMSES 707

Description

Common functions
- Room temperature controller with thermal feedback
- Suitable for all types of heating, e.g. gas, water, electric heating with central/individual room control
- Setting controller with mechanical setting limit or detection

RAMSES 702
- Integrated temperature reduction (approx. 4 K) possible via control with time switch

RAMSES 703
- Internal setting: Temperature cannot be set externally. Temperature is set inside the device at start-up
- Integrated temperature reduction (approx. 4 K) possible via control with time switch

RAMSES 704
- Switch for additional heating ON/OFF + indicator lamp

RAMSES 705
- Switch for heating ON/OFF

RAMSES 706
- Switch for heating ON/OFF + indicator lamp
- Integrated temperature reduction (approx. 4 K) possible via control with time switch

RAMSES 707
- Switch for heating ON/OFF
- Switch for additional heating ON/OFF + indicator lamp

RAMSES 708
- Also suitable for air conditioning equipment
- Heating/cooling changeover contact

RAMSES 709
- Also suitable for air conditioning equipment
- Heating/cooling changeover contact
- 3-way selector switch for: comfort mode, reduction mode, external reduction
- Indicator lamp
- External temperature reduction (approx. 4 K) possible via control with time switch

Description

RAMSES 714

- Electronic room thermostats for all types of heating, e.g. gas, water, electric heating etc.
- Individual room control possible in combination with Theben actuators
- Heating status display via LED
- External temperature reduction (approx. 3.5 K) is possible via control with time switch. Temperature reduction can be cut to 2 K by opening a wire bridge

RAMSES 714 A

As RAMSES 714, but:

- External temperature sensor for underfloor heating (wet rooms or bathroom heating)
- Switchable for the connection of available NTC sensors (33 KΩ/25 °C)
- Switch for heating ON/OFF

RAMSES 751 RA

- Electronic room thermostat with remote temperature sensor for underfloor heating control
- Display of temperature reduction and heating ON
- 2-pole mains switch for heating ON/OFF
- Emergency mode for sensor malfunction at 30 % heating
- Central part fits nearly all frames using an adapter frame from the switch manufacturer

	Terminal cover 52,5 mm - Terminal box cover plate for assembly, sealable	- SUL 188 g - SUL 188 hw	Terminal cover 52,5 mm	9070061
	Front panel kit - The front panel installation set is suitable for Theben distributor installation devices of 17.5 to 107.5 mm width - Walls from 1 to 5 mm thick	- All DIN rail installation devices	Front panel kit	9070001
	Snap-on mounting 72 x 72 - Quick fastening for 35 mm DIN-rail	- All devices for front panel/wall installation	Snap-on mounting 72 x 72	9070071
	PC set OBELISK top2/3 - Switching programs created on the PC by means of the convenient OBELISK top2/3 software can be transferred via USB interface to the OBELISK top2 memory card and from the card to the time switch and vice versa. Thus no PC or laptop is required on-site. Programming and the program printout can be done comfortably from the desk - For Windows Vista/7/8/10 (32/64 Bit) - Consisting of: Memory card, USB plug adapter, software - Updates of existing OBELISK top2 software are available as free downloads at www.theben.de	- TR top2 - TR top3 - LUNA top3 - SELEKTA top2 - SELEKTA top3 - TR top2 KNX	PC set OBELISK top2	9070409
	Bluetooth OBELISK top3 - Bluetooth low-energy dongle for the transfer of switching programs and direct commands from the app to the time switch - Maximum manipulation security, Time switch programs can only be transferred from the app to the time switch when the Bluetooth OBELISK top3 is plugged into the time switch - Low consumption on standby compared with permanently installed Bluetooth components	- TR top3 - SELEKTA top3 - LUNA top3	Bluetooth OBELISK top3	9070130

	Description	Suitable for	Type	Article number
	Memory card OBELISK top2 - Individual memory card	- TR top2 - LUNA top2 - LUNA top3 - SELEKTA top2 - TR top2 KNX	Memory card OBELISK top2	9070404
	Antenna RC-DCF - Radio control via DCF antenna with top2 RC devices: To ensure good reception, do not install the antenna in cellars or on distribution boxes. Connection is made via separate 2-wire, unscreened high-voltage power cable (max. 100 m), up to 10 Theben top2 RC devices can be connected. Polarity, short-circuit and interruption of the antenna circuit are each visually displayed to help with installation.	- TR top2 RC - TR top3 RC - LUNA top3 RC - LUNA top2 RC - SELEKTA top2 RC - TR top2 KNX	Antenna RC-DCF	9070410
	Antenna RC-GNSS - Worldwide time synchronisation and positioning via receiving GPS satellite signal - The antenna is connected by a 2 wire cable (max. 100 m) to Theben top2/3 RC devices (up to 5 devices can be connected depending on device type) - Positioning is only possible when connecting to TR 641 top2 RC, TR 642 top2 RC, TR 644 top2 RC and SELEKTA 171 top2 RC devices - Can not be used with TR 611 top2 RC 24 V and SELEKTA 171 top2 RC 24V	- TR top2 RC - TR top3 RC - LUNA top2 RC - SELEKTA top2 RC - TR top2 KNX	Antenna RC-GNSS	9070823
	Antenna RC-GNSS R - As antenna RC-GNSS, but: - Rugged encapsulated housing - Impact resistance IK 8, protection degree IP 65	- TR top2 RC - TR top3 RC - LUNA top2 RC - SELEKTA top2 RC - TR top2 KNX	Antenna RC-GNSS R	9070807
	Cover 55 x 55 for BZ - Cover for hour counter	- BZ 142-1	Cover 55 x 55 for BZ	9070041
	Cover 72 x 72 for BZ - Cover for hour counter	- BZ 142-1	Cover 72 x 72 for BZ	9070074

	Cover 45A BJBSI WH - Cover for frames Busch-Jaeger balance SI	- theMura - 4-way push button module - TR 030 top3 UP - SELEKTA 070 top3 UP	Cover 45A BJBSI WH	9070788
	Cover 45A JAS WH - Cover for frames Jung Serie A (A 500, A plus, A creation, AS 500)	- theMura - 4-way push button module - TR 030 top3 UP - SELEKTA 070 top3 UP	Cover 45A JAS WH	9070789
	Cover 45A MMP WH - Cover for frames Merten System M (1-M, Atelier-M, M-Smart, M-Pure, M-Plan, M-Creativ)	- theMura - 4-way push button module - TR 030 top3 UP - SELEKTA 070 top3 UP	Cover 45A MMP WH	9070790

	Description	Suitable for	Type	Article number
	Cover 45A GS WH - Cover for frames Gira System 55 (Standard 55, E2, Event, Esprit)	- theMura - 4-way push button module - TR 030 top3 UP - SELEKTA 070 top3 UP	Cover 45A GS WH	9070791
	Cover 45A BS WH - Cover for frames Berker S.1	- theMura - 4-way push button module - TR 030 top3 UP - SELEKTA 070 top3 UP	Cover 45A BS WH	9070792
	Cover 45A BJRE WH - Cover for frames Busch-Jaeger Reflex SI	- theMura - 4-way push button module - TR 030 top3 UP - SELEKTA 070 top3 UP	Cover 45A BJRE WH	9070754
	Motion module RC theLeda B WH - theLeda B radio-controlled motion detector module - 180° detection angle at 12 m range - Additional light switch output - Sensor can turned horizontally by ± 90° and downwards/backwards by 90° - IP 55 protection rating - theLeda B remote control included in scope of supply for the motion detector module - A remote control can be combined with different motion detector modules - Up to 6 remote controls can be combined with a single motion detector module - Remote control range up to 100 m on open air test site	- theLeda B	Motion module RC theLeda B WH	9070800
	Motion module RC theLeda B BK - As Motion module RC theLeda B WH, but: - Black vesion	- theLeda B	Motion module RC theLeda B BK	9070801
	Motion module theLeda B WH - theLeda B motion detector module - 180° detection angle at 12 m range - Additional light switch output - Sensor can turned horizontally by ± 90° and downwards/backwards by 90° - Protection rating IP 55	- theLeda B	Motion module theLeda B WH	9070760
	Motion module theLeda B WH - As Motion module theLeda B WH, but: - Black vesion	- theLeda B	Motion module theLeda B BK	9070761
	Light module theLeda B WH - theLeda B light sensor module - Duty cycle range: 2, 4, 6, 8 hours, on / permanent on at night - Switch-on brightness can be set from 2 – 200 lux - Additional light switch output - Protection rating IP 55	- theLeda B	Light module theLeda B WH	9070762
	Light module theLeda B BK - As Light module RC theLeda B WH, but: - Black vesion	- theLeda B	Light module theLeda B BK	9070763

Accessories

	Description	Suitable for	Type	Article number
	Spike theLeda D - Spike for ground mounting of the LED bollard light theLeda D B - Length 405 mm	- theLeda D B	Spike theLeda D	9070765
	theSenda B - Remote control for communication of theSenda Plug App with the detectors - Functions remote control theSenda B: - Universally applicable remote control for many indoor and outdoor detectors - Integrated lux meter - Easy comparison of brightness measurement with theSenda Plug App - Flexible infrared communication with the detector and via Bluetooth with the smartphone - Wide range of functions: Switching and dimming for three light channels, two scenes, customizable buttons - Features theSenda Plug App: - Universal app free of charge for iOS and Android smartphones - All detectors are pre-installed and automatically updated - Automatic detector search via filter function or via stored parameter sets - Parameter sets can be saved on a customer-specific basis, stored in parameter libraries and created and read externally	- theLeda D - theMova - thePrema - theRonda - PresenceLight KNX - PlanoSpot - thePassa - LUXA 103 - thePiccola P - LUXA 104 - theMura	theSenda B	9070985
	theSenda P - Service remote control - ON/OFF - Teach-in function for teaching in the current brightness value - Predefined brightness values and switch-on times - Impulse, reset and test function	- theLuxa P - theLeda D - theMova - thePrema - theRonda - PresenceLight KNX - PlanoSpot - thePassa - LUXA 103 - thePiccola P - LUXA 104 - theMura	theSenda P	9070910
	theSenda S - User remote control - ON/OFF - Automatic - Presence simulation - Twilight switch - Call up of light scenes	- theLuxa P - theLeda D - theMova - thePrema - theRonda - PresenceLight KNX - PlanoSpot - thePassa - LUXA 103 - thePiccola P - LUXA 104 - theMura	theSenda S	9070911
	Adapter plate LUNA star - The adapter plate simplifies the replacement of faulty twilight switches from Eberle, ESYLUX, Legrand, Grässlin, Hager, Merten, Senmatic, Theben etc. As the plate has standard fixing holes, no further holes need to be drilled in the facade, 2 installation screws included.	- LUNA 126 star E - LUNA 127 star S	Adapter plate LUNA star	9070486
	LUNA star adapter mast fixing - Adapter for attaching the LUNA star products to the mast fixing S	- LUNA 126 star E - LUNA 127 star S	LUNA star adapter mast fixing	9070793
	Surface-mounted light sensor plus - Sensor rotatable - With mounting bracket and screw terminals - Protection class IP 55 - Dimensions: 95 x 48 x 45 mm	- LUNA 108 plus	Surface-mounted light sensor plus	9070991

	Description	Suitable for	Type	Article number
	Flush-mounted light sensor plus - Spring terminals - Protection class IP 66	- LUNA 108 plus	Flush-mounted light sensor plus	9070990
	Digital flush-mounted light sensor - Spring terminals - Protection class IP 66	- LUNA 110 plus - LUNA 111 top3 - LUNA 112 top3 - LUNA 121 top3 RC - LUNA 122 top3 RC - LUNA 134 KNX	Digital flush-mounted light sensor	9070456
	Digital surface-mounted light sensor - Sensor rotatable - With mounting bracket and screw terminals - Protection class IP 55 - Dimensions: 95 x 48 x 45 mm	- LUNA 110 plus - LUNA 111 top3 - LUNA 112 top3 - LUNA 121 top3 RC - LUNA 122 top3 RC - LUNA 134 KNX	Digital surface-mounted light sensor	9070415
	Diode module - Required for special functions (group/central function) with LUXOR - DIMAX: Light scenes, two button operation - 2 modules supplied in delivery	- DIMAX 534 plus	Diode module	9070367
	Adapter RAMSES 72x/78x - Wallpaper/wall cover plate for replacement of RAMSES 3...devices with new clock thermostats, e.g. RAMSES 722	- RAMSES 722 - RAMSES 722 S - RAMSES 782 - RAMSES 782 S - RAMSES 784 - RAMSES 784 S - RAMSES 721 - RAMSES 725	Adapter RAMSES 72x/78x	9070245
	Socket RAMSES - Plug-in socket for installing the RAMSES HF clock thermostat on the wall	- RAMSES 813 top2 Set A/Set S/Set 1 - RAMSES 833 top2 Set 1/2	Socket RAMSES	9070605
	Adapter plate RAMSES 70x - Adapter plate for flush-mounted socket 79 x 79 mm	- RAMSES 701-709	Adapter plate RAMSES 70x	9070480
	Adapter plate RAMSES 714 - Adapter plate for flush-mounted socket 79 x 79 mm	- SOTHIS 715 - RAMSES 714 - RAMSES 714 A - RAMSES 714 A/FH	Adapter plate RAMSES 714	9070212
	External temperature sensor 1 - External temperature sensor	- RAMSES 366/1 top2 - RAMSES 718 S/P KNX - RAMSES 713 FC KNX - CHEOPS control KNX - AMUN 716 S KNX	External temperature sensor 1	9070191
	External temperature sensor 2 - With temperature adjustment of ± 3 K	- RAMSES 366/1 top2	External temperature sensor 2	9070192

Accessories

	Description	Suitable for	Type	Article number
	Temperature sensor RAMSES IP 65 - External room temperature sensor - Protection class IP 65	- RAMSES top2 - RAMSES 816 top2 OT - RAMSES 856 top2 OT - AMUN 716 S KNX - RAMSES 718 KNX - RAMSES BLE - Flush-mounted actuators	Temperature sensor RAMSES IP 65	9070459
	Temperature sensor - Temperature sensor for laying in floor - Type of protection IP 65	- RAMSES top2 - RAMSES 816 top2 OT - RAMSES 856 top2 OT - AMUN 716 S KNX - RAMSES 718 KNX - RAMSES BLE - Flush-mounted actuators	Temperature sensor	9070321
	Flow temperature sensor RAMSES - Also required for applications with 2 feed sensors	- RAMSES 816 top2 OT - RAMSES 856 top2 OT	Flow temperature sensor RAMSES	9070371
	External temperature sensor RAMSES - Type of protection IP 65	- RAMSES 816 top2 OT	External temperature sensor	9070463
	Plunge sensor RAMSES - Additionally required for applications with domestic water control or boiler plunge sensor	- RAMSES 816 top2 OT - RAMSES 856 top2 OT	Plunge sensor RAMSES	9070379
	Flush-mounted temperature sensor - Temperature sensor for flush-mounting - Compact design for easy installation in switch / distribution boxes - For use in combination with various KNX products	- Flush-mounted actuators	Flush-mounted temperature sensor	9070496
	Valve adapter VA 80 - Valve adapters for Onda, Schlösser(from 1993), Oventrop (M 30 x 1.5), Heimeier, Herb, Therm-Concept, Frank, Roth (distributor), Dinotherm (distributor) - Other adapters available upon request	- ALPHA 5 230 V - ALPHA 5 24 V - CHEOPS control KNX - CHEOPS drive KNX	Valve adapter VA 80	9070437
	Valve adapter VA 78 - Valve adapters for Danfoss RA - Other adapters available upon request	- ALPHA 5 230 V - ALPHA 5 24 V - CHEOPS control KNX - CHEOPS drive KNX	Valve adapter VA 78	9070436
	Frame RAMSES 74x - Frame for mechanical room thermostats - Without central part	- RAMSES 741 - RAMSES 746 - RAMSES 748	Frame RAMSES 74x	9070603
	Central part RAMSES 741/748 - Central part without switch section and setting button	- RAMSES 741 - RAMSES 748	Central part RAMSES 741/748	9070602
	Central part RAMSES 746 - Central part with switch section and setting button	- RAMSES 746	Central part RAMSES 746	9070601

	Description	Suitable for	Type	Article number
	Actuator ALPHA 5 230 V - Actuator for radiators, heating circuit distributors or individual heating circuits, Operating voltage 230 V AC - For opening and closing of valves in the fields of heating, ventilation and air conditioning - The actuator control is by a room thermostat with two-point output or pulse-width-modulation - Inrush current: < 550 mA for max. 100 ms, Dimensions: 48,4 x 44,3 x 52,2 mm - „First open function" for easy installation and heating start-up - Plug-in installation on valve adapter to suit the most common valve bottoms and heating circuit distributors - Normally closed (Valve is closed when the operating voltage is cut) - Simple snap-on mounting to a valve adapter - Valve adapter not included in delivery - 100 % protection against damaging drives through leaking valves - Function and adjustment checking - Installation vertical, horizontal and up-side-down possible - Up-side-down position may reduce product life through special circumstances (e.g. contaminated water) - Protection against disassembly by means of removable SaveGuard - Guaranteed overvoltage protection	- All clock thermostats - RAMSES 701 – 709 - RAMSES 741 – 748 - RAMSES 714 - RAMSES 751 - HMG 6 T - HME 6 T KNX - HM 6 T KNX - HM 12 T KNX	Actuator ALPHA 5 230 V	9070441
	Actuator ALPHA 5 24 V As Actuator ALPHA 5 230 V, but: - Operating voltage 24 V AC / DC - Inrush current: < 300 mA for max. 2 min.	- All clock thermostats - HMG 6 T - HME 6 T KNX - HM 6 T KNX - HM 12 T KNX - HMT 6 S KNX - HMT 12 S KNX	Actuator ALPHA 5 24 V	9070442
	Power unit CO_2-sensor - 24 V / 12 W flush-mounted power unit (SELV)	- AMUN 716 R	Power unit CO_2-sensor	9070494
	Contact temperature sensor - Contact temperature sensor in the cover flap housing for measuring the temperature at pipes and curved surfaces	- TA 4 S KNX - TA 6 S KNX - TA 8 S KNX	Contact temperature sensor	9070489
	Mast mounting S - For mast or corner installation of max. 2 weather stations Meteodata, LUXOR or LUNA - Diameter 48 – 60 mm	- LUXOR 440 - LUXORliving M140 - Meteodata KNX - LUNA 131 S KNX - LUNA 133 KNX	Mast mounting S	9070928
	Busmodul MIX2 Secure - Bus coupling unit for upgrading existing MIX2- - basic devices to KNX TP Secure	- KNX MIX2-base modules	Busmodul MIX2 Secure	9070084
	2-way mounting plate ION - For the vertical mounting of two ION push-button sensors on a standard double socket (standard combination distance 71 mm)	- ION KNX - LUXORliving ION	2-way mounting plate ION	9070822
	4-way push button module - 4-way push button module with integrated temperature sensor - For use with the TU 4 RF KNX / LUXORliving T4 RF and TA 6 S KNX - Cover frame included - Adapter frames for integration in common switching ranges available as accessory	- TU 4 RF KNX - TA 6 S KNX - LUXORliving T 4 RF	4-way push button module	9070806
	Power unit 24 V DC - Power pack for supply voltage from PHARAO controllers and sensors. Power unit sufficient for 5 x PhARAO-II 14 / 15 or 4 x PHARAO-II 24 / 25 controls - Width: 3 modules	- Meteodata 24V KNX	Power unit 24 V DC	9079330

General Delivery and Sales Conditions

For use with companies (status 2016-09-01)

Preamble

All deliveries and services are based - also in the future - exclusively on the following conditions, even if we do not refer to them specifically in the individual case. Their validity can only be partly or totally excluded by express written agreement for an individual transaction. General terms and conditions, especially purchase conditions of the purchaser, shall not apply to our deliveries and services. We shall not be bound by these terms and conditions even if we do not object to them expressly in an individual case; we herewith object to them. Our General Delivery and Sales Conditions are regarded as accepted, at the latest with the acceptance of the goods or the service.

I. SCOPE OF DELIVERY OBLIGATIONS

1. Our offers are non-binding, even if made on the purchaser's request. A legally binding contractual relationship with the purchaser shall only be constituted once we have confirmed the order in writing, which may also be possible by fax, by letters created automatically without signature, or e-mail; the same applies to modifications or amendments to the contract. As far as scope, type and time of the delivery are concerned, our written order confirmation shall be binding.

2. We reserve the right to any modifications of construction, production and design of our products. Our catalogues and our product presentations published on the Internet are continually being updated. Any illustrations and drawings contained therein shall not be binding and shall not be part of the properties agreed upon. They neither represent any guarantee for durability nor quality.

3. The documents belonging to the offer, such as drawings, data sheets, figures, diagrams, files, etc., shall only be approximates where not expressly described as being binding. The documents shall remain our property; we reserve all rights to them. Without our written consent, they must not be disclosed to any third party and they must be returned to us at any time on request.

4. Call orders must be placed and accepted in due time and with the partial quantities agreed. In case of call orders where term, production batch quantities and release times have not been agreed, we shall be entitled to request a binding definition of the releases 3 months after the date of the order confirmation, at the latest. If the purchaser does not comply with this request within 3 weeks, we shall be entitled to grant him a last additional period of two weeks for doing so and when this additional period has lapsed as well, we shall be entitled to withdraw from the contract or to refuse delivery and claim damages. In any case, the entire quantity ordered in the call order has to be accepted and to be paid by the purchaser 18 months after the order, except when otherwise stipulated.
If the contractual quantity should be exceeded by the individual calls, we shall be entitled to deliver the surplus, but not obligated to do so. We can charge for the excess at the prices valid at the time of the call or the delivery.

II. PRICE

1. All prices are quoted in EURO. The applicable value added tax shall be charged separately.

2. The prices quoted apply to delivery ex works, without insurance and packaging.

3. Surcharges and a recalculation of the agreed remuneration shall be admissible as far as they are necessitated by the circumstances, e.g. material costs, wage or energy cost increases, an increase of the public charges etc., and if the goods or services are to be provided later than 4 months after the contract date. In case of any other price increases, the purchaser shall be entitled to withdraw from the contract if the list price has been increased far more than the general costs of living. Any deliveries for subsequent orders that are placed after the date of the price adjustment shall be charged at the new prices without the purchaser being entitled to withdraw from the contract.

III. DELIVERY

1. The delivery term shall start with the dispatch of the order confirmation, but not before all details of the performance of the order have been clarified and not before receipt of an agreed advance payment or provision of material; the delivery terms are always stated by us subject to our own supply by our suppliers. The delivery term shall be deemed to have been complied with when the delivery item has been dispatched or collected before the expiration of this term or when a ready-for-dispatch note has been issued in cases where the goods could not be dispatched or collected without our being responsible for this.

2. In case of force majeure or other events beyond our responsibility that would threaten the smooth processing of the order, in particular delivery delays of our suppliers, disturbances of traffic or operation, industrial disputes, shortage of materials or energy, we shall be entitled to withdraw, entirely or partially, from the contract or to postpone delivery without the purchaser being entitled to claim damages. The purchaser may request from us a statement specifying whether we want to withdraw or whether we want to fulfil the contract within an adequate period of time. If we do not make such a statement, the purchaser shall be entitled to withdraw from the contract.
We shall not be liable for the events or circumstances referred to above even if they occur during an existing delay of delivery.

3. In case of a delivery delay for which we are responsible, the purchaser shall grant us an adequate grace period. Once this period has expired, the purchaser may claim damages and/or withdraw from the contract insofar as the goods have not been delivered or indicated as being ready for dispatch until the end of this period. The purchaser is not entitled to withdraw from the contract if delivery delay has not been caused by us.

4. The purchaser is only entitled to claim damages as a replacement for the services if the cause of the damage is based on intent or gross negligence on our part. This does not apply if it is a firm deal.

5. The delivery obligations and the delivery terms shall be suspended as long as the purchaser is in delay with acceptance of the goods or any other obligation, without our rights from the purchaser's delay being thereby affected, or without him exceeding the credit limit granted by us. In this case, the risk of accidental loss or accidental deterioration shall pass to the purchaser from the date he is in delay.

6. The delivery term originally agreed shall no longer apply if the order is modified with our written consent.

7. Adequate partial deliveries as well as deviations from the order quantities (max. +/- 5 %) shall be admissible if the purchaser can be reasonably expected to accept this and as long as the latter's interests are taken into account.

8. The weight and the number of pieces of the goods delivered determined by us shall be decisive for the invoicing.

IV. DISPATCH

1. The goods shall be dispatched at the purchaser's costs and risk from a location to be determined by us.

2. Unless the purchaser has submitted any special requests, we shall choose, at our own discretion, the packaging, as well as type and channel of dispatch. The additional costs for special wishes of the purchaser shall be borne by the latter. We shall not be obliged to choose the cheapest type of dispatch.

3. If the dispatch or the delivery is delayed upon the purchaser's request, we shall be entitled to set him an adequate period of time for accepting the goods and to demand immediate acceptance as well as a compensation for the damage caused by the delay once this period has lapsed.

V. TERMS OF PAYMENT

1. Payments shall be made in accordance with the conditions specified in our order confirmation.

2. The purchaser bears the costs for his payment, especially all kinds of banking charges and expenses.

3. Cheques shall be accepted only with the usual proviso. With any type of payment, the settlement date shall be the day on which we can dispose over the amount due.

4. If a deferment of payment is granted or if the purchaser is in default with his obligations to pay, he shall, in the meantime, be liable to pay interests of 9 percent above the respective basic interest rate, without the need for a reminder notice. We reserve the right to claim further damages due to the delay. The purchaser reserves the right to prove that lower damages have been incurred. Furthermore, we are entitled to charge the purchaser a fixed rate of € 40.00 for the reminder.

5. The purchaser shall not be entitled to offset payments against any counter claims or rights unless his claims or rights are acknowledged by us, uncontested or final and absolute. The purchaser is not entitled to retain payments on account of disputed counterclaims either.

6. All our claims are due immediately if terms of payment are not adhered to, or we become aware of circumstances which appear to impair the creditworthiness of the purchaser. In this case, we are also entitled to supply outstanding consignments on cash-in-advance terms or security deposit, or to withdraw from the contract after a reasonable grace period and/or claim damages for non-fulfilment. In addition, we may prohibit the resale or processing of the goods delivered and request that the purchaser, at his costs, return the goods to us or assign the indirect possession of the goods delivered, and withdraw the authorization to collect claims pursuant to Section IX. 7. Already now, the purchaser agrees that we shall, in the mentioned cases, be authorized to enter into his premises and to take away the goods delivered.

7. Payments shall generally be set off against the oldest invoice that is due for payment. As long as an older invoice has not been paid, the purchaser is not entitled to discount on later invoices.

VI. COMPLAINTS AND NOTICES OF DEFECT

1. Complaints because of incomplete or incorrect delivery or notices of evident defects must be delivered to us in writing immediately, at the latest, however, within 2 weeks after receipt of the goods. Any other defects must be reported to us in writing immediately, at the latest, however, within 2 weeks after they have been detected.
If we have not received the complaint or notice of defect in due time, any warranty claims of the purchaser shall be excluded. In case of defects reported in due time, the purchaser shall be entitled to the claims according to Section VII.

2. In case of damage in transit, the purchaser must procure an ascertainment of the damage by the railroad company, the postal service or the transport company.

3. If a part of the goods delivered is defective, the purchaser shall not be entitled to reject the entire delivery, unless the partial delivery is of no interest to the purchaser.

VII. WARRANTY

1. The purchaser´s claims for supplementary performance shall be time-barred within 12 months from the statutory start of the limitation period. The same applies for withdrawal and diminution. This time limit does not apply if:
- the law according to § 438 section 1 no. 2 BGB and § 634a section 1 no. 2 BGB requires longer time periods,
- in case of intent,
- in case of fraudulent concealment, and
- in case of non-compliance with a quality guarantee.

We shall be obliged, at our option, to eliminate any defects or make a replacement delivery if the delivery items are defective. The purchaser´s reimbursement claims for expenses according to § 445a BGB shall also be time-barred within 12 months from the statutory start of the limitation period, provided that the last contract in the supply chain is not a consumer goods purchase. Any legal provisions regarding suspension of expiration, suspension and recommencement of the limitation period remain unaffected. Reimbursement claims against us according to § 445a BGB are only valid if the purchaser has not made an agreement with his customer which goes beyond the statutory claims for defects.

2. The purchaser shall grant us the time and opportunity that, in our equitable discretion, is required for the elimination of the defects. Any parts that are replaced shall become our property.

3. If the supplementary performance fails, if we let the adequate period granted to us for this purpose expire without making a new delivery or without eliminating the defect, or if subsequent performance is impossible or refused by us, the purchaser shall be entitled to withdraw from the contract or demand a reduction of the purchase price, the same shall apply to cases where we are unable to provide supplementary performance.

4. The warranty shall neither apply to defects and/or damage due to normal wear and tear nor defects and/or damage caused by inappropriate or negligent use, excessive stress, improper use, wrong handling etc. or circumstances that are not provided for in the contract unless the damage is due to our fault.

5. Without our consent, warranty claims may not be assigned to any third party.

6. We shall not be liable for any defects caused by improper modifications or repairs that are carried out by the purchaser or a third party.

7. Our liability for essential third-party products shall be restricted to the assignment of the warranty claims we are entitled to from the supplier of the third-party product unless satisfaction from the assigned right fails or the assigned claim cannot be enforced for any other reasons.

8. Unless otherwise provided below, any further claims of the purchaser against us, irrespective of the legal cause thereof, shall be excluded, in particular claims for the compensation of a damage that does not exist and/or occur in the goods delivered themselves (e.g. loss of profit, consequential damage or other economic losses); this exemption from liability shall not apply if liability is required by law because of deliberate action, gross negligence or a promise of guarantee or if an essential contractual obligation has been violated or in case of injuries to life and limb or health.
In case of negligent, but not grossly negligent violation, our liability shall be restricted to the replacement of the typical foreseeable damage.

9. The above provisions shall apply accordingly to the delivery of other goods than those agreed upon in the contract.

VIII. LIABILITY, PERIOD OF LIMITATION

1. The exclusion and the limitations of our liability for damages as set forth in Section VII. 8 shall apply accordingly to all cases of our liability for damages due to violation of contractual, or quasi-contractual obligations and tortious act. They shall not apply to claims pursuant to Paragraphs 1 and 4 of the Product Liability Law and to claims due to initial inability to perform at the point of conclusion of the contract or impossibility for which we are responsible. This exemption from liability shall not apply if liability is required by law because of deliberate action, gross negligence or a promise of guarantee or if an essential contractual obligation has been violated or in case of injuries to life and limb or health.

2. If our liability for damages is excluded or restricted, this shall apply in the same way to the personal liability of our executive bodies, employees or authorized agents.

3. The claims of the purchaser referred to in Sec. 1 shall become time-barred after 24 months, calculated from the end of the year of the passing of the risk. If the statutory period of limitation is shorter than 24 months, this statutory period shall be applicable to the relevant claims on the part of the purchaser. This reduction of the period of limitation shall not apply to claims for reasons of tortious act or product liability.

4. The statutory provisions concerning the burden of proof shall remain unaffected.

IX. RETENTION OF TITLE

1. All goods delivered (goods subject to retention of title) shall remain our property until all and any claims to which we are entitled because of the business relationship, in particular the outstanding balance claims, have been fully settled by the purchaser. This shall also apply when payments are made on specially designated claims.

2. If the goods subject to retention of title are combined with other goods by the purchaser, we shall acquire co-ownership of the new object pro rata of the invoice value of the goods subject to retention of title to the invoice value of the other goods used. If our ownership lapses due to a combination, the purchaser herewith agrees to assign to us his property rights to the new objects to the amount of the invoice value of the goods subject to retention of title and keeps them for us, free of charge. The resulting co-ownership rights shall be considered as goods subject to retention of title within the meaning of Section 1. We accept the assignment.

3. The purchaser may sell the goods subject to retention of title in the normal course of business at his terms and conditions only if these contain a comprehensive retention of title in accordance with the provisions set forth herein, and as long as he is not in default, provided that the claims from the resale pass to us pursuant to Sections 4. and 6. hereof. The purchaser does not have any other right of disposition of the goods subject to retention of title, in particular the authorisation to dispose of the goods subject to retention of title shall be automatically revoked if insolvency proceedings are applied for or liquidation commenced regarding the assets of the purchaser

4. The claims of the purchaser from reselling the goods subject to retention of title are herewith assigned to us. They serve as security to the same extent as the goods subject to retention of title. We herewith accept the assignment.

5. If the purchaser sells the goods subject to retention of title together with other goods not obtained from us, the assignment of claims from the resale shall only correspond to the amount of the invoice value of the goods subject to retention of title that are sold in the individual case. When goods in which we have a co-ownership share pursuant to Sec. 2. are sold, the claims shall be deemed to have been assigned corresponding to the value of this co-ownership shares.

6. If the purchaser uses the goods subject to retention of title for the execution of a contract for work, Sections 4. and 5. shall apply accordingly to the claims from this contract.

7. The purchaser shall be entitled to collect claims from sales according to Sections 3., 5., and 6. until this permission is revoked by us, which shall be admissible at any time. We will only make use of the right of revocation in the cases specified in Section 3., as well as V. 5. Any other assignment of the claims by the purchaser shall not be permitted. Upon our request, the purchaser shall be obliged to inform his customers immediately about this assignment to us – unless we do it ourselves – and to provide any information and documents required for the collection of claims to us. The purchaser is prohibited from hypothecation or transfer of the goods by way of security.

8. Our retention of title implies that, once all our claims have been fully paid, the title to the goods subject to retention of title shall ipso jure pass to the purchaser and he shall be entitled to the assigned claims without any restrictions. If the value of the existing securities exceeds the secured claims by more than 20 % in total, we shall be obliged to release securities accordingly, at our option, on request of the purchaser. The assessment of securities shall be based on their realizable value.

9. The purchaser shall inform us immediately about any seizure or any other threat or impairment to our ownership rights or claims by a third party and provide the bailiff's return or any other documents to us and he shall do anything within his power to protect our rights.

10. We shall be entitled at any time to enter into the warehouse and the business premises of the purchaser, in order to remove, separate or label the goods subject to retention of title. At our request, the purchaser shall provide any relevant information concerning the goods subject to retention of title and hand over the related documents. The purchaser, at his costs, shall be obliged to provide comprehensive insurance coverage for the goods subject to retention of title in our favour and to supply evidence thereof on request. He herewith assigns all claims from these insurances to us; we accept the assignment.

11. The assertion of our retention of title or the revocation of the authorizations granted herein shall not be considered as a withdrawal from the contract. The purchaser's right of possession in the goods subject to retention of title expires if he does not meet his obligations arising from this or another contract. We shall then be entitled to take possession of the goods subject to retention of title ourselves and to exploit them in the best possible way by means of a private sale or an auction, without prejudice to the payment obligations or any other duties of the purchaser. The proceeds thus realized shall be appropriated to the purchaser's outstanding payments after the costs have been deducted. Should there be any surplus, this shall be paid to the purchaser.

12. If the retention of title or the assignment is not effective under the law to which the goods belong, the corresponding security valid in this field of law shall be deemed as agreed. If the cooperation of the purchaser is required in this context, he shall take any measures that are necessary for the constitution and preservation of such rights.

X. TOOLS

1. Tools, moulds, appliances and the like - in the following referred to as "tools" - are in principle our assets, even if the purchaser had paid for these wholly or partially. This shall apply irrespective of whether the tools were manufactured by us or by commissioned third parties.

2. We undertake not to manufacture any parts for third parties using tools for which the purchaser has paid the entire cost, providing the purchaser supplies us with follow-up orders. This obligation expires without a claim for reimbursement of any type against us arising for the purchaser if we do not receive further orders within two years after the last order.

3. We shall store the tools in good condition free of charge. The purchaser shall bear the costs of maintenance and repairs. Our obligation to store the tools shall come to an end after expiry of the two-year period stated in Sec. 2. We shall be entitled to dispose of the tools afterwards.

4. The provisions above (Sections 1 to 3) shall not apply to tools for common and generally usable items.

XI. PROTECTIVE RIGHTS OF THIRD PARTIES

Insofar as we have to manufacture products on the basis of drawings, specifications, models, or samples given to us by the purchaser, the purchaser takes upon himself the responsibility of guaranteeing to us that the rights of third parties are not infringed upon. In case of violation, the purchaser will indemnify us in full from any claims by third parties and fully reimburse us for any resulting damages. If a third party claims its industrial property rights we are entitled to stop the manufacturing or delivering of the items immediately without checking the legal situation.

XII. MISCELLANEOUS PROVISIONS

1. The place of performance and jurisdiction for both parties under the contract is D-72401 Haigerloch, Germany. We are also entitled to file an action against the purchaser at the purchaser's general place of jurisdiction.

2. All legal relations between the purchaser and us shall be governed exclusively by law of the Federal Republic of Germany.

3. Should one or several of the provisions of these terms and conditions or the other contractual provisions be or become invalid, this shall not affect the validity of the remaining provisions. The invalid provisions shall be reinterpreted in such a way that the legal and economic purpose intended with them is achieved to the greatest possible extent. The same shall apply if, during the execution of the agreement, a gap in the agreement requiring an amendment becomes evident. The contracting parties undertake to replace the ineffective provisions immediately by legally valid provisions or to close the contractual gap.

4. We shall store the purchaser's data for the purposes of the contractual relationship.
