

DATA SHEET

spacers DHDS

For RS/RSZ impulse switches, RI installation relays, HS contactors and DLS 7 / 8 / 9 circuit breakers
Article number 09860401

Function

Spacers reduce the mutual heating of components and therefore increase the maximum duty cycle.

Features

small width of just 0.5 units (8.75 mm), easy mounting

Mounting

quick fastening to mounting rail, any installation position

Applications

The impulse relays and installation relays have a maximum duty cycle of one hour without auxiliary equipment. To achieve an unlimited duty cycle, double-sided spacers of type DHDS must be used. We also recommend using spacers with relays and contactors if the ambient temperature exceeds 40°C.

Technical Data

Technical Data	DHDS
Series	DHDS
Accessories design	spacer
General data	
Housing type	distribution board housing
Installation type	Device extension, Mounting rail (35 mm)
Housing material	thermoplastic
Width	9 mm
Height	60 mm
Depth	54 mm
Module widths	0.5
Weight	0.009 kg

Dimensions
