

## DATA SHEET

### terminal caps

### KA-DLS/RH

for DFS, DHS and RH

Article number 09913997

#### Function

Terminal covers for integrated distribution devices provide additional protection against direct contact. Voltage-carrying terminals can be covered using these covers, thereby reducing the risk of an electric shock when working on distributors, for example. The covers are specially designed for each device. These terminal covers provide protection against direct contact for live terminals with single- or n-terminal designs of the DLS miniature circuit-breakers. They are also suitable for the main switches in the RH series. Every terminal to be covered requires a KA-DLS/RH.

#### Features

Increases the protection against direct contact, Easy handling, Plastic as the base material

#### Mounting

plug-in to terminal

#### Applications

Terminal covers can be used on all distributors in which the corresponding switching devices are used, e.g. in residential and purpose-built buildings, as well as commercial buildings.

#### Technical Data

Technical Data	KA-DLS/RH
Series	KA-DLS/RH
Accessories design	protective cap
	<b>General data</b>
Installation type	Device extension
Housing material	thermoplastic
Width	17 mm
Height	29 mm
Depth	18 mm
Weight	0.002 kg

#### Dimensions
